She shows how this current of thinking fed into the later eighteenth century Natural History of Man the earlier roots of which have been overlooked by many scholars Although much attention has been paid to the atheistic French materialists their link to the preceding period has been studied only partially and the current interest in what is called the Radical Enlightenment has served to obscure rather than enlighten this history By bringing out the importance of both Protestant theological debates and medical thinking in England and by following the different debates on the soul in Holland and France this book shows that attempts to find a single coherent strand of radical irreligious thought running through the early Enlightenment coming to fruition in the second half of the eighteenth century ignore the multiple channels which composed Enlightenment thinking
