Schwartzwald,2022-07-19 Between the years 1815 and 1945 Europe achieved unrivaled global dominance only to see it shattered by two world wars This frenetic rise and fall was attended by immense societal change In 1815 Europe remained largely agricultural and dependent upon horsepower By 1945 the power of the atom had been unleashed Two industrial revolutions occurred in the interim the first founded upon coal iron and steam the second upon oil steel electricity and internal combustion The implications for humanity were profound This concise yet comprehensive study is divided into three sections In section one the map of Europe emerges in its modern visage as unrestrained nationalist fervor gives rise to an assemblage of new nation states In section two the continent attains global hegemony as massive industrialization fuels a mad scramble for colonial markets and raw materials In section three a cauldron of national ethnic and class hatreds spawn the rise of totalitarianism and the overthrow of European hegemony in two calamitous world wars By tracing the events and undercurrents of this vital period in European history this book offers trenchant insights for the lay reader and the student of history alike Junior High School Library Catalog H.W.
