Wright, 2023-03-20 This r sum study deals with building material which together with construction and structures forms one of the three aspects of building or equally one of the three factors which constitute the nature of a building Unlike existing manuals on ancient building this offers an analytic presentation and the subject matter extends across all ages and regions

The treatment of materials is set out according to a paradigm of nature manufacture and use so as to facilitate direct comparison between different modes of the one material as also between different materials and between different building traditions This second part is published in two volumes the first containing texts the second more than 300 illustrations The print edition is available as a set of two volumes 9789004140073 *The Second Half Century of Rock Mechanics, Three Volume Set* Luis Ribeiro e Sousa, Claudio Olalla, N.
