Religious Systems And Psychotherapy:

Religious Systems and Psychotherapy Richard H. Cox, 2010-11-01 Man's search for answers to the problem of human existence has led him from soothsayers to psychotherapists. He has sought guidance on an individual and group basis. This guidance has often resulted in organized institutions of a religious, political, or philosophical nature. The major world religions presented in this book are discussed from the psychotherapeutic and mental health point of view. Many other religious systems are included as well as selected specific topics of special concern. There are three major sections in this volume. Section one includes fourteen major world religious systems. Section two includes indigenous and emergent systems such as magic, exorcism, and witchcraft, and section three deals with multiple systems and includes areas of special concern to both the student of religion and human behavior. Of particular interest is the section of discussions on the role of the religious man as psychotherapist and the psychotherapist as a religious man. Other concerns deal with ethics, values, morals, and psychoanalysis. This book will serve as a resource volume for students, teachers, and practicing professionals in the helping professions, particularly the fields of religion and mental health.

Religious Theories of Personality and Psychotherapy

R. Paul Olson, 2002 Six clinical psychologists from six different Eastern and Western religious traditions: Hinduism, Buddhism, Taoism, Judaism, Christianity, and Islam examine a single clinical case from their individual religious perspective. Each of six chapters includes an overview of the specific spiritual tradition, its theory of personality, its theory of the symptoms and etiology of distress, suffering, or pathology, its theory of therapy procedures and techniques to facilitate change, relationships between the religious tradition and other traditions, and application to the specific clinical case. For mental health professionals and clergy, and for academic instructors and students in undergraduate and graduate courses on religion, cross-cultural studies, personality, counseling, and psychotherapy. Brian Vandenberg, University of Missouri, St. Louis. A landmark publication, *Critical Issues in Psychotherapy* moves the discipline into the new millennium by addressing many of the field's new and revolutionary approaches. Through illustrative therapy cases and practitioner commentaries, this text examines both the newer and the more established models in psychotherapy. Organized around the issues that are fundamental to psychotherapy, chapters include information on empirically validated treatments, mainstream theories, individualism, spirituality, multiculturalism, moral and legal discourse, and managed care. Spirituality in Counselling and Psychotherapy Dennis Lines,2006-10-16 Fascinating There is much here that is controversial thought provoking and very useful It is encyclopaedic in its breadth and use of knowledge Like rich food it needs to be taken in slowly savouring every morsel

Thresholds Spirituality has been traditionally taboo within the counselling and psychotherapy profession Denis Lines comes into this controversial scene with a rigorous but gentle mystical but grounded inspiring and thought provoking voice The book is well written and presents the model in the context of other therapeutic modalities which makes it interesting and useful for therapists from different backgrounds and practice settings It could also be of use for those involved in religious education pastoral care or anybody interested in the spiritual development of the self or the existential quest of humankind

Therapy Today This gentle mystical empirical and scholarly book is truly inspirational and it deserves the widest possible readership among therapists religious educators and all those who care about the spiritual destiny of humankind Professor Brian Thorne Co founder The Norwich Centre and Emeritus Professor of Counselling University of East Anglia

Spirituality in Counselling and Psychotherapy explores the idea that throughout the course of a therapeutic relationship between therapist and client a spiritual level is reached by the two people involved The author shows how this dimension can help clients who are living in an increasingly secular and faithless society to find some resolution with the issues they bring to therapy By exploring different perspectives on religion and spirituality the book provides therapists with the grounding they need to

introduce spiritually centred counselling into their practice It describes the characteristics of spiritual counselling and covers practical considerations such as recognising indications from the client to move into a spiritual mode of therapy exploring the self through spiritual work within the therapeutic process and how this can lead to healing and growth how to deal with doubt and scepticism over issues of spirituality The book is illustrated throughout with transcripts and case studies to show how therapists can integrate the spiritual within their own approach to therapeutic work It will be invaluable to all those who wish to explore this dimension in their work with clients
