Regional Organizations during Conflict Intervention Jens Herpolsheimer,2021-02-28 This book studies relevant actors and practices of conflict intervention by African regional organizations and their intimate connection to space making addressing a major gap regarding what actually happens within and around these organizations Based on extensive empirical research it argues that those intervention practices are essentially spatializing practices based on particular spatial imaginations contributing to the continuous construction and formatting of regional spaces as well as to ordering relations between different regional spaces Analyzing the field of developing practices of conflict intervention by the Economic Community of West African States ECOWAS and the African Union AU the book contributes a new theory oriented analytical approach to study African regional organizations ROs and the complex dynamics of African peace and security based on insights from Critical Geography As such it helps to close an empirical gap with regard to the internal modes of operation of African ROs as well as the lack of their theorization It demonstrates that contrary to most accounts intervention practices of African ROs have been diverse and complexly interrelated involving different actors within and around these organizations and are essentially tied to the space making This book will be of key interest to students and scholars of African Politics Governance Peace and Security Studies International or Regional Organizations and more broadly to Comparative Regionalism International Relations and International Studies *Recordkeeping in International Organizations* Jens Boel,Eng

Sengsavang, 2020-12-29 Recordkeeping in International Organizations offers an important treatment of international organizations from a recordkeeping perspective while also illustrating how recordkeeping can play a vital role in our efforts to improve global social conditions. Demonstrating that organizations have both a responsibility and an incentive to effectively manage their records in order to make informed decisions, remain accountable to stakeholders, and preserve institutional history, the book offers practical insights and critical reflections on the effective management, protection, and archiving of records. Through policy advice, surveys, mind mapping, case studies, and strategic reflections, the book provides guidance in the areas of archives, records, and information management for the future. Among the topics addressed are educational requirements for recordkeeping professionals, communication policies, data protection and privacy, cloud computing, classification and declassification policies, artificial intelligence, risk management, enterprise architecture, and the concepts of extraterritoriality and inviolability of archives. The book also offers perspectives on how digital recordkeeping can support the UN's 2030 Agenda for Sustainable Development and the accompanying Sustainable Development Goals (SDGs). Recordkeeping in International Organizations will be essential reading for records and archives professionals, information technology, legal, security, management, and leadership staff, including chief information officers. The book should also be of interest to students and scholars engaged in the study of records, archives, and information management, information technology, information security, and law. Chapters 7 and 9 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Attribution NonCommercial ShareAlike CC BY-NC-SA 4.0 license.
