Rivers, Ponds, and Lakes Anita Ganeri,1992 Describes how modern life is affecting ponds rivers and lakes globally and discusses possible ways of saving the endangered species in these waterways *Rivers, Ponds and Lakes* Nicola Barber,1993 Describes how modern life is affecting ponds rivers and lakes globally and discusses possible ways of saving the endangered species in these waterways A Biological Survey of the Oswego River System New York (State). Conservation Department,1928 **The Chironomidae** P.D. Armitage,L.C. Pinder,Peter Cranston,1994-12-31 The dipteran family Chironomidae is the most widely distributed and frequently the most abundant group of insects in freshwater with representatives in both terrestrial and marine environments A very wide range of gradients of temperature pH oxygen concentration salinity current velocity depth productivity altitude and latitude have been exploited by at least some chironomid species and in grossly polluted environments chironomids may be the only insects present The ability to exist in such a wide range of conditions has been achieved largely by behavioural and physiological adaptations with relatively slight morphological changes It has been estimated that the number of species world wide may be as high as 15000 This high species diversity has been attributed to the antiquity of the family relatively low vagility leading to isolation and evolutionary plasticity In many aquatic ecosystems the number of chironomid species present may account for at least 50% of the total macroinvertebrate species recorded This species richness wide distribution and tolerance to adverse conditions has meant that the group is frequently recorded in ecological studies but taxonomic difficulties have in the past prevented non specialist identification beyond family or subfamily level Recent works including genetic studies have meant that the family is receiving much more attention globally **Summary of Biological Investigations Relating to Water Quality in the Western Lake Michigan Drainages, Wisconsin and Michigan** ,1996 **MCB Camp Lejeune, MCAS New River, and MCAS Cherry Point, U.S. Marine Corps Grow the Force** ,2010 **Water-resources Investigations Report** ,1997 *Occasional Papers of the Boston Society of Natural History* Boston Society of Natural History,1909 *Fauna of New England* William Converse Kendall,1908 **Occasional Papers** Boston Society of Natural History,1904 Fauna of New England: List of the Formidacidae ,1906 Fauna of New England ,1904 Little River Development Plan, Clark Hill Lake, Georgia and South Carolina United States.
