Quality Assessment and Enhancement in Higher Education in Africa Peter Neema-Abooki, 2022-12-16 This book explores quality assessment and enhancement in higher education in Africa to illustrate the need to develop quality practices in measuring effective education and continually search for permanent improvement. The book demonstrates that technological and socio-economic trends, innovations and inventions of the twenty-first century demand that additional attention be placed upon education for national, regional and international development. Since conventions for quality assessment and enhancement need to be defined and systematic structures constructed to develop quality practices, the book shows how quality in higher education within Africa has been established and advanced to provide a framework for monitoring, auditing and reviewing assessment and enhancement. Though the book considers African complexities and diversity, it incorporates global trends and utilises an international focus that enables readers to devise appropriate strategies for developing and enhancing quality and standards in higher education in both continental Africa and beyond. Illustrating why quality assessment and enhancement should be embraced in all aspects including inputs, processes, outputs and outcomes in educational settings globally, this book will be of interest to policymakers and scholars in the fields of Higher Education Quality and Global Studies, African Education, African Studies and Management and Administration, Leadership and Professional Development Studies.

Student Success Frederic W. Skoglund, Judy Ness, 2011-06-16 This book is about moving from the conceptual to practical applications that impact the day to day teaching and learning processes. Skoglund and Ness give school leaders all the tools that are necessary to change the culture of a school, improve teacher performance and elevate student achievement. Each component of the process is clearly addressed. The authors provide critical documents such as an academic mission, core commitments, instructional calendars, common assessments, data charts, error analysis forms and meeting agendas. The Continuous Improvement System differs from other improvement efforts in that it views the school as an integrated whole and not a group of parts that are to be independently addressed. This common sense approach has been welcomed by administrators and teachers alike.
