John F. Pane,2006 Hurricane Katrina was the most costly and devastating natural disaster in U S history It and Hurricane Rita combined left the Gulf region with tremendous challenges for recovery and the need to rebuild infrastructure and reestablish services This report focuses on the displacement of approximately 200 000 public school students in Louisiana To help guide educators and policymakers in their ongoing responses to this disaster and in their preparations for future events this technical report documents many of the short term effects of the movements of students caused by the storms Focusing on the Louisiana public school system it explores the experiences of displaced students during the first academic year following the hurricanes their movements among schools the durations of enrollments at each site time out of school and the number and characteristics of students fitting each of four patterns of movement It also reports on the effects of the displacement on schools and their students and policies adopted in response to serving displaced students Using Louisiana s student data system we obtained information about all students in the state who entered or exited a public school at any time during the 2005 06 school year because of the hurricanes and we surveyed principals from a stratified sample of schools serving displaced students statewide The student displacement due to Hurricanes Katrina and Rita persisted throughout the entire 2005 06 school year 55 percent of the displaced students ended the school year outside their original schools The students who remained displaced were disproportionately minority students and students who had been achieving poorly prior to the storms But even among those students who have returned to their original schools a substantial amount of schooling was lost and the effects of the storms linger Principals reported that displaced students both those who have returned to their original schools and those who have enrolled elsewhere in the state exhibited several common symptoms of trauma In some schools the displaced students were more likely than others to engage in fighting arguing bullying eating or playing in isolation and violating school rules they were less likely to engage in school clubs activities social events or sports teams Principals also frequently reported that displaced students were more likely than preexisting students to need mental health counseling Schools throughout the state and the nation will continue to be called on to serve displaced students and it is imperative that they obtain the resources they need to serve them well Policies and resources to help teachers manage their own hurricane related problems and mental health needs might ultimately improve the services teachers provide to students Finally education officials at both the state and local levels would benefit from better access to complete and accurate student records and a national system to coordinate two way sharing of student information across state boundaries

Brown Associate Director, 2006-10-16 The pivotal era of Reconstruction has inspired an outstanding historical literature In the half century after W E B DuBois published Black Reconstruction in America 1935 a host of thoughtful and energetic authors helped to dismantle racist stereotypes about the aftermath of emancipation and Union victory in the Civil War The resolution of long running interpretive debates shifted the issues at stake in Reconstruction scholarship but the topic has remained a vital venue for original exploration of the American past In Reconstructions New Perspectives on the Postbellum United States eight rising historians survey the latest generation of work and point to promising directions for future research They show that the field is opening out to address a wider range of adjustments to the experiences and effects of Civil War Increased interest in cultural history now enriches understandings traditionally centered on social and political history Attention to gender has joined a focus on labor as a powerful strategy for analyzing negotiations over private and public authority The contributors suggest that Reconstruction historiography might further thrive by strengthening connections to such subjects as western history legal history and diplomatic history and by redefining the chronological boundaries of the postwar period The essays provide more than a variety of attractive vantage points for fresh examination of a major phase of American history By identifying the most exciting recent approaches to a theme previously studied so ably the collection illuminates the creative process in scholarly historical literature     *Juvenile Justice: A Social, Historical, and Legal Perspective* Preston Elrod, R.
