Presuppositions And Pronouns:

Presuppositions and Pronouns Bart Geurts,1999 In this volume Geurts takes discourse representation theory DRT and turns it into a unified account of anaphora and presupposition which he applies not only to the standard problem cases but also to the interpretation of modal expressions attitude reports and proper names The resulting theory for all its simplicity is without doubt the most comprehensive of its kind to date The central idea underlying Geurts binding theory of presupposition is that anaphora is just a special case of presupposition projection But this is only one of the ways in which the concept of presupposition is taken beyond its traditional limits Geurts shows furthermore that presupposition projection is crucially involved in several phenomena that are not usually viewed in presuppositional terms such as modal subordination de re readings of attitude reports and rigid designation While making his case for DRT and the binding theory Geurts also presents an incisive analysis of what is probably still the most influential account of presupposition viz the satisfaction theory demonstrating that there are fundamental problems not only with this theory but with the very framework in which it is couched

Gender Presuppositions of Pronouns Liat Regev,2013 Presuppositions and Discourse Rainer Bäuerle,U. Reyle,Thomas Ede Zimmermann,2010 Undoubtedly presupposition theory is a major chapter in the success story of dynamic semantics This book features papers on this topic based on a conference on Presupposition convened in Stuttgart in October 2000

Experimental Perspectives on Presuppositions Florian Schwarz,2014-09-12 This volume brings together some of the most recent developments in the field of experimental pragmatics specifically empirical approaches to theoretical issues in presupposition theory It includes studies of the online processing of presupposed content investigations of the interpretive properties of presuppositions in various linguistic contexts comparative perspectives relative to other aspects of meaning such as asserted content and implicatures cross linguistic comparisons of presupposition triggers and perspectives from language acquisition Taken together these novel contributions provide a snapshot of state of the art developments in this area and will serve as a point of reference for numerous emerging avenues of future work It makes for an ideal set of readings for advanced university courses on experimental studies of meaning and is a must read for anyone interested in experimental research on meaning in natural language

Presuppositions and Cognitive Processes Filippo Domaneschi,2016-07-29 This book breaks new ground towards an understanding of the mental processes involved in presupposition the comprehension of information taken for granted Various psycholinguistic experiments are discussed to support the idea that involved in ordinary language comprehension are complex and demanding cognitive processes The author demonstrates that these processes exist not only at the explicit level of an utterance but also at a deeper level of computing where the background information taken for granted as already known and shared between interlocutors is processed The author shows that experimental research can suggest new theoretical models for presupposition thus this book will be of interest to researchers and students of psycholinguistics the philosophy of language and experimental

pragmatics **Semantic and Pragmatic Issues in Discourse and Dialogue** Myriam Bras, Laure Vieu, 2021-10-01 This volume addresses contemporary issues in the semantics and the pragmatics of discourse and dialogue. Collected papers aim at providing insights on different theoretical approaches all of them in the dynamic semantics tradition such as Dynamic Predicate Logic DPL Discourse Representation Theory DRT and Segmented Discourse Representation Theory SDRT. They reflect the current move of formal semantics from short multisentential texts towards structured discourses and dialogues accounting for more and more phenomena at the semantics pragmatics interface such as subtleties of anaphora and presupposition the role of temporal connectives in discourse or the establishment of common references in dialogue.

Phi-features and the Modular Architecture of Language Milan Rezac, 2010-11-12 This monograph investigates the modular architecture of language through the nature of uninterpretable phi features person number gender and Case. It provides new tools and evidence for the modular architecture of the human language faculty a foundational topic of linguistic research. At the same time it develops a new theory for one of the core issues posed by the Minimalist Program the relationship of syntax to its interfaces and the nature of uninterpretable features. The work sets out to establish a new cross linguistic phenomenon to study the foregoing person governed last resort repairs which provides new insights into the nature of ergative accusative Case and of Case licensing itself. This is the first monograph that explicitly addresses the syntactic vs morphological status of uninterpretable phi features and their relationship to interface systems in a similar way drawing on person based interactions among arguments as key data base.

The Routledge Handbook of Pragmatics Anne Barron, Yueguo Gu, Gerard Steen, 2017-01-20 The Routledge Handbook of Pragmatics provides a state of the art overview of the wide breadth of research in pragmatics. An introductory section outlines a brief history the main issues and key approaches and perspectives in the field followed by a thought provoking introductory chapter on interdisciplinarity by Jacob L. Mey. A further thirty eight chapters cover both traditional and newer areas of pragmatic research divided into four sections: Methods and modalities Established fields Pragmatics across disciplines Applications of pragmatic research in today's world. With accessible refreshing descriptions and discussions and with a look towards future directions this Handbook is an essential resource for advanced undergraduates postgraduates and researchers in pragmatics within English language and linguistics and communication studies.

The Impact of Pronominal Form on Interpretation Patrick Grosz, Pritty Patel-Grosz, 2016-04-11 The interplay between the interpretation of pronouns e.g. bound referential and their form e.g. null overt is still ill understood. This volume has a cross linguistic orientation with in depth investigations of more than 10 different languages. It unites researchers from the linguistic subfields of syntax semantics and psycholinguistics thus furthering dialogue with the goal of shedding new light on the form interpretation connection.

Modeling and Using Context Patrick Blackburn, Chiara Ghidini, Roy M. Turner, Fausto Giunchiglia, 2007-10-13 The refereed proceedings of the 4th International and Interdisciplinary Conference on Modeling and Using Context CONTEXT 2003 held in Stanford CA USA in

June 2003 The 31 full papers and 15 short papers presented were carefully reviewed selected and revised for inclusion in the book The papers presented deal with the interdisciplinary topic of modeling and using context from various points of view ranging through cognitive science formal logic artificial intelligence computational intelligence philosophical and psychological aspects and information processing Highly general philosophical and theoretical issues are complemented by specific applications in various fields

Asymmetries between Language Production and Comprehension Petra Hendriks, 2013-07-31 This book asserts that language is a signaling system rather than a code based in part on such research as the finding that 5 year old English and Dutch children use pronouns correctly in their own utterances but often fail to interpret these forms correctly when used by someone else Emphasizing the unique and sometimes competing demands of listener and speaker the author examines resulting asymmetries between production and comprehension The text offers examples of the interpretation of word order and pronouns by listeners and word order freezing and referential choice by speakers It is explored why the usual symmetry breaks down in children but also sometimes in adults Gathering contemporary insights from theoretical linguistic research psycholinguistic studies and computational modeling *Asymmetries between Language Production and Comprehension* presents a unified explanation of this phenomenon Through a lucid comprehensive review of acquisition studies on reference related phenomena Petra Hendriks builds a striking case for the pervasiveness of asymmetries in comprehension production In her view listeners systematically misunderstand what they hear and speakers systematically fail to prevent such misunderstandings She argues that linguistic theory should take stock of current psycholinguistic and developmental evidence on optionality and ambiguity and recognize language as a signaling system The arguments are compelling yet controversial grammar does not specify a one to one correspondence between form and meaning and the demands of the mapping task differ for listeners and speakers Her proposal is formalized within optimality theory but researchers working outside this framework will still find it of great interest In the language as code vs language as signal debate Hendriks puts the ball firmly in the other court Ana Perez Leroux University of Toronto Canada

Descriptions and Beyond Marga Reimer, Anne Bezuidenhout, 2004-07-22 In 1905 Bertrand Russell published *On Denoting* in which he proposed and defended a quantificational account of definite descriptions Forty five years later in *On Referring* Peter Strawson claimed that Russell was mistaken definite descriptions do not function as quantifiers but paradigmatically as referring expressions Ever since scores of theorists have attempted to adjudicate this debate Others have gone beyond the question of the proper analysis of definite descriptions focusing instead on the complex relations between definites indefinites and pronouns These relations are often examined with attention to the phenomena of scope and anaphora This collection assembles nineteen new papers on definite descriptions and related topics The contributors include both philosophers and linguists many of whom have been active participants in the various debates concerning descriptions The volume contains a brief general introduction and is divided into six sections each of which is accompanied by a detailed

introduction of its own Several of the sections concern issues associated with the Russell Strawson debate These include the sections on incomplete descriptions the referential attributive distinction and presupposition and truth value gaps There is also a section on the representation of definites and indefinites in semantic theory containing papers that reject certain core assumptions of the Russellian paradigm Linguists interested in definites have traditionally been concerned with how such expressions interact with other expressions including pronouns and indefinites They have explored and continue to explore these interactions through the complex phenomena of scope and anaphora In the section dealing with anaphoric pronouns and descriptions indefinites and dynamic syntax semantics five linguists propose and defend their views on these and related issues Finally there is a section that concerns the relation between proper names and descriptions and more particularly the idea that some names those introduced into the language by description are semantically equivalent to definite descriptions

Pronouns D. N. Shankara Bhat, 2004 On the basis of a cross linguistic study of over 250 languages this book brings to light several fascinating characteristics of pronouns It argues that these words do not form a single category but rather two different categories called personal pronouns and proforms It points out several differences between the two such as the occurrence of a dual structure among proforms but not among personal pronouns These differences are shown to derive from the distinct functions that the two categories have to perform in language The book also shows that the so called interrogative pronouns o

Computing Meaning H. Bunt, Reinhard Muskens, E. Thijsse, 2012-12-06 This book is a collection of papers written by outstanding researchers in the newly emerging field of computational semantics Computational semantics is concerned with the computation of the meanings of linguistic objects such as text fragments spoken dialogue utterances and e mail messages The meaning of such an object is determined partly by linguistic information and partly by information from the context in which the object occurs The information from these sources is combined by processes that infer which interpretation of the object applies in the given context This applies not only to notoriously difficult aspects of interpreting linguistic objects such as indexicals anaphora and metonymy but also to establishing the precise reference of common nouns and the scopes of noun phrases The central issue in computational semantics is how processes of finding and combining the relevant linguistic and contextual information into contextually appropriate meanings can be organised Traditional approaches of applying context information to disambiguated natural language expressions do not work well due to the massive ambiguity in natural language Recent work in computational semantics suggests alternatively to represent linguistic semantic information in formal structures with underspecification and to apply context information in inference processes that result in further specification of these representations Underspecified representation and inference are therefore the key topics in this book The book is aimed at those linguists computer scientists and logicians who take an interest in the computation of meaning and who want to know what is happening in this exciting field of research *Meaning and the Dynamics of Interpretation* Hans Kamp, 2013-10-17 This selection of research papers written by Hans Kamp presents the core of his scientific research on natural language semantics and its relation to logic philosophy and linguistics Arranged in six sections the topics range from philosophical reflection on the foundational issues in the ancient Sorites Paradox with a formal account of its solution to a detailed account of presuppositions in dynamic semantics Ranking among the philosophers with great and lasting influence on formal semantics Hans Kamp contributed early foundational research to core theoretical topics like temporal reference

and vagueness then pushed the boundaries of the discipline in new and productive directions Showing the importance of non truth functional aspects of meaning Discourse Representation Theory proved the value of a dynamic approach to interaction of text and context for our understanding of anaphora word meaning and context dependence This collection shows very clearly how Kamp has forged ground breaking connections among semantics computation and mental representation challenging the once dominant Fregean anti psychologism while demonstrating that the best theoretical research can simultaneously yield important computational applications and novel cognitive insights Barbara Partee University of Massachusetts Amherst Hans Kamp has been rewarded with the Rolf Schock Prize in 2024

The Politics of Language

David Beaver, Jason Stanley, 2025-10-28 In much of the theory of meaning philosophers and linguists have focused on the use of language in conveying information in cooperative informational exchanges As a result political uses of speech of the sort that political propaganda exemplifies have not been taken to be a central case of language use In this book Jason Stanley and David Beaver focus on the political use of speech as a central case which leads to a foundational rethinking of the theory of meaning By focusing on the political uses of speech one arrives at better and more general tools to describe speech as well as a more accurate view of its central functions More dramatically it enables us to see the ways in which virtually all speech is political a fact that is masked by much of the theory of meaning Stanley and Beaver s topic is speech generally its function and how best to represent that function Political propaganda serves as a window into that topic since its function is not obviously to share information or even misinformation They emphasize the importance of understanding how political propaganda works via the topic of the justification of free speech and argue that political propaganda poses a problem for a broad range of justifications of free speech Stanley and Beaver argue that it is not possible to compartmentalize the political aspects of speech from the non political aspects of speech nor is it possible to carve out a neutral deliberative space of evaluating reasons qua reasons Speech is invariably political
