Seabrooke,2018-07-05 A state s financial power is built on the effect its credit property and tax policies have on ordinary people this is the key message of Leonard Seabrooke s comparative historical investigation which turns the spotlight away from elite financial actors and toward institutions that matter for the majority of citizens Seabrooke suggests that everyday contests between social groups and the state over how the economy should work determine the legitimacy of a state s financial and fiscal system Ideally he believes such contests compel a state to intervene on behalf of people below the median income level leading the state to broaden and deepen its domestic pool of capital while increasing its influence on international finance But to do so Seabrooke asserts a state must first challenge powerful interests that benefit from the concentration of financial wealth Seabrooke s novel constructivist approach is informed by economic sociology and the work of Max Weber This book demonstrates how domestic legitimacy influences the character of international financial orders It will interest all readers concerned with how best to transform state intervention in the economy for the good of the majority

Tandon,2005-06-21 This book explains the causes of the lost decade in the Japanese economy and the series of policy mistakes which lead to a deflationary environment What will the future bring for the Japanese economy Without reforms the situation can only decline The issue is that the institutions and policies that were used to drive the Japanese miracle are still in place The book argues that Japan s crisis is thus a crisis of governance
