Community based research in sport, exercise and health science Robert Schinke, Kerry McGannon, Brett Smith, 2016-01-08. Community based research has recently gained attention within the sport and exercise sciences. When seeking to understand community based research methodologies, one finds a diversity of approaches spanning a breadth of ontological views and equally diverse methodological approaches. Though little is known about community based sport, exercise and physical activity research, these foci are beginning to gain scholarly attention in part through the emerging sport for development and peace literature. This book features a conceptual introduction and eight pioneering examples of community based research from North American, European and Oceanic scholars. The topic matter reveals scholarship undertaken in relation to health, physical activity, youth, sport and elite sport, exemplifying work with mainstream and marginalized populations. This book, perhaps the first compilation of community based research relating to sport, exercise and health, will be of interest to sociologists of sport, sport and exercise psychology scholars, sport management scholars, qualitative researchers, health scholars and practitioners, sport for development organizations and research ready communities seeking to engage in localized research projects. This book was published as a special issue of *Qualitative Research in Sport, Exercise and Health*.

Rethinking Community through Transdisciplinary Research Bettina Jansen, 2019-12-31. This book offers the first interdisciplinary survey of community research in the humanities and social sciences to consider such diverse disciplines as philosophy, religious studies, anthropology, sociology, disabilities studies, linguistics, communication studies and film studies. Bringing together leading international experts, the collection of essays critically maps and explores the state of the art in community research while also developing future perspectives for a cross disciplinary rethinking of community. Pursuing such a critical transdisciplinary approach to community, the book argues can counteract reductive appropriations of the term community and instead pave the way for a novel assessment of the concept's

complexity Since community is above all a lived practice that shapes people's everyday lives the essays also suggest ways of redoing community they discuss concrete examples of community practice thereby bridging the gap between scholars and activists working in the field
