## A Distinguished Example of Early French Woodcut Art

**55. ERUDITORIUM POENITENTIALE. ERUDITORIUM PENITENTIALE.** Lettre Nâtarde. 76 leaves. 24-25 lines. With 17 beautiful woodcuts (one is a repetition). Some leaves uncut. 4to. Doveskin. N.pl., n.d. (Paris, Antoine Caillaut, 1487).

A fine large copy of the rare first edition of an instruction for doing penance in a manner prescribed by the Church. It contains remarkable woodcuts ranking "amongst the earliest French examples of the art... only having the remotest resemblance to Netherlandish work of the period."

Twelve of them appear here for the first time. Four others were also used in Caillaut's *Livre de bonnes moeurs*, which he dated June 7, 1487 in its colophon. Three of these belong to the series of the seven cardinal vices represented "in the form of men in characteristic attitudes riding upon animals supposed

to have similar propensities" (Davies, in *Cat. Fairfax Murray*); they are the cuts representing Superbia, Avaritia and Luxuria.

The first edition of the *Eruditorium* differs slightly from the second (see references: *Comen. E. 81*) in the typographical arrangement and also by the fact that in the chapter dealing with the sin of debauchery the woodcut representing *Acidia* is repeated, while the *Luxuria* cut is present in the second edition. The *Luxuria* cut was either not available when the first edition was published, or it was not yet made. The second explanation would be in favor of the assumption that the *Eruditorium* was printed before the *Livre de bonnes moeurs*.

Galloway, 2011-03-07 To most people it probably seems that La Salle and his men permanently fixed in the pantheon of explorers of the North American continent need little further introduction The fact is that this whole early period of exploration and colonization by the French in the southeastern United States has received far less scholarly attention than the corresponding English and Spanish activities in the same area and even the existing scholarship has failed to focus clearly upon the Indian tribes whose attitudes toward the European newcomers were crucial to their very survival In this collection of essays marking the tricentennial of Ren Robert Cavelier de La Salle's 1682 expedition into the Lower Mississippi Valley thirteen scholars from a variety of disciplines assess his legacy and the significance of French colonialism

in the Southeast These scholars in the fields of French colonial history and the ethnohistory of the Indians of the Louisiana Colony deal with a diversity of topics ranging from La Salle s expedition itself and its place in the context of New World colonialism in general to the interaction of French settlers with native Indian tribes *La Salle and the Discovery of the Great West* Francis Parkman,1885 Lost Maps of the Caliphs Yossef Rapoport,Emilie Savage-Smith,2018-12-11 About a millennium ago in Cairo an unknown author completed a large and richly illustrated book In the course of thirty five chapters this book guided the reader on a journey from the outermost cosmos and planets to Earth and its lands islands features and inhabitants This treatise known as The Book of Curiosities was unknown to modern scholars until a remarkable manuscript copy surfaced in 2000 Lost Maps of the Caliphs provides the first general overview of The Book of Curiosities and the unique insight it offers into medieval Islamic thought Opening with an account of the remarkable discovery of the manuscript and its purchase by the Bodleian Library the authors use The Book of Curiosities to re evaluate the development of astrology geography and cartography in the first four centuries of Islam Their account assesses the transmission of Late Antique geography to the Islamic world unearths the logic behind abstract maritime diagrams and considers the palaces and walls that dominate medieval Islamic plans of towns and ports Early astronomical maps and drawings demonstrate the medieval understanding of the structure of the cosmos and illustrate the pervasive assumption that almost any visible celestial event had an effect upon life on Earth Lost Maps of the Caliphs also reconsiders the history of global communication networks at the turn of the previous millennium It shows the Fatimid Empire and its capital Cairo as a global maritime power with tentacles spanning from the eastern Mediterranean to the Indus Valley and the East African coast As Lost Maps of the Caliphs makes clear not only is The Book of Curiosities one of the greatest achievements of medieval mapmaking it is also a remarkable contribution to the story of Islamic civilization that opens an unexpected window to the medieval Islamic view of the world France and England in North America (Vol. 1-7) Francis Parkman,2023-12-21 Francis Parkman s seminal work France and England in North America encompassing seven volumes offers an intricate examination of the colonial struggle between France and England in North America during the 17th and 18th centuries Parkman s narrative is characterized by its vivid prose and exhaustive research blending historical analysis with dramatic storytelling Drawing from a wealth of primary sources he meticulously details the geopolitical rivalries cultural tensions and the impactful encounters between European settlers and Indigenous peoples providing a nuanced understanding of the period s complexities Set against the backdrop of burgeoning empires Parkman s work serves as a critical exploration of territorial ambitions and the resulting conflicts that shaped the continent s history Francis Parkman was a pioneer in the field of American history influenced by his upbringing in a prominent Boston family which fostered his interest in history and the natural world His travels through the American wilderness and exposure to firsthand accounts from various colonial figures shaped his perspective instilling a deep appreciation for the interplay of environment and human endeavor Parkman s scholarly approach bridges the gap

between history and literature making his narratives engaging yet informative For anyone interested in understanding the foundational conflicts that forged modern North America France and England in North America is indispensable Parkman s masterful storytelling and keen insights will appeal to history enthusiasts and readers alike illuminating a critical chapter in the ongoing narrative of colonialism and its consequences     *Remarkable Manuscripts, Books, and Maps from the IXth to the XVIIIth Century, Including Many First Descriptions of Hitherto Unknown Items Recently Discovered* H.P.
