Secure Data Networking:

Secure Group Communications Over Data Networks Xukai Zou,Byrav Ramamurthy,Spyros S. Magliveras,2004-10-21 The ubiquitous nature of the Internet is enabling a new generation of pUcations to support collaborative work among geographically distant users Security in such an environment is of utmost importance to safeguard the pri vacy of the communication and to ensure the integrity of the applications Secure group communications SGC refers to a scenario in which a group of participants can receive and send messages to group members in a way that outsiders are unable to glean any information even when they are able to intercept the messages SGC is becoming extremely important for researchers and practitioners because many applications that require SGC are now widely used such as teleconferencing tele medicine real time information services distributed interactive simulations collaborative work grid computing and the deployment of VPN Virtual Private Networks Even though considerable research accomplishments have been achieved in SGC few books exist on this very important topic The purpose of this book is to provide a comprehensive survey of principles and state of the art techniques for secure group communications over data net works The book is targeted towards practitioners researchers and students in the fields of networking security and software applications development The book consists of 7 chapters which are listed and described as follows **Secure Data Networking** Michael Purser,1993 This guide helps you protect networks from unauthorized access It discusses counter security threats optimum use of encryption integrity checks and uniqueness mechanisms **Signal and Information Processing, Networking and Computers** Jiaqi Zou,Gang Sun,Yue Wang,Lexi Xu,2025-06-16 This proceedings book presents the latest research in the fields of signal and information processing schemes computer theory space technologies big data as well as other related technologies Collecting selected papers from the 12th Conference on Signal and Information Processing Networking and Computers ICSINC is held in Chongqing China on September 10 13 2024 it is of interest to professionals from academia and industry alike Network and System Security Pramod Pandya,2013-08-26 With an ever increasing amount of information being transmitted electronically it is important that security be considered in every phase of local area network design and maintenance Although much emphasis has been placed on such things as wireless networks and remote access it is imperative that the core local area network not be overlooked Because the wired local area network is the nervous system of an organization s Information Systems great care must be taken to properly secure it This chapter begins by looking at the implications for the wired local area network infrastructure security Next local area network segmentation and traffic isolation will be discussed By using segmentation and isolation there is the increased opportunity for security boundaries Another concept that will be discussed is the security of the local area network equipment The local area network is only functional if the core equipment is operational so securing equipment is an important part of any security strategy To conclude restriction of local area network access will be investigated and an organizational approach will be discussed Because more and more users need

access to local area network resources there must be a way to identify and restrict who is allowed on the network and what access they are granted In wired local area network infrastructure security organizations must remember they are only as secure as their weakest point By carefully considering the various aspects of the local area network security during design these weak points can be reduced and the overall security of the network increased Although it is impossible to be 100% secure and still be functional by using some general guidelines to secure the wired local area network many threats to the network can be reduced if not eliminated   **Emerging Communications for Wireless Sensor Networks** Anna Foerster,Alexander Foerster,2011-02-07 Wireless sensor networks are deployed in a rapidly increasing number of arenas with uses ranging from healthcare monitoring to industrial and environmental safety as well as new ubiquitous computing devices that are becoming ever more pervasive in our interconnected society This book presents a range of exciting developments in software communication technologies including some novel applications such as in high altitude systems ground heat exchangers and body sensor networks Authors from leading institutions on four continents present their latest findings in the spirit of exchanging information and stimulating discussion in the WSN community worldwide   *Encrypted Email* Hilarie Orman,2015-08-08 This SpringerBrief examines the technology of email privacy encryption from its origins to its theoretical and practical details It explains the challenges in standardization usability and trust that interfere with the user experience for software protection Chapters address the origins of email encryption and why email encryption is rarely used despite the myriad of its benefits benefits that cannot be obtained in any other way The construction of a secure message and its entwining with public key technology are covered Other chapters address both independent standards for secure email and how they work The final chapters include a discussion of getting started with encrypted email and how to live with it Written by an expert in software security and computer tools Encrypted Email The History and Technology of Message Privacy is designed for researchers and professionals working in email security and encryption Advanced level students interested in security and networks will also find the content valuable   **StarBriefs Plus** Andre Heck,2004-03-31 With about 200 000 entries StarBriefs Plus represents the most comprehensive and accurately validated collection of abbreviations acronyms contractions and symbols within astronomy related space sciences and other related fields As such this invaluable reference source and its companion volume StarGuides Plus should be on the reference shelf of every library organization or individual with any interest in these areas Besides astronomy and associated space sciences related fields such as aeronautics aeronomy astronautics atmospheric sciences chemistry communications computer sciences data processing education electronics engineering energetics environment geodesy geophysics information handling management mathematics meteorology optics physics remote sensing and so on are also covered when justified Terms in common use and or of general interest have also been included where appropriate   **Fundamentals of Communications and Networking** Michael G. Solomon,David Kim,2021-01-15 Today s networks are required to support an increasing array of real time

communication methods Video chat and live resources put demands on networks that were previously unimagined Written to be accessible to all Fundamentals of Communications and Networking Third Edition helps readers better understand today s networks and the way they support the evolving requirements of different types of organizations While displaying technical depth this new edition presents an evolutionary perspective of data networking from the early years to the local area networking boom to advanced IP data networks that support multimedia and real time applications The Third Edition is loaded with real world examples network designs and network scenarios that provide the reader with a wealth of data networking information and practical implementation tips Key Features of the third Edition Introduces network basics by describing how networks work Discusses how networks support the increasing demands of advanced communications Illustrates how to map the right technology to an organization s needs and business goals Outlines how businesses use networks to solve business problems both technically and operationally **Secure Group Communications Over Data Networks** Xukai Zou,Byrav Ramamurthy,Spyros S.
