Developmental Psychology and Early Childhood Education David Whitebread, 2011-12-01 The importance of high quality early childhood education is now universally recognised and this quality crucially depends upon the practitioners who work with our young children and their deep understanding of how children develop and learn This book makes a vital contribution to this understanding providing authoritative reviews of key areas of research in developmental psychology and demonstrating how these can inform practice in early years educational settings The book s

major theme is the fundamental importance of young children developing as independent self regulating learners It illustrates how good practice is based on four key principles which support and encourage this central aspect of development secure attachment and emotional warmth feelings of control and agency cognitive challenge adults supporting learning and children learning from one another articulation about learning and opportunities for self expression Each chapter includes typical and significant questions which arise in practice related to that area of development an up to date review of key research including insights from observational and experimental work with young children from evolutionary psychology and from neuroscientific studies of the developing brain practical exercises intended to deepen understanding and to inform practice questions for discussion recommended further reading This book provides an invaluable resource for early years students and practitioners by summarizing new research findings and demonstrating how they can be translated into excellent early years practice David Whitebread is Senior Lecturer in Developmental Psychology and Early Years Education in the Faculty of Education University of Cambridge

Remembering Early Modern Revolutions Edward Vallance, 2018-10-08 *Remembering Early Modern Revolutions* is the first study of memory in relation to the major revolutions of the early modern period Beginning with the English revolutions of the seventeenth century 1642 60 and 1688 9 this book also explores the American French and Haitian revolutions Through addressing these events collectively this volume demonstrates the interconnectedness of these revolutions in the contemporary mind and highlights the importance of invoking the memory of prior revolutions in order both to warn of the dangers of revolution and to legitimate radical political change It also unpicks the different ways in which these events were presented and their memory utilised uncovering the importance of geographical and temporal contexts to the processes of remembering and forgetting Examining both personal and collective remembrance and exploring both private recollection and public commemoration *Remembering Early Modern Revolutions* uncovers the rich and powerful memory of revolution in the Atlantic world and is ideal for students and teachers of memory in the early modern period

The Development of Memory in Infancy and Childhood Mary L. Courage, Nelson Cowan, 2022-05-16 *The Development of Memory in Infancy and Childhood* provides a thorough update and expansion of the previous edition and offers new research on significant themes and ideas that have emerged in the past decade such as the cognitive neuroscience of memory development autobiographical memory and infantile amnesia and the cognitive and social factors that underlie memory for events In this volume Courage and Cowan bring together leading international experts to review the current state of the science of memory development in their own research areas They note questions of theory and basic science addressed in their research highlight the real world applications of those findings and propose an agenda for future research The book also considers the implications of their work for the development of atypical children specifically how these new findings might be adapted to enrich the lives of those children and to inform and validate our current expectations of individual differences in the development of typical children The first of three groups of

chapters focuses on basic neurobiological perceptual and cognitive processes that underlie memory and its development i.e encoding consolidation and storage retrieval The second group focuses primarily on the social contextual and cultural factors that enable shape and mediate these basic processes while the rest of the chapters focus on practical applications of this knowledge to real world settings and issues The book provides a new look at memory development including new topics such as spatial representation and spatial working prospective memory false memories and memory and culture This classic yet contemporary volume will appeal to senior undergraduate and graduate students of developmental and cognitive psychology as well as to developmental psychologists who want a compendium of key topics in memory development

Crime, Justice, and Social Order Alison Liebling, Joanna Shapland, Richard Sparks, Justice Tankebe, 2021-12-23 To honour the extraordinary contribution of Professor Anthony Edward Bottoms to criminology and criminal justice leading criminologists and penal scholars have been asked to contribute original essays on the wide range of areas in which he has written The book starts by reflecting on the depth and breadth of Anthony's contribution and his melding of perspectives from moral philosophy social theory empirical social science research and criminal justice This is no ordinary collection because it also contains a major essay by Anthony Bottoms on Criminology and positive morality reflecting on social order and social norms In similar vein Jonathan Jacobs approaches criminology from a moral philosophical viewpoint whilst Ian Loader and Richard Sparks ponder social theory and contemporary criminology Topically Peter Neyroud reflects on evidence based practice and the process of trying to do experiments in relation to policing In the second section of the book on Crime Justice and Communities Loraine Gelsthorpe reminds us that justice is about people in considering the treatment of women in community justice Joanna Shapland draws parallels between the process of desistance from crime and the potential role of restorative justice in affecting offenders journeys P O Wikstrom reflects on the social ecology of crime whilst Antje Du Bois-Pedain considers the theoretical and practical challenges of sentencing constructively Finally the book turns to Anthony Bottoms major interest in punishment and penal order David Garland puts penal populism under the microscope whilst Alison Liebling explores the empirical evidence for theories of penal legitimacy Mike Nellis looks back at the use of the creative arts in prisons in Scotland's Barlinnie Unit whilst Justice Tankebe explores police legitimacy

Memory and Movies John Seamon,2024-10-29 How popular films from Memento to Slumdog Millionaire can help us understand how memory works In the movie Slumdog Millionaire the childhood memories of a young game show contestant trigger his correct answers In Memento the amnesiac hero uses tattoos as memory aids In Away from Her an older woman suffering from dementia no longer remembers who her husband is These are compelling films that tell affecting stories about the human condition But what can these movies teach us about memory In this book John Seamon shows how examining the treatment

of memory in popular movies can shed new light on how human memory works After explaining that memory is actually a diverse collection of independent systems Seamon uses examples from movies to offer an accessible nontechnical description of what science knows about memory function and dysfunction In a series of lively encounters with numerous popular films he draws on *Life of Pi* and *Avatar* for example to explain working memory used for short term retention He describes the process of long term memory with examples from such films as *Cast Away* and *Groundhog Day* The Return of Martin Guerre among other movies informs his account of how we recognize people the effect of emotion on autobiographical memory is illustrated by *The Kite Runner* *Titanic* and other films movies including *Born on the Fourth of July* and *Rachel Getting Married* illustrate the complex pain of traumatic memories Seamon shows us that movies rarely get amnesia right often using strategically timed blows to the protagonist's head as a way to turn memory off and then on again as in *Desperately Seeking Susan* Finally he uses movies including *On Golden Pond* and *Amour* to describe the memory loss that often accompanies aging while highlighting effective ways to maintain memory function

Memory Alan J. Parkin, 2016-07-15 Originally published in 1993 this title provided a lively but comprehensive account of experimental and theoretical approaches to the study of human memory at the time Throughout the book integrates experimental findings with neuropsychological data and describes a wide range of fascinating memory phenomena A central theme of the book concerns the organization of memory The idea that memory is composed of a series of structures is contrasted with process accounts of how memory works There is a substantial account of the explicit/implicit distinction in memory research an area that had been the centre of much recent experimentation and debate The book was intended primarily as an intermediate text for undergraduate and postgraduate psychology students but its interdisciplinary approach and accessible style will also make it of interest to others such as neurologists clinical psychologists and psychiatrists for whom some understanding of memory research is required

Understanding Autobiographical Memory Dorte Berntsen, David C. Rubin, 2012-09-27 The field of autobiographical memory has made dramatic advances since the first collection of papers in the area was published in 1986 Now over 25 years on this book reviews and integrates the many theories perspectives and approaches that have evolved over the last decades A truly eminent collection of editors and contributors appraise the basic neural systems of autobiographical memory its underlying cognitive structures and retrieval processes how it develops in infancy and childhood and then breaks down in aging its social and cultural aspects and its relation to personality and the self Autobiographical memory has demonstrated a strong ability to establish clear empirical generalizations and has shown its practical relevance by deepening our understanding of several clinical disorders as well as the induction of false memories in the legal system It has also become an important topic for brain studies and helped to enlarge our general understanding of the brain
