Seeds And Fruits Flora In Focus Series:

Bioprospecting of Tropical Medicinal Plants Karuppusamy Arunachalam, Xuefei Yang, Sreeja Puthanpura Sasidharan, 2023-08-30 This book focuses on natural products in particular medicinal plants and their derived products as an indispensable source of bioactive molecules that serve as either drug candidates or lead compounds for drug design and discovery. There are several advantages for plant-derived therapeutics including wide availability, diverse pharmacological actions, and a generally good profile of safety and tolerability. Over the recent years, there have been numerous reports from clinical studies testifying the efficacy and safety of medicinal plants and phytochemicals in treating human diseases. A plethora of basic studies has also unraveled molecular mechanisms underlying the health benefits of herbal medicines. Nevertheless, issues such as identification of bioactive ingredients, standardization of the products, and drug interactions remain to be systematically documented. Bioprospecting of Tropical Medicinal Plants represents a comprehensive analysis of natural products, mainly medicinal plants and phytochemicals. It includes detailed medicinal properties and pharmacological action from in vitro models to clinical trials. The goal is to present the readers a carefully curated collection of plant-derived natural products and their underlying molecular mechanisms. **ENC Focus**, 2000

Ecology and Evolution of Plants under Domestication in the Neotropics Alejandro Casas, Ana H. Ladio, Charles R. Clement, 2019-09-25 The Neotropical area is a main setting of the earliest experiences of domestication of plants and evolutionary processes guided by humans, which continue being active in the area. Studies comprised in this Research Topic show a general panorama about similarities and particularities of processes of domestication for different plant groups and regions; some of them illustrate how the domestication processes originated and diffused, how landscape domestication has operated and continues being practiced, and others discuss some of the main challenges for designing policies for biosafety and conservation of plant genetic resources. It is an attempt to identify main topics for research on evolution under domestication and opportunities that researchers can find in the Neotropics to understand how and why these processes occurred in the past and present. Priorities for the Conservation of Mammalian Diversity Abigail Entwistle, Nigel Dunstone, 2000-07-20 Scientific yet accessible review of mammalian conservation as a model demonstrating wider issues in conservation. **From Paradise to Misery** Silvester Paredes, 2018-03-05 The book of Genesis can invite a lot of questions: Did God create the world in 6 days or did he create the world in human days? Is there a discrepancy between the creation story presented in chapter 1 and the story in chapter 2? Does Genesis 3:15 show the triumph of Jesus over Satan on the cross, or does it show something else? From Paradise to Misery offers answers to these questions using a clear biblical perspective. Author and pastor Silvester Paredes shows us how many readers and interpreters of Genesis take too much for granted, forgetting that the book of Genesis contains events and circumstances that are happening for the first time in the history of creation. With that realization, we can approach the events of Genesis and creation with innocent eyes, allowing the Word of God to speak for itself in God's voice, not in our own.

The Bible and the book of Genesis especially has been misinterpreted for centuries so it is important for the people of God to rethink our interpretations and revisit God's opening words to his creation. With God's guidance and an open, innocent mind, we can better understand creation and the nature of sin and in so doing better understand God ourselves and his purposes for our lives.

Everyday Life Science Mysteries Richard Konicek-Moran, 2013

How do tiny bugs get into oatmeal? What makes children look like or different from their parents? Where do rotten apples go after they fall off the tree? By presenting everyday mysteries like these, this book will motivate your students to carry out hands-on science investigations and actually care about the results. These 20 open-ended mysteries focus exclusively on biological science, including botany, human physiology, zoology, and health. The stories come with lists of science concepts to explore, grade-appropriate strategies for using them, and explanations of how the lessons align with national standards. They also relieve you of the tiring work of designing inquiry lessons from scratch. What makes this book so special is the unique way science is integrated into the story line using characters and situations children can easily identify with.

The Doctrine of Creation Bruce Riley Ashford, Craig G. Bartholomew, 2020-11-10

According to Bruce Ashford and Craig Bartholomew, one of the best sources for regaining a robust biblical doctrine of creation is the recovery of Dutch neo-Calvinism. Tracing historical treatments and exploring theological themes, Ashford and Bartholomew develop the Kuyperian tradition's rich resources on creation for systematic theology and the life of the church today.

Genesis One Commentary In Light of Modern Science J.A. Merritt, 2013-01-02

Genesis 1 is badly understood in terms of its scientific value and in light of other Scriptures. This book is a detailed look at the first chapter of the Bible with systematic comments on every phrase. My hope for this book is to counteract some of the unfortunate Creation traditions. These ancient traditions are unfortunate because they do not stem from a whole-Bible approach to interpreting Genesis 1 and are at odds with the prevailing scientific knowledge of our days. Each phrase of each verse is clearly highlighted, followed by the interpretation, any application, and the scientific understanding if any applies. This book is primarily designed as a reference book, though many people may be interested in reading it cover to cover. Because Genesis 1 uses repeated phrases, there is some repetition in this commentary, though I have tried to minimize the repetition. Be prepared to see Genesis as you've never seen it before in light of modern science, an old earth, and even evolutionary theory.
