Self-Determination and Secession Natalija Shikova, 2023-08-28 This book offers a comprehensive summary of extant international law scholarship on the topics of self determination and secession and positions the concepts among present day theory and relevant practice illustrated through various ongoing cases and historical examples The right to self determination is among the least understood rights within international law Theoretical dilemmas as to whether there is a

link between self determination and secession are nothing new In essence self determination is a much broader concept than secession and obtaining independent statehood Unilateral secession is not prohibited by international law but neither is it per se welcomed or accepted in practice Beyond the context of decolonization secession claims have long been viewed with disapproval in international law and lawyers have been extremely skeptical about the issue Although this is still the case there are also new trends and opportunities to explore situations in which secession can be accepted legitimized or even legally permissible The yardstick for this is the diplomatic response to secessionism and the growing involvement of the international community in mediation and conflict resolution Though finding solutions can be difficult within the existing frame the ongoing tension between the duty of every society to recognize pluralism and diversity on the one hand and the inherent desire of every culture whether majority minority or indigenous to protect its values and ensure conformity on the other must be resolved The practices and modalities that envisage the internal dimension of the right to self determination as a right that is exercised within the state borders can offer such opportunities The appropriate role of the state and the international community is to serve as mediators between competing forces and to set parameters that can transform destructive conflicts into productive political models

The Politics of Historical Memory and Commemoration in Africa Cassandra Mark-Thiesen, Moritz Mihatsch, Michelle Sikes, 2021-12-06 Essays in Memory of Jan Georg Deutsch The volume observes some of the principles that drove Prof Jan Georg Deutsch's research highlighting present day politics for the way they shape historical remembrance learning from people on the ground through fieldwork and oral history and bringing various parts of the African continent into discussion with one another From Cape Town to Charlottesville many societies are grappling with historical consciousness and the production of public memory In particular how and why societies remember and forget what should serve as symbols of collective memory and whether there exists space for multiple memory cultures are questions being vigorously debated once again These discussions present particular challenges not only to official memory bound to ideological constructions of nationhood but also to the teaching of history and its links to social justice movements The volume re-centres Africa and African history in memory studies with each chapter drawing parallels to comparable cases in Africa and the world An underlying assumption is that what can be learned from the politics of historical memory in Africa will have relevance for contemporary politics globally and for understanding how memories can be mobilised for political ends
