challenge and develop our understanding of confession's presumably strict preoccupation with the personal regional and national frameworks through which Lowell has commonly been understood

Shades of Authority Stephen James, 2007-10-01 What is the relationship between poetry and power Should poetry be considered a mode of authority or an impotent medium And why is it that the modern poets most commonly regarded as authoritative are precisely those whose works wrestle with a sense of artistic inadequacy Such questions lie at the heart of this study prompting fresh insights into three of the most important poets of recent decades Robert Lowell Geoffrey Hill and Seamus Heaney Through attentive close reading and the tracing of dominant motifs in each writer's works James shows how their responsiveness to matters of political and cultural import lends weight to the idea of poetry as authoritative utterance as a medium for speaking of and to the world in a persuasive memorable manner And yet as James demonstrates each poet is exercised by an awareness of his own cultural marginality even by a sense of the limitations and liabilities of language itself

Dark Airs Brendan Cooper, 2009 In discussions of American poetry since World War II the work of John Berryman has become increasingly neglected and marginalized Critics have overwhelmingly chosen to favour the notion that he is an academic establishment poet whose career can comfortably be described as a move from New Critical traditionalism towards self absorbed confessionalism This study shows how such a narrow understanding of Berryman's work is reflective of a broader critical inclination towards a codification of the literary canon as a duel between competing factions of a formalist establishment mainstream and an experimentalist countercultural avant garde By examining the extent to which Berryman's poetry engages with the complex religiopolitical climate of Cold War American culture this study exposes the inadequacy of the paradigm of mainstream traditionalism in relation to his work In doing so it opens up threads of comparative possibility between his work and that of poets ordinarily segregated from him by divisive conceptions of the literary canon As such this volume provides a reconsideration of Berryman's work that simultaneously asks broader questions about the nature of the American poetic canon and established definitions of postmodern poetry
