Self and Identity Richard D. Ashmore, Lee Jussim, 1997-05-15 Self and identity have been important yet volatile notions in psychology since its formative years as a scientific discipline Recently psychologists and other social scientists have begun to develop and refine the conceptual and empirical tools for studying the complex nature of self This volume presents a critical analysis of fundamental issues in the scientific study of self and identity These chapters go much farther than merely taking stock of recent scientific progress World class social scientists from psychology sociology

and anthropology present new and contrasting perspectives on these fundamental issues Topics include the personal versus social nature of self and identity multiplicity of selves versus unity of identity and the societal cultural and historical formation and expression of selves These creative contributions provide new insights into the major issues involved in understanding self and identity As the first volume in the Rutgers Series on Self and Social Identity the book sets the stage for a productive second century of scientific analysis and heightened understanding of self and identity Scholars and advanced students in the social sciences will find this highly informative and provocative reading Dr Richard D Ashmore is a professor and Dr Lee Jussim is an associate professor in the Department of Psychology at Rutgers University New Brunswick New Jersey

Self and Identity : Fundamental Issues Richard D. Self and Identity in Modern Psychology and Indian Thought Anand C. Paranjpe, 2005-12-11 East meets West in this fascinating exploration of conceptions of personal identity in Indian philosophy and modern Euro American psychology Author Anand Paranjpe considers these two distinct traditions with regard to historical disciplinary and cultural gaps in the study of the self and in the context of such theoretical perspectives as univocalism relativism and pluralism The text includes a comparison of ideas on self as represented by two eminent thinkers Erik H Erikson for the Western view and Advaita Vedanta for the Indian

Self, Identity, and Social Movements Sheldon Stryker, Timothy Joseph Owens, Robert W. White, 2000

Multiple Perspectives on the Self in SLA Sarah Mercer, Marion Williams, 2014-02-03 Instead of viewing different perspectives on the self as competing with each other and considering one perspective on the self as being inherently better than another this book takes the view that a fuller more comprehensive picture of the self in SLA can be gained by examining and combining insights from different perspectives This original collection of papers thus attempts to

provide a thorough overview of the ways in which the self can be conceptualised in SLA contexts The editors have brought together a diverse range of theoretical perspectives on the self to allow the reader to appreciate the insights that each approach contributes to overall understandings of the self in the domain of second language acquisition and foreign language learning

The Ecology of the Self Stefan E. Hormuth,1990 Addresses the question of stability and change in our concepts of ourselves The self is described as part of an ecological system seen as a conjunction of other people environments and objects

Theology, Psychology and the Plural Self Léon Turner,2016-02-17 Is the human self singular and unified or essentially plural This book explores the seemingly disparate ways that Christian theology and the secular human sciences have approached this complex question The latter have largely embraced the idea of the plural self as an inescapable even adaptive feature of psychological life Contemporary Christian theology by contrast has largely neglected recent psychological accounts of the naturalness of self plurality and has sought to reaffirm the self's unity in opposition to those postmodern theorists who would dismantle it Through an original analysis of recent theological and secular accounts of self and personhood this book examines the extent of the intertheoretical disparity and its broader implications for theology's dialogue with the human sciences in general and psychology in particular It explains why theologians ought to take questions about the plurality of self very seriously and how they overlap with many of the central concerns of contemporary theological anthropology including the notions of relationality particularity and human sinfulness Introducing a novel psychological framework to distinguish various understandings of self disunity the author argues that contemporary theology's blanket condemnation of self multiplicity is misconceived and identifies a possible means of reconciling theological and human scientific accounts

Perspectives on Motivation Richard Dienstbier,Richard A. Dienstbier,1991-01-01 Appearing on the hundredth anniversary of the teaching of psychology at the University of Nebraska this volume represents a return to an earlier preoccupation with motivation and reflects a resurgence of interest in it Eight professionals in psychology discuss the many sides of motivation Mortimer Appley president emeritus of Clark University sees equilibrium or homeostasis as the fundamental motivational process Douglas Derryberry and Don M Tucker of the University of Oregon present a broad and basic model of motivation viewing it as a product of the evolution and neural architecture of the human brain Carole S Dweck of Columbia University approaches personality development through motivational concepts in particular goals related to self image Bernard Weiner of the University of California Los Angeles discusses the importance of one's perception of control over the causes of a situation or problem and over its management or solution Albert Bandura of Stanford University is concerned with short and long term goals as they are affected by emotional states and a sense of self efficacy Similarly Edward L Deci and Richard M Ryan of the University of Rochester consider the bearing of self determination on motivation and achievement

Extending Self-Esteem Theory and Research Timothy J. Owens,Sheldon Stryker,Norman Goodman,2006-11-02 Self esteem is an academic and popular phenomenon vigorously

researched and debated sometimes imbued with magical qualities other times vilified as the bane of the West's preoccupation with self. Though thousands of articles have been devoted to the topic and bookshops work to feed the public's appetite for advice on revealing, enhancing and maintaining self-esteem, conflicting claims and findings have placed the field in disarray. In a very real sense, self-esteem is a victim of its own popularity. This book seeks to add clarity to a concept earlier examined by such notable self-theorists as Morris Rosenberg but eminently worthy of re-examination and extension. We do this by asking some leading thinkers on self-esteem theory, measurement and application to assess what we know about self-esteem and link it to important aspects of society and the human experience. **The Psychology of the Social Self** Tom R. Tyler, Roderick M. Kramer, Oliver P. John, 2014-04-04. Leading theoreticians and researchers present current thinking about the role played by group memberships in people's sense of who they are and what they are worth. The chapters build on the assumption developed out of social identity theory that people create a social self that both defines them and shapes their attitudes and behaviors. The authors address new developments in the theoretical frameworks through which we understand the social self, recent research on the nature of the social self and recent findings about the influence of social context upon the development and maintenance of the social self. **Imagery and the Threatened Self** Lusia Stopa, 2009-06-02. Imagery and the Threatened Self considers the role that images of the self play in a number of common mental health problems and how these images can be used to help sufferers to recover from mental health problems. **Motivation, Language Identity and the L2 Self** Zoltán Dörnyei, Ema Ushioda, 2009-01-12. Due to its theoretical and educational significance within the language learning process, the study of L2 motivation has been an important area of second language acquisition research for several decades. Over the last few years, L2 motivation research has taken an exciting new turn by focusing increasingly on the language learner's situated identity and various self-perceptions. As a result, the concept of L2 motivation is currently in the process of being radically reconceptualised and re-theorised in the context of contemporary notions of self and identity. With contributions by leading European, North American and Asian scholars, this volume brings together the first comprehensive anthology of key conceptual and empirical papers that mark this important paradigmatic shift. **Identity in Modern Society** Bernd Simon, 2008-04-15. This book is a social psychological inquiry into identity in modern society. Starts from the social psychological premise that identity results from interaction in the social world. Reviews and integrates the most influential strands of contemporary social psychology research on identity. Brings together North American and European perspectives on social psychology. Incorporates insights from philosophy, cognitive neuroscience, psychology, cultural studies, anthropology and sociology. Places social identity research in a variety of real-life social contexts. **In Search of Self** J. Wentzel van Huyssteen, Erik P. Wiebe, 2011-04-29. Includes bibliographical references and indexes. **Handbook of Identity Theory and Research** Seth J. Schwartz, Koen Luyckx, Vivian L. Vignoles, 2011-06-22. Identity is one of the most extensively studied constructs in the social sciences. Yet despite the wealth of findings across many disciplines

identity researchers remain divided over such enduring fundamental questions as What exactly is identity and how do identity processes function Do people have a single identity or multiple identities Is identity individually or collectively oriented Personally or socially constructed Stable or constantly in flux The Handbook of Identity Theory and Research offers the rare opportunity to address the questions and reconcile these seeming contradictions bringing unity and clarity to a diverse and fragmented literature This exhaustive reference work emphasizes the depth and complexity of identity processes and domains and presents perspectives from many different theoretical schools and empirical approaches Contributing authors provide perspectives from psychology e g narrative social identity theory neo Eriksonian and from other disciplines e g sociology political science ethnic studies and the editors highlight the links between chapters that provide complementary insights on related subjects In addition to covering identity processes and categories that are well known to the field the Handbook tackles many emerging issues including Identity development among adopted persons Identity processes in interpersonal relationships Effects of globalization on cultural identity Transgender experience and identity Consumer identity and shopping behavior Social identity processes in xenophobia and genocide The Handbook of Identity Theory and Research lends itself to a wealth of uses by scholars clinicians and graduate students across many disciplines including social developmental and child school psychology human development and family studies sociology cultural anthropology gender ethnic and communication studies education and counseling

Handbook of the Sociology of Emotions Jan Stets, Jonathan H. Turner, 2007-02-25 For almost thirty years sociologists have increasingly theorized about and conducted research on human emotions Surprisingly it was not until the 1970s that the sociology of emotions emerged as a coherent field of inquiry What makes this late date surprising is that it is now obvious that human behavior interaction and organization are driven by emotions It was an immense oversight for emotions to be de emphasized in sociological theorizing and research for most of its 175 year history Since the 1970s however the study of emotions has accelerated and is now at the forefront of sociological analysis This book is designed to bring the reader up to date on the theory and research traditions that have proliferated in the analysis of human emotions Key figures who have carried the sociology of emotions to its current level of prominence review their own work and the work of others who have made contributions to a particular approach to the study of emotions The outcome is a comprehensive book that serves as a primer on the cutting edge of sociological work in what is obviously a key dynamic in human affairs The first section of the book addresses the range of emotions and how they can be classified the neurological underpinnings of emotions and the effect of gender on emotions The second section reviews the prominent sociological theories of emotions including theories emphasizing power and status rituals identity and self psychoanalytic dynamics exchange expectation states and evolution While there is little integration among these theories this state of affairs will not last forever The third section addresses theory and research on specific emotions such as love jealousy and envy empathy sympathy anger grief and the moral emotions While this list does not exhaust the range of human feeling they are

central emotions that drive human behavior interaction and social organization The last section explores how the study of emotions has added new insight into other subfields within sociology such as the study of the workplace health and social movements These chapters illustrate how the sociology of emotions can provide new research and theory for the large numbers of specialties within sociology Although no book can completely cover a field even a relatively new one like the sociology of emotions this Handbook of the Sociology of Emotions comes close to being comprehensive The reader will come away with a greater appreciation for how far the sociology of emotions has developed and prospered over the last thirty years
