Our Knowledge Of The Past:

Our Knowledge of the Past Aviezer Tucker, 2009-10-01 This book presents a philosophical analysis of the disciplines that reveal scientific knowledge of the past Aviezer Tucker argues that historiography as a scientific discipline should be considered an attempt to analyze the evidence of past events This new approach to historiography will interest philosophers historians and social scientists concerned with the methodological foundations of their disciplines **Michael Oakeshott**

and the Cambridge School on the History of Political Thought Martyn P. Thompson, 2019-05-20 This book is a critique of Cambridge School Historical Contextualism as the currently dominant mode of history of political thought drawing upon Michael Oakeshott's analysis of the logic of historical enquiry While acknowledging that the early Cambridge School work represented a considerable advance towards genuinely historical histories of political thought this work identifies two major historiographical problems that have become increasingly acute The first is general an insufficiently rigorous understanding of the key concept of pastness necessarily presupposed in historical enquiry of all kinds The second is specific to histories of political thought a failure to do justice to the varieties of past political thinking especially differences between ideology and philosophy In addressing these problems the author offers a comprehensive account of the history of political thought that establishes the parameters not just of histories of ideological thinking but also of the much disputed character of histories of political philosophy Since rethinking history of political thought in Oakeshottian terms requires resisting current pressures to turn history into the servant of currently felt needs the book offers a sustained defence of the cultural value of modernist historical enquiry against its opponents An important work for political theorists historians of political thought and those researching intellectual history the philosophy of history and proposed new directions in contemporary historical studies

How Physics Makes Us Free J. T. Ismael, 2016-02-03 J T Ismael's book will be the first to truly examine the question of what physics actually tell us about whether or not we are free to act Her conclusions are surprising and engaging and importantly show that physics does actually not say that we are not free *The Truth of History* C. Behan McCullagh, 2002-11 Modern relativism and postmodern thought in culture and language challenge the truth of history This book considers how historians confined by argument of their own cultures can still discover truths about the past An Examination of Sir William Hamilton's Philosophy John Stuart Mill, 1979-12-15 An Examination of Sir William Hamilton's Philosophy first published in 1865 with a second edition in the same year and third and fourth editions in 1867 and 1872 has long been out of print The Examination was for his contemporaries a most significant and popular work presenting an extended treatment of some matters central to empiricism that found little space in Mill's Logic the best known being his treatment of matter and mind from a psychological viewpoint Appearing just before his successful parliamentary candidature the Examination with its deliberate and explicit onslaught on the intuitionists who were in Mill's view allied with anti progressive political and religious forces brought his beliefs into the public arena in a new way Some of those who supported

him politically found themselves viciously attacked because they had associated themselves with one who assailed settled religious beliefs Other religionists who rejected many of Mill's attitudes strongly expressed their admiration of the Examination because of its exposure to what they with him saw as dangerous theological and moral positions Alan Ryan's analytical and historical introduction dwells on the most significant philosophical elements in the work placing them in perspective and showing their relations to other aspects of Mill's thought The textual introduction by John M Robson examines the treatise in context of Mill's life in the 1860s outlines its composition and discusses among other matters the importance of the extensive revisions Mill made mostly in response to critics These revisions appear in full in the textual apparatus Also provided are a bibliographical index which gives a guide to the literature on the subject and a collation of Mill's quotations an analytical index and appendices giving the reading of manuscript fragments and listing textual emendations

Lost Causes Jason B. Jones, 2006 What if we didn't always historicize when we read Victorian fiction Lost Causes shows that Victorian writers frequently appear to have a more supple and interesting understanding of the relationship between history causality and narrative than the one typically offered by readers who are burdened by the new historicism As a return to these writers emphasizes the press of modern historicism deforms Victorian novels encouraging us to read deviations from strict historical accuracy as ideological bad faith By contrast Jason B Jones argues through readings of works ranging from The French Revolution to Middlemarch that literature's engagement with history has to be read otherwise Perhaps perversely Lost Causes suggests simultaneously that psychoanalysis speaks pressingly to the vexed relationship between history and narrative and that the theory is neither a nor anti historical Through his readings of Victorian fiction addressing the recent

past Jones finds in psychoanalysis not a set of truths but rather a method for rhetorical reading ultimately revealing how its troubled account of psychic causality can help us follow literary language's representation of the real Victorian narratives of the recent past and psychoanalytic interpretation share a fascination with effects that persist despite baffling inexplicable or absent causes In chapters focusing on Thomas Carlyle Charles Dickens Charlotte Bront and George Eliot *Lost Causes* demonstrates that history can carry an ontological as well as an epistemological charge one that suggests a condition of being in the world as well as a way of knowing the world as it really is From this point of view Victorian fiction that addresses the recent past is not a failed realism as it is so frequently claimed but rather an exploration of possibility in history

Thought and Reality Michael Dummett, 2006-10-05 In this short lucid rich book Michael Dummett sets out his views about some of the deepest questions in philosophy The fundamental question of metaphysics is what does reality consist of To answer this Dummett holds it is necessary to say what kinds of fact obtain and what constitutes their holding good Facts correspond with true propositions or true thoughts when we know which propositions or thoughts in general are true we shall know what facts there are in general Dummett considers the relation between metaphysics our conception of the constitution of reality and semantics the theory that explains how statements are determined as true or as false in terms of their composition out of their constituent expressions He investigates the two concepts on which the bridge that connects semantics to metaphysics rests meaning and truth and the role of justification in a theory of meaning He then examines the special semantic and metaphysical issues that arise with relation to time and tense On this basis Dummett puts forward his controversial view of reality as indeterminate there may be no fact of the matter about whether an object does or does not have a given property We have to relinquish our deep held realist understanding of language the illusion that we know what it is for any proposition that we can frame to be true independently of our having any means of recognizing its truth and accept that truth depends on our capacity to apprehend it Dummett concludes with a chapter about God

Encyclopedia of the Mind Harold Pashler, 2012-12-10 It's hard to conceive of a topic of more broad and personal interest than the study of the mind In addition to its traditional investigation by the disciplines of psychology psychiatry and neuroscience the mind has also been a focus of study in the fields of philosophy economics anthropology linguistics computer science molecular biology education and literature In all these approaches there is an almost universal fascination with how the mind works and how it affects our lives and our behavior Studies of the mind and brain have crossed many exciting thresholds in recent years and the study of mind now represents a thoroughly cross disciplinary effort Researchers from a wide range of disciplines seek answers to such questions as What is mind How does it operate What is consciousness This encyclopedia brings together scholars from the entire range of mind related academic disciplines from across the arts and humanities social sciences life sciences and computer science and engineering to explore the multidimensional nature of the

human mind **The New World History** Ross E. Dunn, Laura J. Mitchell, Kerry Ward, 2016-08-23 The New World History is a comprehensive volume of essays selected to enrich world history teaching and scholarship in this rapidly expanding field. The forty-four articles in this book take stock of the history evolving literature and current trajectories of new world history. These essays together with the editors' introductions to thematic chapters encourage educators and students to reflect critically on the development of the field and to explore concepts, approaches, and insights valuable to their own work. The selections are organized in ten chapters that survey the history of the movement, the seminal ideas of founding thinkers, and today's practitioners changing concepts of world historical space and time, comparative methods, environmental history, the big history movement, globalization, debates over the meaning of Western power, and ongoing questions about the intellectual premises and assumptions that have shaped the field. Proceedings of the Aristotelian Society for the Systematic Study of Philosophy Aristotelian Society (Great Britain), 1917 Includes Report of the executive committee for 1887-88, 1914-15, list of members in each volume. *The baptist Magazine*, 1866 **Question and Insight in Everyday Life** Richard Grallo, 2021-12-27 In *Question and Insight in Everyday Life: A Blueprint for Transformative Problem Solving*, Richard Grallo examines the nature and patterns of human problem solving. Grallo identifies four patterns of problem solving that together result in complex human learning and growth. The four patterns constitute a cycle that is transformative not only of problematic situations but of the problem solvers themselves. This book also explores the roles of questions, insights, the desire to know, and social trust in problem solving. Its conclusions apply equally to the problems of everyday life as well as to challenges that arise in educational counseling, political engineering, and science fields. **The Human Experience of Time** Charles M. Sherover, 2001 First published in 1975 and still without equal, *The Human Experience of Time* provides a thorough review of the concept of time in the Western philosophic tradition. Encompassing a wide range of writings from the Book of Genesis and the classical thinkers to the work of such twentieth-century philosophers as Collingwood and McKeon, all with introductory essays by the editor, this classic anthology offers a synoptic view of the changing philosophic notions of time. *Language and Ontology* Kanti Lal Das, Anirban Mukherjee, 2008 The book highlights the concept of ontology, relationship between language and ontology, the distinction between ontology and reality, the role of linguistic philosophers in dealing with ontology, etc. Apart from these, the eminent scholars address themselves with the ontology behind the value of valuation, exclusion, and discrimination, inter-religious dialogue, Indian theories of language, values in cinema, poetic language, etc. Ultimate Questions Bryan Magee, 2017-09-26 How to live meaningfully in the face of the unknowable? We human beings had no say in existing; we just opened our eyes and found ourselves here. We have a fundamental need to understand who we are and the world we live in. Reason takes us a long way, but mystery remains. When our minds and senses are baffled, faith can seem justified, but faith is not knowledge. In *Ultimate Questions*, acclaimed philosopher Bryan Magee provocatively argues that we have no way of fathoming our own natures or finding definitive answers to the big questions we all face. With

eloquence and grace Magee urges us to be the mapmakers of what is intelligible and to identify the boundaries of meaningfulness He traces this tradition of thought to his chief philosophical mentors Locke Hume Kant and Schopenhauer and shows why this approach to the enigma of existence can enrich our lives and transform our understanding of the human predicament As Magee puts it There is a world of difference between being lost in the daylight and being lost in the dark The crowning achievement to a distinguished philosophical career *Ultimate Questions* is a deeply personal meditation on the meaning of life and the ways we should live and face death
