Roads To Center Place A Cultural Atlas Of Chaco Canyon And The Anasazi:

Roads to Center Place Kathryn Gabriel,1991 Within the canyon country of New Mexico Arizona Utah and Colorado the Anasazi built an elaborate system of carefully engineered roadways Many of the roads connect to sites in Chaco Canyon New Mexico and required an enormous amount of human labor to create but the function and significance of these roads remain a mystery

The Architecture of Chaco Canyon, New Mexico Stephen H Lekson,2007-06-13 A fresh volume on the ancient structures of Chaco Canyon built by native peoples between AD 850 and 1130 that unifies older information on the area with new advanced research techniques focusing on studies of technology and building types analyses of architectural change and readings of the built environment aided by over 150 maps floor plans elevations and photos [Reading and Mapping Hardy's Roads](#) Scott Rode,2006-06-23 This book examines Thomas Hardy s representations of the road and the ways the archaeological and historical record of roads inform his work Through an analysis of the uneven and often competing road signs found within three of his major novels The Return of the Native Tess of the D Urbervilles and Jude the Obscure and by mapping the road travels of his protagonists this book argues that the road as represented by Hardy provides a palimpsest that critiques the Victorian construction of social and sexual identities Balancing modern exigencies with mythic possibilities Hardy s fictive roads exist as contested spaces that channel desire for middle class assimilation even as they provide the means both to reinforce and to resist conformity to hegemonic authority [Exploring Ancient Native America](#)

Archaeology in America Linda S. Cordell, Kent Lightfoot, Francis McManamon, George Milner, 2008-12-30 The greatness of America is right under our feet The American past the people battles industry and homes can be found not only in libraries and museums but also in hundreds of archaeological sites that scientists investigate with great care These sites are not in distant lands accessible only by research scientists but nearby almost every locale possesses a parcel of land worthy of archaeological exploration Archaeology in America is the first resource that provides students researchers and anyone interested in their local history with a survey of the most important archaeological discoveries in North America Leading scholars most with an intimate knowledge of the area have written in depth essays on over 300 of the most important archaeological sites that explain the importance of the site the history of the people who left the artifacts and the nature of the ongoing research Archaeology in America divides its coverage into 8 regions the Arctic and Subarctic the Great Basin and Plateau the Great Plains and Rocky Mountains the Midwest the Northeast the Southeast the Southwest and the West Coast Each entry provides readers with an accessible overview of the archaeological site as well as books and articles for further research

The Chaco Meridian Stephen H. Lekson, 1999-03-24 Southwestern archaeologists have long pondered the meaning and importance of the monumental 11th century structures in Chaco Canyon Now Stephen H Lekson offers a lively provocative thesis which attempts to reconceptualize the meaning of Chaco and its importance to the understanding of the entire Southwest Chaco was not alone according to Lekson but only one of three capitals of a vast politically and economically integrated region a network that incorporated most of the Pueblo world and that had contact as far away as Central America A sophisticated astronomical tradition allowed for astrally aligned monumental structures great ceremonial roads and upon the abandonment of Chaco Canyon in the 12th century the shift of the regional capital first to the Aztec site then Paquime all located on precisely the same longitudinal meridian Lekson's ground breaking synthesis of 500 years of Southwestern prehistory with its explanation of phenomena as diverse as the Great North Road macaw feathers Pueblo mythology and the rise of kachina ceremonies will be of great interest to all those concerned with the prehistory and history of the American Southwest

passing through northern Navajo country the desert landscape appears desolate The few remaining Navajo trading posts once famous for their bustling commerce seem unimpressive Yet a closer look at the economic and creative activity in this region which straddles northeastern Arizona northwestern New Mexico and southeastern Utah belies a far more interesting picture In *Traders Agents and Weavers* Robert S McPherson unveils the fascinating and at times surprising history of the merging of cultures and artistic innovation across this land McPherson the author of numerous books on Navajo and southwestern history narrates here the story of Navajo economic and cultural development through the testimonies of traders government agents tribal leaders and accomplished weavers For the first half of the twentieth century trading posts dominated the Navajo economy in northwestern New Mexico McPherson highlights the Two Grey Hills post and its sister posts Toadlena and Newcomb which encouraged excellence among weavers and sold high quality rugs and blankets Parallel to the success of the trading industry was the establishment of the Northern Navajo or Shiprock Agency and Boarding School The author explains the pivotal influence on the area of the agency's stern and controversial founder William T Shelton known by Navajos as Tall Leader Through cooperation with government agents American settlers and traders Navajo weavers not only succeeded financially but also developed their own artistic crafts Shunning the use of brightly dyed yarn and opting for the natural colors of sheep's wool these weavers primarily women developed an intricate style that has few rivals Eventually economic shifts including oil drilling and livestock reduction eroded the traditional Navajo way of life and led to the collapse of the trading post system Nonetheless as McPherson emphasizes Navajo weavers have maintained their distinctive style and method of production to this day Trails of Historic New Mexico Hunt Janin, Ursula

Carlson, 2014-11-21 This is a survey of the major historic trails of New Mexico and other parts of the American Southwest These trails were used by Indians prospectors soldiers buffalo hunters immigrants and cattle and sheep drovers and unlike other more famous Western trails were used as a network of two way trade routes instead of one way avenues for westward migration Introductory chapters highlight prehistoric Indian trails Spanish exploration and Pecos as a microcosm of the old Southwest Each subsequent chapter covers an individual trail describing its history and some of the people who used it A chronology of New Mexico's history and trail system is included as are maps of the most important trails The Routes of Man Ted Conover, 2010-02-09 From the Pulitzer Prize finalist and National Book Critics Circle Award winning author of *Newjack* an absorbing book about roads and their power to change the world Roads bind our world metaphorically and literally transforming landscapes and the lives of the people who inhabit them Roads have unparalleled power to impact communities unite worlds and sunder them and reveal the hopes and fears of those who travel them With his marvelous eye for detail and his contagious enthusiasm Ted Conover explores six of these key byways worldwide In Peru he traces the journey of a load of rare mahogany over the Andes to its origin an untracked part of the Amazon basin soon to be traversed by a new east west route across South America In East Africa he visits truckers whose travels have been linked to the

worldwide spread of AIDS In the West Bank he monitors highway checkpoints with Israeli soldiers and then passes through them with Palestinians witnessing the injustices and danger borne by both sides He shuffles down a frozen riverbed with teenagers escaping their Himalayan valley to see how a new road will affect the now isolated Indian region of Ladakh From the passenger seat of a new Hyundai piling up the miles he describes the exuberant upsurge in car culture as highways proliferate across China And from inside an ambulance he offers an apocalyptic but precise vision of Lagos Nigeria where congestion and chaos on freeways signal the rise of the global megacity A spirited urgent book that reveals the costs and benefits of being connected how from ancient Rome to the present roads have played a crucial role in human life advancing civilization even as they set it back
