World Christianity and Ecological Theologies Raimundo C. Barreto, Graham McGeoch, Wanderley Pereira da Rosa, 2024-10-22 World Christianity and Ecological Theologies invites scholars in religious studies and theology from different continents and contexts to a North South dialogue on environmental ethics political ecology and ecofeminism Throughout the global pandemic the connection between environmental rapacity religion and political interests has once again called scholarly attention to the important conversation on public religion and global environment related issues Acknowledging a deficit among scholars of World Christianity in addressing environmental concerns and the field s limited language for framing those concerns this book aims to bring the fields of study of World Christianity religion and ecology into a sustained conversation with the goal of expanding the theoretical horizons of these fields World Christianity and Ecological Theologies reiterates that all Christian theologies are contextual as they shape and are shaped by specific historical and cultural circumstances It aims at showcasing the ways in which the intersection of religion and ecology is approached by scholars in religious studies and theology in the Global South or by those in conversation with them in the Global North pointing to what can be generated if these bodies of scholarship are engaged as dialogue partners to investigate new patterns of religious environmentalism

Shakespeare's Ecology of Natural Resources Sophie Chiari, 2025-11-13 Sophie Chiari analyses how Shakespeare s plays and poems present the transformation of the early modern natural world through environmental shifts and ecological transformation Using a range of examples from the Sonnets Love s Labour s Lost The Tempest Hamlet and Henry V Chiari s ecopoetic study of dramatic language explores Shakespeare s response to the rise of extractive exploitation in Elizabethan and Jacobean England Chiari expands our understanding of the environment in Shakespeare beyond the so called green comedies by charting the transition from a pre capitalist world towards a commodity based society ruined by the enclosure of the commons Using examples of water systems sandscapes soil and frost alongside the production of glass and salt in Shakespeare these materials which are currently underrepresented in Shakespearean ecocriticism signal a commitment to expanding the material turn in Shakespeare studies Far from being limited to the present era this book argues that cultural hegemony and the exploitation of soil water and ice were increasingly linked in the early modern era an age of conquest and massive human depredation By interweaving ecohistoricism ecopoetics and material studies Shakespeare s Ecology of Natural Resources shows how an eco minded approach focused on the interweaving of trade territory and extractivism reveals new layers of meaning in Shakespearean poetics and drama
