Religion In Practice:

Lived Religion Meredith B McGuire, 2008-08-22 The divergence of religious practices from one individual to another has long baffled scholars of contemporary religion whose research often assumes that individuals commit or refuse to commit to an entire institutionally defined package of beliefs and practices Social surveys typically ask respondents to self identify by denominational or other broad religious categories Sociologists attempt to measure religiosity according to how well individuals conform to the official religious standards such as frequency of church attendance scripture reading or prayer In this book Meredith McGuire points the way forward to a new way of understanding and studying religious behavior Rather than try to fit people into prearranged packages she argues scholars must begin to study religion as it is actually lived and experienced in people s everyday lives Religions in Practice John R. Bowen, 2011 Religions in Practice John Richard Bowen, 1998 *What Happens When We Practice Religion?* Robert Wuthnow, 2020-05-19 An exploration of the interdisciplinary methods used to understand religious practice Religion is commonly viewed as something that people practice whether in the presence of others or alone But what do we mean exactly by practice What approaches help to answer this question What Happens When We Practice Religion delves into the central concepts arguments and tools used to understand religion today Throughout the past few decades the study of religion has shifted away from essentialist arguments that grandly purport to explain what religion is and why it exists Instead using methods from anthropology psychology religious studies and sociology scholars now focus on what people do and say their daily religious habits routines improvisations and adaptations Robert Wuthnow shows how four intersecting areas of inquiry situations intentions feelings and bodies shed important light on religious practice and he explores such topics as the role of religious experiences in sacred spaces gendered social relationships educational settings the arts meditation and ritual Suitable for undergraduate and graduate courses What Happens When We Practice Religion provides insights into the diverse ways that religion manifests in ordinary life Summarizes the latest theories and empirical methods of religious practice Shows how the study of religion has changed Includes chapters on theory situations intentions feelings and bodies Draws from anthropology psychology religious studies and sociology Accessible for undergraduate and graduate courses **Religious Reading** Paul J. Griffiths, 1999 In examining and analyzing these practices Griffiths develops a picture of the intellectual and moral commitments involved in being a religious person Griffiths favorably contrasts the practices and pedagogies of traditional religious cultures with those of our own fragmented and secularized culture and insists that religious reading should be preserved He concludes with the controversial proposal that the modern university should make room for traditional scholastics **BOOK JACKET Religion in Practice** Swami Prabhavananda, 1968 **Religion and the Individual** Dr Abby Day, 2013-05-28 What does religion mean to the individual How are people religious and what do their beliefs practices and identities mean to them The individual s place within studies of religion has tended to be overlooked recently in favour of

macro analyses Religion and the Individual draws together authors from around the world to explore belief practice and identity Using original case studies and other work firmly placed in the empirical contributors discuss what religious belief means to the individual They examine how people embody what religion means to them through practice considering the different meanings that people attach to religion and the social expressions of their personal understandings and the ways in which religion shapes how people see themselves in relation to others This work is cross cultural with contributions from Asia Europe and North America

Rationality in Science, Religion, and Everyday Life Mikael Stenmark, 2016-09-15 Mikael Stenmark examines four models of rationality and argues for a discussion of rationality that takes into account the function and aim of such human practices as science and religion

Religion, Spirituality and Everyday Practice Giuseppe Giordan, William H. Swatos, Jr., 2011-08-14 The current generation of young adults at least in the Western world has shown a marked tendency toward a preference for describing themselves as spiritual as contrasted to religious This book seeks to examine the possible meanings and consequences associated with this contrast in terms of the similarities and differences that affect those who use these terms with respect to the everyday practices that they themselves employ or believe should follow from being self defined as religious or spiritual or not The several chapters in this volume take up the religious spiritual contrast specifically through investigations into practice In what ways do people who claim to be religious or spiritual define these self images as manifest in their own lives How on a daily basis does a person who considers himself or herself religious or spiritual live out that self image in specific ways that she or he can describe to others even if not share with others Are there ways that being spiritual can involve religion or ways that being religious can involve spirituality and if so how do these differ from concepts in prior eras e.g. Ignatian spirituality Orthodox spirituality Anglican spirituality etc We also explore if there are institutions of spiritual practice to which those who term themselves spiritual turn or if the difference implied by these terms may instead be

between institutionalized and de institutionalized expressions of practice including but not limited to self spiritualities
