Today's Education ,1983 Faith-Based Education That Constructs HeeKap Lee,2010-08-09 Constructivism is everywhere It is a hot issue at this time in the field of philosophy education technology and religion However can constructivism be an alternative approach in faith based education While some conclude that Jesus knew learning was an active knowledge creating process and that he always encouraged his disciples to think deeply and go beyond the surface level others would find that constructivism undercuts faith based education because of its claims to relativity For example constructivists claim that meaning is imposed on the world by us rather than existing in the world independently from us Thus they proclaim that truth is relative to particular times places and people Christians hold that truth does exist absolutely So how can there be a way forward for faith based educators who see the good in the constructivist approach In Faith Based Education that Constructs readers will find a unique approach whereby constructivism may appropriately be applied to a faith based education setting Although disagreement can occur between constructivism and faith based education this book concludes that constructivist thought and Christian faith based education are in the end congruent and harmonious in significant ways Those faith based educators who continue to hold cautionary views of radical constructivist assertions against absolute truths need not disregard all other aspects of constructivism Instructional Process and Concepts in Theory and Practice Celal Akdeniz,2016-11-22 This book offers an accessible practical and engaging guide that provides sample instructional activities supported by theoretical background information with a focus on the nature of the instructional process in relation to several variables It approaches instructional models strategies methods techniques tactics

and planning from a new perspective and shares effective tips to help readers better understand the instructional process and its theoretical elements The book addresses the following questions What is the nature of the instructional process What are the classifications of contemporary models and strategies developed within the instructional process Which groups yield the most effective methods and techniques and how can they best be practically implemented What are the instructional tactics teachers need to take into consideration in which groups are they collected and which tips can help us employ each tactic Additionally readers can adapt the book s ready to use sample activities to their own educational settings Overall this book offers an enlightening discussion on contemporary practices related to the teaching process a broad and holistic theoretical framework and an ideal reference source for all students and scholars who are interested in the educational sciences
