## **Remembering The University Of Chicago Teachers Scientists And Scholars:**

*Remembering the University of Chicago* Edward Shils, 1991-12 To celebrate the intellectual achievement of the University of Chicago on the occasion of its centennial year Edward Shils invited a group of notable scholars and scientists to reflect upon some of their own teachers and colleagues at the University

*Portraits* Edward Shils, 1997-06-09 In these vivid portraits of prominent twentieth century intellectuals Edward Shils couples the sensitivity of a biographer with the profound knowledge of a highly respected scholar Ranging as widely across various disciplines as Shils himself did the essays gathered here share a distaste for faddists who run with the intellectual mob and a deep respect for intellectuals who maintain their integrity under great pressure Highlights include an affectionate treatment of Leo Szilard the physicist whose involvement with the development of the atomic bomb led him to work ceaselessly to address its social consequences a discussion of the educational philosophy of Robert Maynard Hutchins the University of Chicago's fifth and most controversial president an appreciative account of the Polish emigr Leopold Labedz's well informed and outspoken resistance to Communism and an essay about the extraordinary Indian writer Nirad Chaudhuri Many of these essays have appeared in *The American Scholar* edited by Joseph Epstein who introduces this volume with his own portrait of Edward Shils Though professionally a sociologist Edward Shils was a man of wide cosmopolitan culture and experience greatly concerned with the public problems of his time in particular with those created by the rise of new and dangerous ideologies the frightening possibilities of science and the apparent abrogation of public responsibility by many Western intellectuals Hugh Trevor Roper The late Edward Shils was a member of the University of Chicago's Committee on Social Thought for forty five years and a fellow of Peterhouse Cambridge University His many books include *The Calling of Sociology* and *The Intellectuals and the Powers* both published by the University of Chicago Press

*Dead Men's Propaganda* Terhi Rantanen, 2024-05-07 In *Dead Men's Propaganda* Ideology and Utopia in Comparative Communications Studies Terhi Rantanen investigates the shaping of early comparative communications research between the 1920s and 1950s notably the work of academics and men of practice in the United States Often neglected this intellectual thread is highly relevant to understanding the 21st century's challenges of war and rival streams of propaganda Borrowing her conceptual lenses from Karl Mannheim and Robert Merton Rantanen draws on detailed archival research and case studies to analyse the extent and importance of work outside and inside the academy illuminating the work of pioneers in the field Some of these were well known academics such as Harold Lasswell and the authors of the seminal book *Four Theories of the Press* Others operated in the world of news agencies such as Associated Press's Kent Cooper or were marginalised as migr scholars notably Paul Kecskemeti and Nathan Leites Her study shows how comparative communications from its very beginning can be understood as governed by the Mannheimian concepts of ideology and utopia and the power play between them The close relationship between these two concepts resulted in a bias in knowledge production contributed to dominant narratives of generational conflicts and to the

demarcation of Insiders and Outsiders By focusing on a generation at the forefront of comparative communications at this pivotal time in the 20th century this book challenges orthodoxies in the intellectual histories of communication studies

**Richard Rorty** Neil Gross, Professor of Sociology Neil Gross, 2010-10 On his death in 2007 Richard Rorty was heralded by the New York Times as one of the world's most influential contemporary thinkers Controversial on the left and the right for his critiques of objectivity and political radicalism Rorty experienced a renown denied to all but a handful of living philosophers In this masterly biography Neil The Common Law Tradition George Liebmann, 2017-09-04 This book commemorates a place and a time in American law teaching but more importantly an outlook the common law tradition That outlook was empirical and tolerant These values were carried into expression by a group of people who were not part of a cult or faction nor ruled by the herd instinct Now in paperback The Common Law Tradition is a collective portrait of five scholars who epitomize the tradition The focus is Chicago in the 1960s The five figures considered Edward H Levi Harry Kalven Jr Karl Llewellyn Philip Kurland and Kenneth Culp Davis did much to broaden the perspectives of the legal academy Levi made use of sociology economics and comparative law Kalven collaborated with sociologists on the Jury Project and with economists on tax law and auto compensation plans Llewellyn's commitment to empirical research underpinned his work on the Uniform Commercial Code Kurland's approach to constitutional law was highlighted by his insistence on the relevance of legal history Davis was an energetic comparativist in his work on administrative law What distinguished these Chicagoans is that their work was practical and rooted in the law and hence yielded concrete applications The group's diversity the tolerant atmosphere in which they taught and wrote and the attachment of its individual members to empirical approaches differentiate them from today's legal scholars and make their ideas of continuing importance Basic Theories of Intellectual Property Transaction Ming Yang, 2025-07-12 From the perspective of the market this book discusses the basic theories and operation mechanism of intellectual property transactions based on the behavior choice theory aiming to deeply understand how the specific systems and rules of intellectual property are operated or applied beyond the external form of system application China's long standing intellectual property legal doctrines and the corresponding knowledge system whether legislative judicial or theoretical research deserve reflection in three aspects i the neglect of market principles ii the lack of behaviorism research perspectives and methods and iii the lack of systematic degree of existing research This book is an introspection on the basic theoretical research of intellectual property in China from the above three aspects This book closely focuses on the coupling relationship between system implementation and behavior choice along with the logical context of intellectual property transactions the institutional mechanism behind the specific transaction forms is investigated and its benefits are analyzed And the essence of the economic mechanism of the intellectual property system is deeply interpreted from both theoretical and practical aspects The target audience is intellectual property law researcher and the content level is the theoretical foundation research Starting from the principles of the entitlement of intellectual property

this book tries to reveal the institutional implication of the creation of right the boundary of right and the attribute of right And this book also tries to sort out the matching attribute between the existing intellectual property systems and the operation of the intellectual property market Finally by analyzing the correlation between the market environment and the subject s behavior choice this book tries to clarify the internal logic between system market and behavior These aforesaid features will help IP researchers deeply understand how existing legal systems and rules affect specific intellectual property transactions

**The Light That Binds** Rev. Stephen L. Brock,2020-03-30 If there is any one author in the history of moral thought who has come to be associated with the idea of natural law it is Saint Thomas Aquinas Many things have been written about Aquinas s natural law teaching and from many different perspectives The aim of this book is to help see it from his own perspective That is why the focus is metaphysical Aquinas s whole moral doctrine is laden with metaphysics and his natural law teaching especially so because it is all about first principles The book centers on how Aquinas thinks the first principles of practical reason which for him are what make up natural law function as laws It is a controversial question and the book engages a variety of readers of Aquinas including Francisco Suarez Jacques Maritain prominent analytical philosophers Straussians and the initiators of the New Natural Law theory Among the issues addressed are the relation between natural law and natural inclination how far natural law depends

on knowledge of human nature what its obligatory force consists in and above all how it is related to what for Aquinas is the first principle of all being the divine will

that it could not be contained within 20 volumes of Collected Works but also Buchanan's scholarship made such strong contact with law ethics and political science that he could easily have served as a poster child for the programs in Politics Philosophy and Economics which have been gaining momentum in recent years Buchanan spoke for a style of economics that made wide and firm contact with the full range of the humane studies This book emphasizes those features of Buchanan's thought that seem relevant for contemporary scholarship within the broadly liberal tradition of political economy **Frank H. than rebut their opponents conspiracy theories spread by shadowy groups and the survivability of American democracy in a post truth age The report that emerged A Free and Responsible Press is a classic but many of the commission s sharpest insights never made it into print Journalist and First Amendment scholar Stephen Bates reveals how these towering intellects debated some of the most vital questions of their time and reached conclusions urgently relevant today *Exploring Social Change* Bridgette Wessels,2014-10-24 A critical introduction to the key processes and contexts of social change in contemporary society combining a thorough grounding of key theorists with hot topics such the media the environment and new technologies ideal for students across the social sciences **Maverick** Jason L Riley,2021-05-25 A biography of Thomas Sowell one of America s most influential conservative thinkers Thomas Sowell is one of the great social theorists of our age In a career spanning more than a half century he has written over thirty books covering topics from economic history and social inequality to political theory race and culture His bold and unsentimental assaults on liberal orthodoxy have endeared him to many readers but have also enraged fellow intellectuals the civil rights establishment and much of the mainstream media The result has been a lack of acknowledgment of his scholarship among critics who prioritize political correctness In the first ever biography of Sowell Jason L Riley gives this iconic thinker his due and responds to the detractors Maverick showcases Sowell s most significant writings and traces the life events that shaped his ideas and resulted in a Black orphan from the Jim Crow South becoming one of our foremost public intellectuals
