Worlds Colliding Rex J. Ahdar,2017-07-12 This title was first published in 2001 Worlds Colliding argues that the prevailing worldview held by those in positions of power in Western government sets the bounds for religious tolerance It explores the degree to which a modern liberal state will allow a counter cultural community the freedom to live according to its concept of the good life

Losing Our Religion? Kevin Ronald Ward,2013-10-22 Church going in most Western societies has declined significantly in the wake of the social and cultural changes that began in the 1960s Does this mean that people in these societies are losing any religious dimension in their lives or is it being expressed in other forms and places This study begins by looking at comparative data on how church going patterns have changed in five countries Britain the United States Canada Australia and New Zealand examining reasons for the decline how churches have

responded to these changes and why some churches have shown greater resilience It then explores some of the particular challenges these changes pose for the future of churches in these societies and some of the responses that have been made drawing on both sociological and theological insights The conclusion is that despite the loss of belonging believing persists and religion continues to play a significant role in these societies mediated in a variety of diffuse cultural forms Cases illustrating these changes are largely drawn from New Zealand which as the country most recently settled by Europeans has always been secular and thus provides helpful insights
