Religion The Paradigm Of Selfdeception:

Religion Kane Ray,2004 *Shifting Paradigms of Evil in Philosophy* İmge Oranlı,2025-09-29 This book develops an interdisciplinary framework rooted in philosophy for addressing the political evils experienced around the world Drawing on resources mainly from philosophy and historical studies it argues for the relationality and continuity between political evils using the Armenian Genocide and the Shoah as main examples The book begins by unpacking a series of limiting assumptions that define the philosophical study of evil These assumptions crystallize in the idea that evil is an inscrutable phenomenon what the author calls the paradigm of evil s inscrutability Tracing this paradigm through the legacies of five key philosophers Plato Augustine Kant Arendt and Levinas the author shows that by the time we arrive at 20th century the framing of political evils like the Shoah as inscrutable and exceptional is profoundly constraining it erases Shoah s continuity and connection with other atrocities including the 1915 Armenian Genocide The book next turns to practices and ideologies that connect the Armenian Genocide to the Shoah to propose an alternative paradigm for thinking about evil a paradigm of the continuity of evils Offering this paradigm to readers in philosophy and adjacent disciplines the author explores the relationality between the Armenian Genocide and the Shoah but also between Turkish genocide denialism and a contemporary case of racist evildoing against Armenians in Turkey shifting the discussion of political evil in a direction that aims to turn overlooked evils around the world into objects of philosophical thinking *Shifting Paradigms of Evil in Philosophy* will appeal to researchers and graduate students working in Continental philosophy social and political philosophy history of philosophy ethics political theory genocide studies and Holocaust studies **Personal Spirituality** Daniel J. Benor,2006 Dr Benor addresses his explorations from the standpoint of an advocate but one who is an open minded explorer neither from a religious nor a conventional medical perspective The breadth and depth of the research reports in this volume on the psychic intuitive and spiritual aspects of healing will engage even the knowledgeable reader This book is destined to take its place among the most influential and controversial in the field of claims reports and experiences of unconventional healing and spiritual awareness **The Essence of Religion** Ludwig Feuerbach,2024-05-09 The *Essence of Religion* is a philosophical work published in 1841 that critiques the nature and origins of religious belief arguing for a Darwinian historical origin for religion and a materialistic worldview In this work Feuerbach argues that religion is a product of human imagination and projection and that its true essence can only be understood by examining the human mind and its relationship to the natural world Stalin in his 1906 book *Anarchism or Socialism* discusses Feuerbach If the dialectical method originates from Hegel then the materialist theory is a development of the materialism of Feuerbach This is well known to anarchists and they try to use the shortcomings of Hegel and Feuerbach in order to denigrate the dialectical materialism of Marx and Engels With regard to Hegel and the dialectical method we have already pointed out that such tricks of the anarchists cannot prove anything other than their own ignorance The same must be said regarding their attacks on Feuerbach and materialist theory

Feuerbach was heavily influential on Marx who modeled his entire religion on Feuerbach's de-mythologization of the Hegelian dialectic. Schopenhauer and Nietzsche both took their satirical criticism about religion from Feuerbach and every aspect of Marxism can be found here in Marx's favorite philosopher. Feuerbach is a critical figure in the development of not merely Marxism but Materialistic Humanism in general. Feuerbach is critical to understanding Marx. Feuerbach's naturalistic reduction of religion parallels Durkheim's Elementary Forms yet prioritizes individual psychology over collective effervescence. His focus on dependence as religion's root contrasts with Otto's *mysterium tremendum* prioritizing material need over numinous experience. The text's proto-Darwinian narrative of religion evolving alongside human mastery of nature anticipates cognitive science of religion's focus on hyperactive agency detection. Feuerbach's emphasis on projection as adaptive mechanism aligns with Boyer's evolutionary anthropology. Ecological theorists critique Feuerbach's anthropocentrism but commend his recognition of nature's agency. His dialectic of human nature reciprocity informs contemporary posthumanist critiques of Cartesian mastery.

Religion as Make-Believe Neil Van Leeuwen, 2023-11-21

Drawing on a range of hard evidence, Neil Van Leeuwen shows that the psychological mechanisms underlying religious belief are the same as those enabling imaginative play. He argues that we should therefore understand religious belief as a form of make-believe that people use to define their group identity and express the values sacred to them.

Unfamiliar Selves in the Hebrew Bible Reed Carlson, 2022-01-19

Spirit possession is more commonly associated with late Second Temple Jewish literature and the New Testament than it is with the Hebrew Bible. In *Unfamiliar Selves in the Hebrew Bible*, however, Reed Carlson argues that possession is also depicted in this earlier literature, though rarely according to the typical western paradigm. This new approach utilizes theoretical models developed by cultural anthropologists and ethnographers of contemporary possession-practicing communities in the global south and its diasporas. Carlson demonstrates how possession in the Bible is a corporate and cultivated practice that can function as social commentary and as a means to model the moral self. The author treats a variety of spirit phenomena in the Hebrew Bible, including spirit language in the Psalms and Job, spirit empowerment in Judges and Samuel, and communal possession in the prophets. Carlson also surveys apotropaic texts and spirit myths in early Jewish literature, including the Dead Sea Scrolls. In this volume, two recent scholarly trends in biblical studies converge: investigations into notions of evil and of the self. The result is a synthesizing project useful to biblical scholars and those of early Judaism and Christianity alike.

The Poetics and Politics of the American Gothic Professor Agnieszka Soltysik Monnet, 2013-04-28

Taking as its point of departure recent insights about the performative nature of genre, *The Poetics and Politics of the American Gothic* challenges the critical tendency to accept at face value that gothic literature is mainly about fear. Instead, Agnieszka Soltysik Monnet argues that the American Gothic and gothic literature in general is also about judgment: how to judge and what happens when judgment is confronted with situations that defy its limits. Poe, Hawthorne, Melville, Gilman, and James all shared a concern with the political and ideological debates of their time.

but tended to approach these debates indirectly Thus Monnet suggests while slavery and race are not the explicit subject matter of antebellum works by Poe and Hawthorne they nevertheless permeate it through suggestive analogies and tacit references Similarly Melville Gilman and James use the gothic to explore the categories of gender and sexuality that were being renegotiated during the latter half of the century Focusing on *The Fall of the House of Usher* *The Marble Faun* *Pierre* *The Turn of the Screw* and *The Yellow Wallpaper* Monnet brings to bear minor texts by the same authors that further enrich her innovative readings of these canonical works At the same time her study persuasively argues that the Gothic's endurance and ubiquity are in large part related to its being uniquely adapted to rehearse questions about judgment and justice that continue to fascinate and disturb

Justice and Rights Michael Ipgrave, 2009-09-21 *Justice and Rights* is a record of the fifth Building Bridges seminar held in Washington DC in 2006 an annual symposium on Muslim Christian relations cosponsored by Georgetown University and the Church of England This volume examines justice and rights from Christian and Muslim perspectives a topic of immense relevance for both faiths in the modern world but also with deep roots in the core texts of both traditions Leading scholars examine three topics scriptural foundations featuring analyses of Christian and Muslim sacred texts evolving traditions exploring historical issues in both faiths with an emphasis on religious and political authority and the modern world analyzing recent and contemporary contributions from Christianity and Islam in the area of freedom and human rights

The Metaphysics of Historical Jesus Research Jonathan Rowlands, 2015-10-15 In this book Rowlands interrogates the theological and philosophical foundations of the Quest for the historical Jesus from Reimarus to the present day culminating in a call for greater metaphysical transparency and diversity in the discipline This multidisciplinary approach to historical Jesus research drawing on historiography sociology philosophy and theology makes a significant and original contribution to the field Part I outlines the implicit role of metaphysical presuppositions in historical methodology by examining the concept of an historiographical worldview Part II provides an overview of the Quest for the historical Jesus demonstrating that the disparate historiographical worldviews operative in the Quest evidence a particular shared characteristic in that they might accurately be described as secular Rowlands study concludes with a call for a greater plurality and openness regarding the philosophical and theological presuppositions at work in historical Jesus research *The Metaphysics of Historical Jesus Research* is of interest to students and scholars working on New Testament studies and historical Jesus research

Beyond Heaven and Earth Gabriel Levy, 2022-02-08 An approach to understanding religion that draws on both humanities and natural science but rejects approaches that employ simple monisms and radical dualisms In *Beyond Heaven and Earth* Gabriel Levy argues that collective religious narratives and beliefs are part of nature they are the basis for the formation of the narratives and beliefs of individuals Religion grows out of the universe but to make sense of it we have to recognize the paradox that the universe is both mental and material or neither We need both humanities and natural science approaches to study religion and religious meaning Levy contends but we must also

recognize the limits of these approaches First we must make the dominant metaphysics that undergird the various disciplines of science and humanities more explicit and second we must reject those versions of metaphysics that maintain simple monisms and radical dualisms Bringing Donald Davidson s philosophy a form of pragmatism known as anomalous monism to bear on religion Levy offers a blueprint for one way that the humanities and natural sciences can have a mutually respectful dialogue Levy argues that in order to understand religions we have to take their semantic content seriously We need to rethink such basic concepts as narrative fiction information agency creativity technology and intimacy In the course of his argument Levy considers the relation between two closely related semantics fiction and religion and outlines a new approach to information He then applies his theory to discrete cases ancient texts modern media and intimacy
