Remaining Issues In The Decommissioning Of Nuclear Powered:

Remaining Issues in the Decommissioning of Nuclear Powered Vessels Ashot A. Sarkisov, L.G. LeSage, 2003-06-30
The Russian NATO Advanced Research Workshop on Scientific Problems and Unresolved Issues Remaining in the Decommissioning of Nuclear Powered Vessels and in the Environmental Remediation of Their Supporting Infrastructure was held in Moscow Russia at the Presidium of the Russian Academy of Sciences on April 22-24 2002. This was the third in this series of North Atlantic Treaty Organization (NATO) sponsored workshops in Moscow on nuclear vessel decommissioning. The first one was in June 1995 and served to focus international attention on the problems of nuclear vessel decommissioning in Russia and elsewhere. The second one was in November 1997 and it focused on the risks associated with nuclear vessel decommissioning. Attendance at the current workshop was approximately 100 with participants from Russia, United States, Norway, France, Denmark, Germany, Japan, Korea, NATO and the European Union. The Workshop was sponsored and funded by the Security Related Civil Science and Technology Program of the Scientific and Environmental Affairs Division of NATO. Within Russia, the Workshop was sponsored and supported by the Russian Academy of Sciences, Minatom of Russia, Rosudostroenie, Ministry of Industry and Science of Russia and the Russian Navy. Within the U.S., the Workshop was supported by the U.S. Department of Energy. The sponsorship and support of all of the above organizations are gratefully acknowledged.

Scientific and Technical Issues in the Management of Spent Fuel of Decommissioned Nuclear Submarines Ashot Sarkisov, Alain Tournyol du Clos, 2006-01-09. This book addresses a very important challenge of the present complex decommissioning of the nuclear powered vessels taken out of service and environmental rehabilitation of the centers of basing and everyday running of different type nuclear vessels. The book specifically focuses on the scientific and technical problems of management of naval spent nuclear fuel and radioactive waste.

The Future of Nuclear Power John N. Lillington, 2004-10-27. During the last century, nuclear power has been established as a reliable source of energy in the major industrialised countries. It has recently enjoyed a revival in attention and research due to the environmental concerns surrounding current conventional energy sources. Issues of regulation and safety are at the forefront of all discussions involving nuclear power and will govern its place in the future. The Future of Nuclear Power takes a technical and comprehensive look at the current and future status of nuclear power throughout the world. The 17 chapters are divided into two main sections: a review of all current generation plants and concepts for new advanced reactor design and safety. The broad ranging topics covered by this publication coupled with the current revival of interest in nuclear energy make it a timely reference for all nuclear scientists. Reviews the issues surrounding the future operation of existing commercial nuclear plants. Several chapters dedicated to the extensive research programs in place concerning safe and reliable operation. Compares nuclear and non nuclear options for energy needs in the future, evaluating the benefits and risks of both.

Geopolitics and Security in the Arctic Rolf Tamnes, Kristine Offerdal, 2014-07-11. Written by a group of leading experts on

Arctic affairs this book offers a historically informed and comprehensive study of the geopolitics and security challenges of the Arctic. The key aim of the work is to identify the conditions for cooperation, stability and peace in the Arctic and to reach beyond simple description and expectation in order to explore in depth some of the main factors that will determine the future of international relations in the region. Furthermore, it addresses key topics such as the geopolitical significance of the Arctic and the importance of oil and gas resources in the Arctic. The book also investigates what the main characteristics of governance in the Arctic are and how institutions and regimes can promote stability and security in the region. The volume maintains two layers of focus. The first relates to the dynamics within the Arctic and the second to developments outside the region, highlighting that we cannot understand the Arctic in isolation from global developments such as energy markets, security conflicts and NATO-Russian antagonism. This book will be of much interest to students of Arctic politics, security studies, geopolitics, Russian and Scandinavian politics and international relations in general.

Nuclear Decommissioning Case Studies: Organization and Management, Economics, and Staying in Business Michele Laraia, 2023-01-11. Nuclear Decommissioning Case Studies: Organization and Management, Economics and Staying in Business is the fifth volume in Michele Laraia's series which presents a selection of global case studies on different aspects of nuclear decommissioning. This volume focuses on organization, economics and performance, offering the reader guidance on project management, staffing, costs and funding and training. It guides those responsible for the planning and implementation of nuclear decommissioning to ensure thorough and reliable applications. Decommissioning experts, including regulators, operating organizations, waste managers, researchers and academics, will find this book to be suitable supplementary material to reference works on the theory and applications of nuclear decommissioning. Readers will obtain an understanding of many key case studies, including what happened and what they can learn from the events, quoted to help supplement, solidify and strengthen their understanding of the topic. Presents a selection of global case studies which focus on organization, economics and performance of nuclear decommissioning in relation to project and industry sustainability, with a focus on management, funding and training aspects. Includes 100 case studies on project management, costs and funding and teaching and learning. Based on experience and lessons learned, assists the reader in developing and implementing decommissioning plans while ensuring the availability of technical, financial and human resources at all times.

Safety, Reliability, Human Factors, and Human Error in Nuclear Power Plants B.S. Dhillon, 2017-12-14. Each year, billions of dollars are being spent in the area of nuclear power generation to design, construct, manufacture, operate and maintain various types of systems around the globe. Many times, these systems fail due to safety, reliability, human factors and human error-related problems. The main objective of this book is to combine nuclear power plant safety, reliability, human factors and human error into a single volume for those individuals that work closely during the nuclear power plant design phase as well as other phases, thus eliminating the need to consult many different and diverse sources in obtaining the desired information.
