The Highly Sensitive Person in Love Elaine N. Aron, Ph.D., 2009-11-04 Do you fall in love hard but fear intimacy? Are you sick of being told that you are too sensitive? Do you struggle to respect a less sensitive partner? Or have you given up on love, afraid of being too sensitive or shy to endure its wounds? Statistics show that 50 percent of what determines divorce is genetic temperament. And if you are one of the 20 percent of people who are born highly sensitive, the risk of an unhappy relationship is especially high. Your finely tuned nervous system, which picks up on subtleties and reflects deeply, would be a romantic asset if both you and your partner understood you better. But without that understanding, your sensitivity is likely to be making your close relationships painful and complicated. Based on Elaine N. Aron's groundbreaking research on temperament and intimacy, *The Highly Sensitive Person in Love* offers practical help for highly sensitive people seeking happier, healthier romantic relationships. From low stress fighting to sensitive sexuality, the book offers a wealth of practical advice on making the most of all personality combinations. Complete with illuminating self-tests and the results of the first survey ever done on sex and temperament, *The Highly Sensitive Person in Love* will help you discover a better way of living and loving.

Soul Mate Biology Gregor Majdic, 2021-02-26 Love one of the most profound of human emotions, love that accompanies us from puberty to old age, love that follows us from ancient times to modern from ancient writings through the Bible and the texts of medieval scribes to modern day books and movies. Through the millennia, love has lost none of its secrecy, charm, attractiveness, craziness even in this digital age when we are overwhelmed by information. But what is love? Where does this emotion originate? Are we humans the only living beings feeling this emotion? Can love be explained by some chemical reactions in our brains? Is love just a trick of nature or is love some kind of higher feeling? We do not have definite answers to any of these questions; nevertheless, neuroscience, behavioral science, and others have provided us with some at least partial answers. We know today a great deal more than ever before about what is happening in the brain when we are madly in love. We understand why our hearts beat faster when we see the person we love, we know why we sweat and why we feel anxious when the loved one is away from us, and we have some ideas about how feelings of attachment form in the brain. This book guides you through the complicated labyrinth of genes, molecules, and brain cells that are involved in the feelings of love, attachment, affection, and also simple sexual reproduction.
