From Near and Far Tyler Stovall, 2022-12 From Near and Far relates the history of modern France from the French Revolution to the present. Noted historian Tyler Stovall considers how the history of France interacts with both the broader history of the world and the local histories of French communities, examining the impacts of Karl Marx, Ho Chi Minh, Paul Gauguin, and Josephine Baker alongside the rise of haute couture and the contemporary role of hip hop. From Near and Far focuses on the interactions between France and three other parts of the world: Europe, the United States, and the French colonial empire. Taking this transnational approach to the history of modern France, Stovall shows how the theme of universalism, so central to modern French culture, has manifested itself in different ways over the last few centuries. Moreover, it emphasizes the importance of narrative to French history, that historians tell the story of a nation and a people by bringing together a multitude of stories and tales that often go well beyond its boundaries. In telling these stories, From Near and Far gives the reader a vision of France both global and local at the same time.

Florence in the Early Modern World Nicholas Scott Baker, Brian J. Maxson, 2019-06-20 Florence in the Early Modern World offers new perspectives on this important city by exploring the broader global context of the fifteenth and sixteenth centuries within which the experience of Florence remains unique. By exploring the city's relationship to its close and distant neighbours, this collection of interdisciplinary essays reveals the transnational history of Florence. The chapters orient the lenses of the most recent historiographical turns perfected in studies on Venice, Rome, Bologna, Naples, and elsewhere towards Florence. New techniques, such as digital mapping, alongside new comparisons of architectural theory and merchants in Eurasia, provide the latest perspectives about Florence's cultural and political importance before, during, and after the Renaissance. From Florentine merchants in Egypt and India through actual and idealized military ambitions in the sixteenth-century Mediterranean to Tuscan humanists in late medieval England, the contributors to this interdisciplinary volume reveal the connections Florence held to early modern cities across the globe. This book steers away from the historical narrative of an insular Renaissance Europe and instead identifies the significance of other global influences. By using Florence as a case study to trace these connections, this volume of essays provides essential reading for students and scholars of early modern cities and the Renaissance.
