Remington Hills D. Michael Wallace, 2003-11 Will Brister's sons are at a loss as to what to do with the elderly widower who was once their vibrant charismatic father. A chance newspaper ad and a pleasant voice on the phone lure the family to Remington Hills, a large assisted living facility on the northern edge of San Antonio. There Will emerges from his grief to instill life and energy to what had become a peaceful but monotonous environment. Remington Hills provides a memorable read about courage and triumph, family ties and compassion, heartache and tough decisions. Reports Upon the Mineral Resources of the United States Browne, 1867 The History of the Gold Discoveries of the Northern Mine's [sic] of California's Mother Lode Gold Belt as Told by the Newspapers and Miners, 1848-1875, 2000 This book is the chronological history of the gold rush and gold discoveries from 1848 through 1875 as viewed and reported by the newspapers and miners on what was called the Northern Mines area of California's Mother Lode Gold Belt. The Northern Mines was that area north of the Cosumnes River which included Placerville on northward. It included the region containing the South Middle and North forks of the American River, the Bear River, the South Middle and North forks of the Yuba River, and the South Middle and North forks of the Feather River plus all the other branches and tributaries that ran into the named forks and rivers. This book contains as many newspaper articles that could be found relating to the gold rush days. In using the newspaper articles from the golden era as printed with their dates, this reveals just when the New Diggings as they were called were found, where they were being made, how rich some of the diggings were, what type of diggings they were, the names of some of the prospectors who found some of the diggings or who were at the diggings and what they were taking out. There are tales of how some of the diggings were found and why some of them received the names they did. The overall purpose of this book is to give a full picture of exactly what was happening to as many different named diggings, locations, camps and towns that came up in the Northern Mines area and to give an account of events over at least a certain length of time exactly as it was reported. To determine from just where each newspaper article within this book comes from, each of the

newspaper articles used has first the date on which it appeared in the newspaper followed in parentheses by the name of the newspaper from which that particular article was obtained from *Resources of the Pacific Slope* John Ross Browne,1869
