Hoover, 2022-12-26 This book examines the growing diversity of religions and worldviews across South Central Asia and the factors affecting prospects for covenantal pluralism in these regions Going beyond banal appeals for mere tolerance the theory of covenantal pluralism calls for a constitutional order of religious freedom and equal treatment combined with a culture of practical religious literacy and everyday virtues of engagement across lines of religious difference According to the Pew Religious Diversity Index half of the world's most religiously diverse countries are in Asia The presence of deep religious worldview difference is often seen as a potential threat to socio political cohesion or even as a source of violent conflict Yet in Asia as elsewhere the degree of this diversity is not consistently associated with socio political problems Indeed while religious difference is implicated in some social challenges there are also many instances of respectful multi faith engagement practical collaboration and peaceful debate Volume II offers a pioneering exploration of the prospects for this robust and non relativistic type of pluralism in South Central Asia Volume I examined East Southeast Asia The chapters in these volumes originally appeared as research articles in a series on covenantal pluralism published by The Review of Faith International Affairs *Religious Diversity* Roger Trigg, 2014-04-21 Religious Diversity examines whether believing in a religion's truth increases intolerance and how the existence and growth of multiple religions affects political societies **Religious Diversity and Intercultural Education** John Keast, Council of Europe, 2007-01-01 This reference book is intended to help teachers teacher administrators policy makers and others deal with the important issue of religious diversity in Europe's schools The religious dimension of intercultural education is an issue that affects all schools whether they are religiously diverse or not because their pupils live

and will work in increasingly diverse societies The book is the main outcome of the project 1The Challenge of intercultural education today religious diversity and dialogue in Europe developed by the Council of Europe between 2002 and 2005 It is in four parts theoretical and conceptual basis for religious diversity and intercultural education educational conditions and methodological approaches religious diversity in schools in different settings examples of current practice in some member states of the Council of Europe *Freedom of Religion and Religious Diversity* Md Jahid Hossain Bhuiyan,Ann

Black,2024-08-23 Today pluralism is increasingly the norm and can be seen as a permanent characteristic of modernity As seen in world events religion has not become irrelevant but more diverse giving rise to a complex web of religion and belief minorities together with intra plural majorities Nations seek ways to implement the ideal of freedom of religion but as this book shows whether East or West in the global North or the South there is no simple formalism for accommodating religious diversity Different faith communities have competing needs and demands for the same social space with tensions inevitably arising This book highlights responses from liberal democracies which enshrine secularism into their constitutions to other constitutions where religion and ethnic identity are enshrined to prioritise their ethno religious majority Western and Asian countries encounter different obstacles and challenges With analysis from 19 international scholars the book explores different obstacles and responses to accommodation of religious minorities in a range of jurisdictions In a globalised world it will be invaluable for comparative legal scholars for law and religion scholars researchers and students and decision makers e g governments non governmental organisations and for those who seek to better understand the challenges of our time

Religious Diversity in Canadian Public Schools Dia Dabby,2022-02-01 Canadian public schools have long been entrusted with the mandate of socializing children Yet this duty can rest uneasily alongside religious diversity questions Grounding its analysis in three seminal Supreme Court cases involving religion in schools Religious Diversity in Canadian Public Schools reveals legal processes that are unduly linear compressing multidimensional conversations into an oppositional format and stripping away the voices of children themselves Dia Dabby contends that schools are in fact microsystems worthy of their own consideration and with the power to construct their own rules and relationships This compelling work connects many of the themes that have animated public discourse since multiculturalism was officially enacted in Canada Situating its analysis in relation to concepts of nation education and diversity Religious Diversity in Canadian Public Schools encourages a deeper conversation about how religion is mediated through public schools and invites a critical reassessment of the role of law in education Law and Religious Diversity in Education Kyriaki Topidi,2020-08-05 Religion is a prominent legal force despite the premise constructed and promoted by Western constitutionalism that it must be separated from the State in democracies Education constitutes an area of human life that leaves ample scope for the expression of religious identity and shapes the citizens of the future It is also the place of origin of a considerable number of normative conflicts involving religious identity that arise today in multicultural settings The book deals with the interplay of law and religion in education through the

versatility of religious law and legal pluralism as well as religion's possible adaptation and reconciliation with modernity in order to consider and reflect on normative conflicts. It adopts the angle of the constitutional dimension of religion narrated in a comparative perspective and critically reflects on regulatory attempts by the State and the international community to promote new ways of living together.

Managing Religious Diversity in the Workplace Stefan Gröschl, Regine Bendl, 2016-03-09 Many observers propose the exclusion of all religious related aspects from organizational life others promote a more tolerant approach of certain practices symbols and ceremonies and few commentators highlight the values diverse religious beliefs and experiences that employees could bring to the organization. Arguments conclusions and recommendations are often contradictory and inconclusive due to the complexity and dividing nature of religion diversity. In *Managing Religious Diversity in the Workplace* the editors present a selection of essays conceptual papers empirical studies and case studies about how religious diversity and spirituality are managed. The book explores how firms address organizational and managerial challenges deriving from the religion diverse backgrounds of their employees. The different contributions discuss policies and practices how implicit and unmarked religious norms influence the managing of religious issues in organizations and what the benefits of a religion diverse workforce are. It also includes contributions which address aspects of spirituality in the workplace and the role of legal frameworks and their influence on organizations and their policies and practices regarding religion diversity. The perspectives and contributions include a wide range of disciplines by authors from leading academic institutions around the world.

Religious Education in a World of Religious Diversity Wilna A.J. Meijer, Siebren Miedema, Alma Lanser-van der Velde, 2009 This volume brings together a selection of papers presented at the Fifteenth Session of the International Seminar on Religious Education and Values ISREV which took place in 2006 in Driebergen the Netherlands addressing the theme *Religious Education in a World of Religious Diversity*. The authors were invited to combine the concept of diversity with the dimensions of temporality of time and history in reworking their contributions for this book. This temporal aspect is in a sense inherent in educational thinking. On the one hand education as intergenerational transmission has a conservative aspect tradition being what is actually and presently transmitted from the past and or what is considered worthwhile to be passed on. On the other hand acknowledging the activity of students themselves as a prerequisite for any education to happen brings the open endedness and therefore the future into the pedagogical arena in terms of development learning reflection edification et cetera. So the question answered in this volume is what does this inherent historicity mean for religious education as well as for the concept religion and religious diversity. In answering this question the contributions represent the global character of the concern with religious diversity in relation to religious education and originate respectively from the following countries Canada Bhikkhu English United States Moran Latvia Ilshko Russia Kozyrev Germany Pirner South Africa Roux du Preez Ferguson Japan Omori Australia de Souza Turkey Sel uk and the Netherlands Meijer Miedema

Religious Diversity Today Jean-Guy A. Goulet, Liam D. Murphy, Anastasia Panagakos, 2015-12-01 This insightful three volume set examines faith through the social and cultural perspective of anthropology sociology and religious studies shedding light on the role of religion in the human experience Why is human suffering and the existence of evil part of the human experience How does religious doctrine establish one's identity In what ways does religion interact with and shape the social order This thought provoking work ponders these questions and explores the concept of religion from various perspectives as a tool for self and community based spiritual awareness as a set of practices that translates faith into interaction with others and as a cornerstone of society for those who seek to harness or hinder its influence Written in accessible and inviting language each volume focuses on a particular dimension of religion The first book examines religious experience in the modern world and explores suffering in religious faiths the second volume centers around ritual and pilgrimage and the last book analyzes the controversial relationship between religion and societies The content features such thought provoking topics as death and green burials sexuality and sex trade and how and why evil manifests in the human experience

Religious Diversity in Southeast Asia and the Pacific Gary D. Bouma, Rodney Ling, Douglas Pratt, 2009-12-04 Religious diversity is now a social fact in most countries of the world While reports of the impact of religious diversity on Europe and North America are reasonably well known the ways in which Southeast Asia and Asia Pacific are religiously diverse and the ways this diversity has been managed are not This book addresses this lack of information about one of the largest and most diverse regions of the world It describes the religious diversity of 27 nations as large and complex as Indonesia and as small as Tuvalu outlining the current issues and the basic policy approaches to religious diversity Southeast Asia and the Pacific Islands are portrayed as a living laboratory of various religious blends with a wide variance of histories and many different approaches to managing religious diversity While interesting in their own right a study of these nations provides a wealth of case studies of diversity management most of them stories of success and inclusion

Routledge Handbook on the Governance of Religious Diversity Anna Triandafyllidou, Tina Magazzini, 2020-12-30 This book critically reviews state religion models and the ways in which different countries manage religious diversity illuminating different responses to the challenges encountered in accommodating both majorities and minorities The country cases encompass eight world regions and 23 countries offering a wealth of research

material suitable to support comparative research Each case is analysed in depth looking at historical trends current practices policies legal norms and institutions By looking into state religion relations and governance of religious diversity in regions beyond Europe we gain insights into predominantly Muslim countries Egypt Morocco Tunisia Turkey Indonesia Malaysia countries with pronounced historical religious diversity India and Lebanon and into a predominantly migrant pluralist nation Australia These insights can provide a basis for re thinking European models and learning from experiences of governing religious diversity in other socio economic and geopolitical contexts Key analytical and comparative reflections inform the introduction and concluding chapters This volume offers a research and study companion to better understand the connection between state religion relations and the governance of religious diversity in order to inform both policy and research efforts in accommodating religious diversity Given its accessible language and further readings provided in each chapter the volume is ideally suited for undergraduate and graduate students It will also be a valuable resource for researchers working in the wider field of ethnic migration religion and citizenship studies

International Approaches to Governing Ethnic Diversity Jane Boulden, Will Kymlicka, 2015-02-12 One of the most remarkable features of the post Cold War period has been the upsurge of international involvement in questions of ethnic diversity From the United Nations and the European Court of Human Rights to diverse international philanthropic and advocacy organizations a wide range of international actors have adopted policies and principles for addressing questions of ethnic rights identity and conflict International Approaches to Governing Ethnic Diversity explores whether and how these international actors contribute to the peaceful and democratic governance of ethnic diversity It focuses on two broad areas of international work the evolution of international legal norms regarding the rights of minorities and indigenous peoples and international approaches to conflict and post conflict development The book charts new territory by mapping the range of international actors who affect the governance of ethnic diversity and exploring their often contradictory roles and impacts Most international actors come to questions of ethnic diversity indirectly and reluctantly on the basis of widely varying mandates many of which were established to fulfill other objectives They naturally therefore have different priorities and perspectives And yet the book identifies a striking convergence amongst international actors around discourses of diversity and equality demonstrating the existence of an epistemic community where actors work within common vocabularies discourses and principles that attempt to link human rights pluralism development and peace
