of justice and equality were inherent in the history and aspirations of the Jewish people who could fulfill their historical promise only in their ancient Holy Land under their own rule Without spiritual regeneration Judaism was in danger of becoming nothing more than a creed or cult too many German Jews had already assimilated He looked above all to France home of revolution to protect the Jews considering it the sacred duty of Christians to help them regain their promised land Unnoticed at first The Revival of Israel was later discovered and adopted by the Zionists Boston University International Law Journal ,1989 **The European Union, the United Nations, and the Revival of Confederal Governance** Frederick Lister,1996-07-11 Before it became a federation the United States was briefly a confederation a much looser union composed of states rather than of peoples Unions of states to promote economic well being and to prevent war are now being revived Mr Lister analyzes modern confederalism and how it is functioning in the single market of the European Union and how it might function if the collective security system of the United Nations could be carried out as originally planned by a confederal style partnership of the world's independent states Political scientists have traditionally classified voluntary polities as confederations federations or unitary states But they have ignored the first of these classes perhaps because Alexander Hamilton wishing to mobilize support for the new federal constitution discredited not only the United States Confederation but the whole class of confederations as a viable method of governance More than 200 years later confederation as a form of governance is still under a cloud Yet it has been resurfacing largely unrecognized for what it is in the repertory of government In the treaties of Rome and Maastricht and in the collective security system of the Charter the European Union and the United Nations are already involved in forms of governance that are confederal in all but name Lister's book describes confederal governance and how such unions of states differ from intergovernmental organizations on the one hand and federations on the other Meticulously researched and carefully argued it draws upon his five years of study of confederal unions from Ancient Greece through the 19th century Germanic Confederation and the German Zollverein But his book is not a history of confederations Instead it shows how long term alliances sometimes evolve into unions of states and in time into communities of the peoples who live in those states It also shows how the ties of confederal union have been institutionalized in modern times in the EU and how they might be institutionalized in a global collective security body L L Finally the book stresses the urgency of moving in this direction because we shall face a very serious security problem in the next century With the steady leakage of nuclear materials in Russia the non proliferation approach to controlling weapons of mass destruction appears to be breaking down Lister argues that if and when governments are confronted with this looming problem perhaps in the not too distant future the confederal model may be the one that they will need to have updated and at their disposal *Virginia journal of international law* ,1987 **The Survey** ,1928 **League of Nations News** ,1928 Journal of International Law and Practice ,1998 **The Revival of Private Law in Central and Eastern Europe** Donald D. Barry,George Ginsburgs,William B. Simons,2023-12-18 This series critically examines issues of legal doctrine and

practice in Central and Eastern Europe including studies on the harmonization of legal principles and rules the legal impact of the intertwining of domestic economies on the one hand with regional economies and the processes of international trade and investment on the other The series offers a forum for discussion of topical questions of public and private law from domestic regional and international perspectives Comparative research that provides insights in legal developments that can be communicated to those interested in questions not only of law but also of politics economics and of society of countries in the region also finds a home in the series For information about a related title visit the webpages of the Brill journal Review of Central and East European Law
