The classic reference work that provides annually updated information on the countries of the world Russia in Flux Sir John Maynard, 1962 *The Statesman's Year-Book 1980-81* J. Paxton, 2016-12-15 The classic reference work that provides annually updated information on the countries of the world **Russian Foreign Policy in the Twenty-First Century and the Shadow of the Past** Robert Legvold, 2007-03-27 Because the turbulent trajectory of Russia's foreign policy since the collapse of the Soviet Union echoes previous moments of social and political transformation history offers a special vantage point from which to judge the current course of events In this book a mix of leading historians and political scientists examines the foreign policy of contemporary Russia over four centuries of history The authors explain the impact of empire and its loss the interweaving of domestic and foreign impulses long standing approaches to national security and the effect of globalization over time Contributors focus on the underlying patterns that have marked Russian foreign policy and that persist today These patterns are driven by the country's political makeup geographical circumstances economic strivings unsettled position in the larger international setting and above all its tortured effort to resolve issues of national identity The argument here is not that the Russia of Putin and his successors must remain trapped by these historical patterns but that history allows for an assessment of how much or how little has changed in Russia's approach to the outside world and creates a foundation for identifying what must change if Russia is to evolve A truly unique collection this volume utilizes history to shed crucial light on Russia's complex occasionally inscrutable relationship with the world In so doing it raises the broader issue of the relationship of history to the study of contemporary foreign policy and how these two enterprises might be better joined **Water-Carbon Dynamics in Eastern Siberia** Takeshi Ohta, Tetsuya Hiyama, Yoshihiro Iijima, Ayumi

Kotani, Trofim C. Maximov, 2019-07-01 This book discusses the water and carbon cycle system in the permafrost region of eastern Siberia Providing vital insights into how climate change has affected the permafrost environment in recent decades It analyzes the relationships between precipitation and evapotranspiration gross primary production and runoff in the permafrost regions which differ from those in tropical and temperate forests Eastern Siberia is located in the easternmost part of the Eurasian continent and the land surface with underlying permafrost has developed over a period of seventy thousand years The permafrost ecosystem has specific hydrological and meteorological characteristics in terms of the water and carbon dynamics and the current global warming and resulting changes in the permafrost environment are serious issues in the high latitude regions The book is a valuable resource for students researchers and professionals interested in

forest meteorology and hydrology forest ecology and boreal vegetation as well as the impact of climate change and water carbon cycles in permafrost and non permafrost regions *Politics and the People in Revolutionary Russia* Sarah Badcock, 2007-10-04 After the collapse of the Romanov dynasty in February 1917 Russia was subject to an eight month experiment in democracy Sarah Badcock studies its failure through an exploration of the experiences and motivations of ordinary men and women urban and rural military and civilian Using previously neglected documents from regional archives this text offers a history of the revolution as experienced in the two Volga provinces of Nizhegorod and Kazan Badcock exposes the confusions and contradictions between political elites and ordinary people and emphasises the role of the latter as political actors By looking beyond Petersburg and Moscow she shows how local concerns conditions and interests were foremost in shaping how the revolution was received and understood She also reveals the ways in which the small group of intellectuals who dominated the high political scene of 1917 had their political alternatives circumscribed by the desires and demands of ordinary people
