Louise Bourgeois Rainer Crone, Petrus Schaesberg (greve), 1998 Louise Bourgeois The Secret of the Cells is the first publication to present an introduction to the stylistic diversity and scope of Bourgeois work within the context of 20th century sculpture This volume focuses on her installations which she calls cells For the first time all 27 cells a cycle which Bourgeois has now declared complete are depicted in both full page and detailed illustrations as well as being catalogued according to their component parts The comprehensive narrative on Louise Bourgeois fascinating life the most detailed and extensive to date is documented in over 100 photographs from the artist's own archive many of which have never been published before These range from her youth in Paris her student years at the art academy under Ferdinand Leger and her experiences with the leading artists of the New York School in the 40s and 50s up to her famous performance The Confrontation in 1978 In 1982 the Museum of Modern Art honored Bourgeois in a grand retrospective of her work in 1992 her installation Precious Liquids caused an international sensation at documenta IX Her radical re evaluation of the medium of sculpture particularly evident in her unusual and unparalleled work of the last 10 years calls for a thorough review of art in modern times

Louise Bourgeois' Spider Mieke Bal, 2001-06-29 The sculptor Louise Bourgeois is best known for her monumental abstract sculptures one of the most striking of which is the installation Spider 1997 Too vast in scale to be viewed all at once this elusive structure resists simple narration It fits both no genre and all of them architecture sculpture installation Its contents and associations evoke social issues without being reducible to any one of them Here literary critic and theorist Mieke Bal presents the work as a theoretical object one that can teach us how to think speak and write about art Known for her commentary on the issue of temporality in art Bal argues that art must be understood in relationship to the present time of viewing as opposed to the less immediate contexts of what has preceded the viewing such as the historical past of influences and art movements biography and interpretation In ten short chapters or takes Bal demonstrates that the closer the engagement with the work of art the more adequate the result of the analysis She also confronts issues of biography and autobiography key themes in Bourgeois's work and evaluates the consequences of ahistorical experiences for art criticism drawing on diverse sources such as Bernini and Benjamin Homer and Eisenstein This short beautiful book offers both a theoretical model for analyzing art out of context and a meditation on a key work by one of the most engaging artists of our era

The Inhabitable Flesh of Architecture Marcos Cruz, 2017-03-02 Today's architecture has failed the body with its long heritage of purity of form and aesthetic of cleanliness A resurgence of interest in flesh especially in art has led to a politics of abjection completely changing traditional aesthetics and is now giving light to an alternative discussion about the body in architecture This book is dedicated to a future vision of the body in architecture questioning the contemporary relationship between our Human Flesh and the changing Architectural Flesh Through the analysis and design of a variety of buildings and projects Flesh is proposed as a concept that extends the meaning of skin one of architecture's most fundamental metaphors It seeks to challenge a common misunderstanding of skin as a flat and thin surface In a time when a pervasive discourse about the impact of digital technologies risks turning the architectural skin ever more disembodied this book argues for a thick embodied flesh by exploring architectural interfaces that are truly inhabitable Different concepts of Flesh are investigated not only concerning the architectural and aesthetic but also the biological aspects The latter is materialised in form of Synthetic Neoplasms which are proposed as new semi living entities rather than more commonly derived from scaled up analogies between biological systems and larger scale architectural constructs These neoplastic creations are identified as partly designed object and partly living material in which the line between the

natural and the artificial is progressively blurred Hybrid technologies and interdisciplinary work methodologies are thus required and lead to a revision of our current architectural practice
