Secrets of the Snout Frank Rosell, 2018-04-13 Dogs and humans have worked side by side for thousands of years and over the millennia we've come to depend upon our pooches as hunters protectors and faithful companions But when it comes to the extraordinary quality of man's best friend which we rely on most the winner is clear by a nose In *Secrets of the Snout* Frank Rosell blends storytelling and science as he sniffs out the myriad ways in which dogs have been trained to employ their incredible olfactory skills from sussing out cancer and narcotics to locating endangered and invasive species as well as missing persons and golf balls With 300 million receptors to our mere 5 million a dog's nose is estimated to be between 100 000 and 100 million times more sensitive than a human's No wonder then that our nasally inferior species has sought to unleash the prodigious power of canine shnozzen Rosell here takes us for a walk with a pack of superhero sniffers including Tutta a dog with a fine nose for fine wine the pet finder pooch AJ search and rescue dog Barry the hunting dog Balder the police dogs Rasko and Trixxi the warfare dog Lisa the cancer detection dog Jack Tucker who scents floating killer whale feces and even Elvis who can smell when you're ovulating With each dog Rosell turns his nose to the evolution of the unique olfactory systems involved which odors dogs detect and how they do it A celebration of how the canine sense for scents works and works for us *Secrets of the Snout* will have dog lovers trainers and researchers alike all howling with delight Exploring this most pointed of canine wonders Rosell reveals the often surprising ways in which dogs are bettering our world one nose at a time

Stuffed Animals and Pickled Heads Stephen T. Asma, 2003-05-01 The natural history museum is a place where the line between high and low culture effectively vanishes where our awe of nature our taste for the bizarre and our thirst for knowledge all blend happily together But as Stephen Asma shows in *Stuffed Animals and Pickled Heads* there is more going on in these great institutions than just smart fun Asma takes us on a wide ranging tour of natural history museums in New York and Chicago London and Paris interviewing curators scientists and exhibit designers and providing a wealth of fascinating observations We learn how the first museums were little more than high toned side shows with such garish exhibits as the pickled head of Peter the Great's lover In contrast today's museums are hot beds of serious science funding major research in such fields as anthropology and archaeology Rich in detail lucid explanation telling anecdotes and fascinating characters Asma has rendered a fascinating and credible account of how natural history museums are conceived and presented It's the kind of book that will not only engage a wide and diverse readership but it should best of all send them flocking to see how we look at nature and ourselves in those fabulous legacies of the curiosity cabinet *The Boston Herald*

Stuffed Animals & Pickled Heads Stephen T. Asma, 2001 In countless exhibits for instance the idea of the traditional human and nuclear family is evident in displays of everything from extinct
