The Renaissance: Studies in Art and Poetry Walter Pater, 2019-09-06 Many attempts have been made by writers on art and poetry to define beauty in the abstract to express it in the most general terms to find a universal formula for it The value of these attempts has most often been in the suggestive and penetrating things said by the way Such discussions help us very little to enjoy what has been well done in art or poetry to discriminate between what is more and what is less excellent in them or to use words like beauty excellence art poetry with a more precise meaning than they would otherwise have Beauty like all other qualities presented to human experience is relative and the definition of it becomes unmeaning and useless in proportion to its abstractness To define beauty not in the most abstract but in the most concrete terms possible to find not a universal formula for it but the formula which expresses most adequately this or that special manifestation of it is the aim of the true student of aesthetics To see the object as in itself it really is has been justly said to be the aim of all true criticism whatever and in aesthetic criticism the first step towards seeing one's object as it really is is to know one's own impression as it really is to discriminate it to realise it distinctly The objects with which aesthetic criticism deals music poetry artistic and accomplished forms of human life are indeed receptacles of so many powers or forces they possess like the products of nature so many virtues or qualities
