201 Questions to Ask Your Kids Pepper Schwartz, 2000-02-08

201 Questions to Ask Your Kids Do you have trouble talking to your kids Does a successful conversation with your child consist of one word responses or abrupt physical acknowledgments Does your son or daughter get upset at the most innocent questions Join the club Unfortunately communicating well with kids is something every parent desires but few achieve We love our children but talking to them in a meaningful manner isn't always easy The questions in this book are designed to help No matter what age or sex your children no matter how many children you have no matter how good or bad your current parent child relationship this simple game will get your family talking more And when you're talking really talking about emotions and fears and attitudes you'll be learning about each other as individuals and growing closer together as a group

An Introduction For Kids Wouldn't it be fun to find out more about what your father or mother was like when he or she was a kid Or get to tell your parents which of their friends you think looks dorkiest Wouldn't conversation be more interesting if you and your family traded unexpected questions and answers at dinner rather than just talked about what homework did or didn't get done There are a lot of great things to talk about that no one ever brings up because we usually think conversation is serious rather than a way of being playful Of course conversation should be about serious things some of the time some of the questions in this book are about very serious topics But other times questions should be asked just to create new ways to think about things look back on our lives or imagine what life would be like if we could design in any way we wanted In fact I wrote this book because I think talking can be terrific fun and even talking to your parents and brothers or sisters can be a kind of great game Everyone can get to know each other and laugh a lot and be amazed from time to time No one wins or loses but there is an element of surprise in finding out personal information about parents and sharing some of your ideas daydreams and opinions with them My idea is to think of some of the world's most interesting questions that parents and kids could talk about and give everyone the chance to pick the ones they'd like to hear about Each person picks a question to ask and then answers a question when his or her turn comes around All you have to do is choose from the list under 201 Questions to Ask Your Parents and ask any question you want Your parents can take as long or as short a time they want to answer Any you can all discuss the topic if you like But then they go into their section of the book and ask you questions Some of them might not be so interesting but others like asking you who is the meanest kid you know might be cool to think about and share with them They'll learn a lot about what you think are ways kids act nasty You can wiggle out of any two questions that don't interest you or are embarrassing but no more than that It's good if a question makes you squirm a little that means you either haven't thought about it before or you have but you haven't wanted to deal with it But why not try out and answer Pick a set length of time to play for and my guess is you'll want to extend it These questions get addictive You can play them at the dinner table or after dinner or on a car trip or anytime you feel like hearing what your parents say about something So this is a book about how to

have interesting and often funny conversations with your family. It's a way to avoid dead boring silences and fill the time instead with questions and answers that everyone will enjoy thinking about. I know that in my family it is too easy for us to get stuck talking about practical things like who has to be taken where the next day. That isn't particularly fun. It doesn't let me in on what my kids are thinking and it doesn't help my two teenagers learn things that might help them understand me a little better.

All About Children – Questions Parents Ask Tony Humphreys, 2004-10-19. Being a parent is more challenging today than it's ever been. In *All About Children*, this thoroughly reliable and effective handbook, clinical psychologist Dr Tony Humphreys outlines effective ways of parenting and positive responses to difficult behaviour by children. Sometimes the task of parenting seems overwhelming. At others it provides great fulfilment and joy. It is always unpredictable; the challenges are forever changing and much of what we might have learned from our own parents seems quite irrelevant now. Parenting is not learned by instinct; it requires many complex skills. Parents have responsibility for the physical, emotional, social, sexual, behavioural, educational, creative and spiritual development of their children and at the same time they must love them unconditionally. Tony Humphreys recognises the many and varied challenges faced by parents today. In *All About Children*, he provides an invaluable resource for parents by taking the questions they most frequently ask and providing thoughtful and comprehensive answers. He begins by pointing out that in order to develop parenting skills, each parent must first understand themselves and be prepared to continually update their knowledge as the needs of their children alter as they grow older. He goes on to deal with the practical aspects of everyday parenting skills and then looks at different aspects of challenging behaviour both by children and parents. The book concludes with a chapter on learning and education, two core concerns of every parent. In a helpful question and answer format, *All About Children* provides today's parents with not only the vital information they require but also points out the skills they need to carry out their demanding task effectively.
