Modern European Military Fortifications, 1870-1950 J.E Kaufmann, Clayton Donnell, 2004-10-30 This selected bibliography on modern European fortifications from 1850 to 1950 provides a selection of the most important books and articles written on this topic The work covers regions and countries and includes many sources on such popular topics such as the Maginot Line along with lesser known fortifications such as the Salpa Line and the Swiss National Redoubt References for the fortifications that appear cover everything from the Iberian Peninsula to the Soviet Union and from Scandinavia to the Mediterranean countries This work includes not only American and English but also non English publications This source features books and articles done in the nineteenth and twentieth century ending in December 2000 Each contributor is a member of SITE O an international fortifications research group In addition to helpful annotations each chapter includes summaries on the fortifications Also features a multi lingual glossary and reference maps [The Medieval Charlemagne Legend](#) Susan E. Farrier, 2024-02-02 Originally published in 1993 The Medieval Charlemagne Legend is a selective bibliography for the literary scholar of historical and literary material relating to Charlemagne The book provides a chronological listing of sources on the legend and man is split into three distinct sections covering the history of Charlemagne the literature of Charlemagne and the medieval biography and chronicle of Charlemagne **Mennonite Family History October 2006** Lois Ann Mast, Mennonite Family History is a quarterly periodical covering Mennonite Amish and Brethren genealogy and family history Check out the free sample articles on our website for a taste of what can be found inside each issue The MFH has been published since January 1982 The magazine has an international advisory council as well as writers The editors are J Lemar and Lois Ann Zook Mast *Topics in Language Resources for Translation and Localisation* Elia Yuste Rodrigo, 2008 Language Resources LRs are sets of language data and descriptions in machine readable form such as written and spoken language corpora terminological databases computational lexica and dictionaries and linguistic software tools Over the past few decades mainly within research environments LRs have been specifically used to create optimise or evaluate natural language processing NLP and human language technologies HLT applications including translation related technologies Gradually the infrastructures and exploitation tools of LRs are being perceived as core resources in the language services industries and in localisation production settings However some efforts ought yet to be made to raise further awareness about LRs in general and LRs for translation and localisation in particular to a wider audience in all corners of the world Topics in Language Resources for Translation and Localisation sets out to establish the state of the art of this ever expanding field and underscores the usefulness that LRs can potentially have in the process of creating adapting managing standardising and leveraging content for more than one language and culture from various perspectives [Multilingual Discourse Production](#) Svenja Kranich, Viktor Becher, Steffen Höder, Juliane House, 2011-11-09 This volume presents discourse production in multilingual contexts as a specific type of language contact situation

Translation may be seen as the prototypical type of multilingual discourse production other types would include parallel text production in different languages e g for websites or the production of versions more loosely connected with the source text When divergent communicative norms and conventions come into contact in any of these types of text production one may find that such conventions transcend established language boundaries potentially leading to the emergence of new genres This volume represents the first collection of papers that focus on the specific properties of language contact through multilingual discourse production It brings together approaches by historical linguists language contact researchers and translation scholars thus presenting the topic in its full variety and providing valuable suggestions for further research in this emerging field of study Text, Speech, and Dialogue Pavel Král,Václav Matoušek,2015-09-18 This book constitutes the refereed proceedings of the 18th International Conference on Text Speech and Dialogue TSD 2015 held in Pilsen Czech Republic in September 2015 The 67 papers presented together with 3 invited papers were carefully reviewed and selected from 138 submissions They focus on topics such as corpora and language resources speech recognition tagging classification and parsing of text and speech speech and spoken language generation semantic processing of text and speech integrating applications of text and speech processing automatic dialogue systems as well as multimodal techniques and modelling

Discourse Analysis in Translation Studies Jeremy Munday,Meifang Zhang,2017-07-18 Discourse analytic approaches are central to translator training and translation analysis but have been somewhat overlooked in recent translation studies This volume sets out to rectify this marginalization It considers the evolution of the use of discourse analysis in translation studies presents current research from ten leading figures in the field and provides pointers for the future Topics range from close textual analysis of cohesion thematic structure and the interpersonal function to the effects of global English and the discourses of cyberspace The inherent link between discourse and the construction of power is evident in many contributions that analyse institutional power and the linguistic resources which mark translator interpreter positioning An array of scenarios and languages are covered including Arabic Chinese English German Korean and Spanish Originally published as a special issue of Target 27 3 2015 **The Handbook of Translation and Cognition** John W. Schwieter,Li Wei,2020-01-09 The Handbook of Translation and Cognition is a pioneering state of the art investigation of cognitive approaches to translation and interpreting studies TIS Offers timely and cutting edge coverage of the most important theoretical frameworks and methodological innovations Contains original contributions from a global group of leading researchers from 18 countries Explores topics related to translator and workplace characteristics including machine translation creativity ergonomic perspectives and cognitive effort and competence training and interpreting such as multimodal processing neurocognitive optimization process oriented pedagogies and conceptual change Maps out future directions for cognition and translation studies as well as areas in need of more research within this dynamic field *Computers in Translation* John Newton,2002-09-11 Researchers have been attempting to develop systems that would emulate the human translation process

for some forty years What is it about human language that makes this such a daunting challenge While other software packages have achieved rapid and lasting success machine translation has failed to penetrate the worldwide market to any appreciable extent Does this merely reflect a reluctance to adopt it or does it signal a more fundamental and intractable problem Computers in Translation is a comprehensive guide to the practical issues surrounding machine translation and computer based translation tools Translators system designers system operators and researchers present the facts about machine translation its history its successes its limitations and its potential Three chapters deal with actual machine translation applications discussing installations including the METEO system used in Canada to translate weather forecasts and weather reports and the system used in the Foreign Technology Division of the US Air Force

,1966-10 **"Critical" situations in multicultural teams: The role of emotions** Gerd Reisigl, 2005-02-09 Inhaltsangabe Abstract Interest in emotions within organisation increased in the last years However research in this field is scarce In the discussion about emotions in organisation the increasing number of multicultural teams is adding an additional variable culture making research even more complicate Practitioners report that where culture meets conflicts accompanied by negative emotions such as anger occur However also positive emotions like happiness may occur having a positive influence on motivation and enhance cohesion what may be considered as benefit in multicultural teams Although anger as well happiness are considered as universally experienced emotion there is some evidence that the causes expression and the behaviour which follows anger and happiness are culturally influenced In multicultural teams the knowledge about the

antecedents of these two emotions and the following behaviour seems to be especially important as on one hand misunderstandings and conflict connected with anger may have serious social consequences reducing performance or even resulting in contra productive behaviour threatening the organisation and on the other hand experience of success and good communication enhancing team collaboration seems to be connected with happiness This thesis aims to contribute to a better understanding with regards the culturally influenced antecedents of the two emotions anger and happiness as well as about the resulting behavioural consequences in multicultural team settings The two research questions guiding this work are 1 In which multicultural team situations do the emotions anger and happiness arise 2 Which are the antecedents in team settings of the two emotions and which is the resulting behaviour respectively consequences that follows Ahead the Theoretical Part should provide the reader a basic introduction about emotions and the connected relevant factors like cognition sociality and culture with regard to the research questions Offering a working definition of culture and emotion the attempt to illustrate the role of emotion in multicultural team settings as well the discussion about the discrepancy of expectation and of expression regarding emotions throughout cultures should make the reader more sensible about a the possible detected differences in antecedents and behavioural consequences and b their impact in multicultural teams In Chapter One a discussion about

Cross-Linguistic Variation in System and Text Elke Teich,2012-02-13 The intuition that translations are somehow different from texts that are not translations has been around for many years but most of the common linguistic frameworks are not comprehensive enough to account for the wealth and complexity of linguistic phenomena that make a translation a special kind of text The present book provides a novel methodology for investigating the specific linguistic properties of translations As this methodology is both corpus based and driven by a functional theory of language it is powerful enough to account for the multi dimensional nature of cross linguistic variation in translations and cross lingually comparable texts

Rural Space in the Middle Ages and Early Modern Age Albrecht Classen, 2012-05-29 Older research on the premodern world limited its focus on the Church the court and more recently on urban space The present volume invites readers to consider the meaning of rural space both in light of ecocritical readings and social historical approaches While previous scholars examined the figure of the peasant in the premodern world the current volume combines a large number of specialized studies that investigate how the natural environment and the appearance of members of the rural population interacted with the world of the court and of the city The experience in rural space was important already for writers and artists in the premodern era as the large variety of scholarly approaches indicates The present volume signals how much the surprisingly close interaction between members of the aristocratic and of the peasant class determined many literary and art historical works In a surprisingly large number of cases we can even discover elements of utopia hidden in rural space We also observe how much the rural world was a significant element already in early medieval mentality Moreover as many authors point out the impact of natural forces on premodern society was tremendous if not catastrophic
