Green Worlds of Renaissance Venice Jodi Cranston,2019-03-04 From celebrated gardens

in private villas to the paintings and sculptures that adorned palace interiors Venetians in the sixteenth century conceived of

their marine city as dotted with actual and imaginary green spaces This volume examines how and why this pastoral vision of

Venice developed Drawing on a variety of primary sources ranging from visual art to literary texts performances and urban

plans Jodi Cranston shows how Venetians lived the pastoral in urban Venice She describes how they created green spaces

and enacted pastoral situations through poetic conversations and theatrical performances in lagoon gardens discusses the

island utopias found invented and mapped in distant seas and explores the visual art that facilitated the experience of

inhabiting verdant landscapes Though the greening of Venice was relatively short lived Cranston shows how the phenomenon

had a lasting impact on how other cities including Paris and London developed their self images and how later writers and

artists understood and adapted the pastoral mode Incorporating approaches from eco criticism and anthropology Green

Worlds of Renaissance Venice greatly informs our understanding of the origins and development of the pastoral in art history
