Kuo,2022-07-14 Dr Kuo is the Head of Global Business Development at Predicine The other Topic Editor declares no competing interest with regards to the Research Topic theme Developments in Diagnosis and Management of Thyroid Cancer Carlotta Giani,Carla Colombo ,Joana Simões-Pereira,2025-03-25 Recent advances in knowledge about thyroid cancer show the need for a personalized approach both for indolent thyroid carcinomas which can be treated and followed with a more conservative approach and for advanced thyroid cancer which may need a more intensive follow up and aggressive therapy Several new trends in thyroid cancer approaches rose in the last few years In particular thyroid cancer management has been shifting towards a more conservative approach The focus has been directed to active surveillance in patients with thyroid microcarcinomas to local conservative non surgical therapies such as radiofrequency or alcohol ablation for microcarcinomas and local lymph node metastases and to minimally invasive surgical techniques Few data have been reported about these new techniques but they may become the standard of care particularly for those patients with microcarcinomas with anxiety about active surveillance or for those who present local tumor growth under active surveillance Furthermore in the last decades molecular techniques have opened up new diagnostic scenarios in the pre intervention identification and risk classification of patients with a known diagnosis of thyroid carcinoma that improved patient management and follow up Regarding advanced thyroid tumors new drugs have been developed to control the disease such as multi tyrosine kinase inhibitors and targeted therapies However in some cases tumors become resistant to these drugs Currently there are no reliable markers clinical or molecular that have been found to be predictive of an early escape from therapy control Other drugs for this kind of tumor should be developed to be used as second third or successive treatment and studies combining two or more drugs are needed to explore the possibility of overcoming the resistance to a single therapy **Experimental and Numerical Simulations of Rock Physics** Huaimin Dong,Yihuai Zhang,Weichao Yan,2025-09-01

Rock physics experiments and numerical simulations are indispensable tools in geology and mineral resources exploration Experiments can provide real data on the physical properties of rocks while numerical simulations can reproduce these properties and predict behavior under unknown conditions on a computer Understanding the physical properties of rocks is crucial in energy source exploration and development Rock physics experiments can perform various tests on samples under controlled environments These experiments can provide real data on the physical properties In contrast numerical simulations have the advantages of low cost and high flexibility Through numerical simulations the physical properties of rocks can be reproduced on a computer and their behavior under unknown conditions can be predicted Combining rock physics experiments with numerical simulations can provide a more comprehensive understanding of the physical properties of rocks and offer more accurate data support for energy source exploration and development

Biochar Production Engineering Arpita Roy,Rouf Ahmad Bhat,Gowhar Hamid Dar,2025-08-02 Biochar Production Engineering Innovative Technology for Environmental Decontamination covers biochar production from different materials

The book discusses comprehensively the compatibility of biochar for cleaning up contamination from different environments. In addition, the book also reconnoiters various eco-friendly, economical and aesthetically acceptable biochar-based decontamination technologies. The book alluringly highlights the cutting-edge investigation in this field and provides intriguing data on the biochar application for the treatment of various kinds of pollutants to restore the ecosystem features and consequently reveal newfangled scopes of biochar application. Key Features: Provides various methods and strategies for biochar production from different raw materials and their physicochemical properties; Investigation in relation to compatibility of biochar as pollution decontamination tool; Address current trends and challenges related to the biochar production and economic aspects of biochar and its use in pollution remediation. **Nuclear Magnetic Resonance 49**

Josep Sauri, Paul Hodgkinson, 2023-11-29 Applications of nuclear magnetic resonance span a wide range of scientific disciplines from chemistry and physics to medicine. For those wanting to become acquainted with NMR or seasoned practitioners, this is a valuable source of current methods and applications. *Cumulated Index Medicus*, 1994 **Plant Breeding Reviews, Volume 17** Jules Janick, 2010-04-20 Plant Breeding Reviews is an ongoing series presenting state-of-the-art review articles on research in plant genetics, especially the breeding of commercially important crops. Articles perform the valuable function of collecting, comparing and contrasting the primary journal literature in order to form an overview of the topic. This detailed analysis bridges the gap between the specialized researcher and the broader community of plant scientists.
