## **Sable Island:**

**Sable Island** Marq de Villiers, Sheila Hirtle, 2006-02-07 Presents the story of Sable Island an island adrift in the North Atlantic tracing its history and topology from its probable origins in glacial times to its fate at the mercy of the continental shelf and North Atlantic currents Reprint 17 500 first printing

**Sable Island** Bruce Armstrong, 1987-01-01 Sable Island is the world's most mysterious and notorious sandbar situated 160 kilometers offshore of southeast Nova Scotia The island is currently receiving much renewed attention because of proposals to make it a National Park or a National Wilderness Area Known for centuries as The Graveyard of the Atlantic its forty kilometre length has claimed over five hundred ships since the earliest adventurers and fishing vessels sailed to North America Even today Sable presents serious problems to navigators The home of the world's last herds of wild horses the island is a fragile shifting crescent of sand and grass whose beauty and violence has fascinated and inspired countless adventurers writers artists and scientists for over three hundred years Bruce Armstrong takes the reader on a personal journey to Sable He brings to life the early shipwrecks lifesaving establishments and settlement attempts that have marked the island's long and varied history There are ghost stories tales of exceptional bravery and first hand impressions of the island left by men and women such as Sir Humphrey Gilbert Dorothea Dix and Alexander Graham Bell Contemporary material about Sable is based on interviews with some of the people who live in this lonely place as lifesavers wireless operators conservationists and scientific observers their experiences contribute an immediate sense of Sable's spirit and power Many new colour photographs by island researcher Zoe Lucas are featured in this new edition Sable Island is an imaginative and exciting journey to the world's northern Galapagos It is also an eloquent plea for the preservation of a unique and timeless part of Nova Scotia Sable Island was awarded the Evelyn Richardson Prize the pre eminent award for non fiction in Atlantic Canada

**Sable Island** Marq de Villiers, Sheila Hirtle, 2004-10-01 The story of a small but deadly sand dune in the middle of the North Atlantic Sable Island one hundred miles due east of Nova Scotia in the midst of the worst weather in the North Atlantic is a thirty mile long sand dune uninhabited except by a couple of government agents who maintain an outpost and by bands of wild horses that have populated the island for more than two hundred years Yet this small place illuminates grand and global themes both human and natural There is evidence that Sable may have been discovered as early as the fifteenth century and it has been the subject of several failed colonization efforts by Portugal France the Basques and even a group of prominent Bostonians including the uncle of John Hancock For centuries before lifesaving global positioning technology Sable terrorized legions of mariners crossing from Europe to America more than five hundred ships have been wrecked on its shores fully ten disasters for every mile of coastline Sable is constantly moving its beaches disappearing and reappearing in storms its very body in slow motion to the east Because of this it is a metaphor for the way the planet governs itself because to appreciate Sable is to understand the workings of the great ocean currents the winds and the North Atlantic gale and the forces of entropy Impressive in the array of its knowledge Sable

Probasco, 2020-11-20 This book examines the 1583 voyage of Sir Humphrey Gilbert to North America This was England's first attempt at colonization beyond the British Isles yet it has not been subject to thorough scholarly analysis for more than 70 years An exhaustive examination of the voyage reveals the complexity and preparedness of this and similar early modern colonizing expeditions Prominent Elizabethans assisted Gilbert by researching and investing in his expedition the Printing

Revolution was critical to their plans as Gilbert's supporters traveled throughout England with promotional literature proving England's claim to North America. Gilbert's experts used maps and charts to publicize and navigate while his pilots experimented with new navigating tools and practices. Though he failed to establish a settlement, Gilbert created a blueprint for later Stuart colonizers who achieved his vision of a British Empire in the Western Hemisphere. This book clarifies the role of cartography, natural science, and promotional literature in Elizabethan colonization and elucidates the preparation stages of early modern colonizing voyages.
