Mooney, Canadian Council for International Co-operation, International Coalition for Development Action, 1979 *Seeds and Sovereignty* Jack R. Kloppenburg Jr., 2013-07-21 Seeds for economically important crops are big business indeed As large seed companies continue to improve their product in various ways they make use of the original gene pools of these plants often located in tropical and subtropical areas of the world With increasing recognition that plant germplasm is an important raw material highly charged international disputes have developed over the exchange and use of this material adding another point of contention between poor nations and the manufacturing wealthier ones Twenty experts from several nations representing both the natural and social sciences consider the historical background the issue of patent rights as applied to plant germplasm the nature of global genetic interdependence the internationalization of the seed industry the implications of biotechnology on genetic resources the Third World attitude toward the debate and the viewpoints of the International Agricultural Research Centers Endangered Maize Helen Anne Curry, 2022-01-25 Charting the political social and environmental history of efforts to conserve crop diversity Many people worry that we re losing genetic diversity in the foods we eat Over the past century crop varieties standardized for industrial agriculture have increasingly dominated farm fields Concerned about what this transition means for the future of food scientists farmers and eaters have sought to protect fruits grains and vegetables they consider endangered They have organized high tech genebanks and heritage seed swaps They have combed fields for ancient landraces and sought farmers growing Indigenous varieties Behind this widespread concern for the loss of plant diversity lies another extinction narrative that concerns the survival of farmers themselves a story that is often obscured by urgent calls to collect and preserve Endangered Maize draws on the rich history of corn in Mexico and the United States to uncover this hidden narrative and show how it shaped the conservation strategies adopted by scientists states and citizens In Endangered Maize historian Helen Anne Curry investigates more than a hundred years of agriculture and conservation practices to understand the tasks that farmers and researchers have considered essential to maintaining crop diversity Through the contours of efforts to preserve diversity in one of the world s most important crops Curry reveals how those who sought to protect native traditional and heritage crops forged their methods around the expectation that social political and economic transformations would eliminate diverse communities and cultures In this fascinating study of how cultural narratives shape science Curry argues for new understandings of endangerment and alternative strategies to protect and preserve crop diversity *Ethnomedicine and Tribal Healing Practices in India* Sunita Reddy, Nemthianngai Guite, Bamdev Subedi, 2023-02-19 This book examines various aspects of ethnomedicine and tribal healing practices including its importance for inclusion and integration from a health systems perspective Tribal healing practices is an under studied component in healthcare system health policy and health systems research The book consists of original research papers

based on empirical studies done by anthropologists sociologists public health practitioners and research scientists in various parts of India It discusses issues of non codified folk healing with a focus on the therapeutic ideas and practices of tribal communities located in anthropological theory and methods It has a balance of empirical papers review and theoretical papers not only explaining what is inside the healing practices but also touching upon the question of why and delving into what should be looking into the possibility to apply it for a larger good i e health care for all This book discusses several important issues related to legitimacy evidence and efficacy recognition certification and integration protection and preservation bio piracy and bioprospecting benefit sharing and intellectual property rights sustainable use of medicinal herbs and conservation of nature and natural resources biodiversity and possibilities of mainstreaming tribal healing It is of interest to students and researchers from medical anthropology medical sociology cultural geography liberal studies tribal studies ecology sustainability and development and public health *Food Security In The United States* William B.

Lacey, Lawrence M. Busch, 2021-01-07 Despite the fact that every year it produces a larger surplus of agricultural products than any other country in the world the U S still must contend with a number of important but often unaddressed issues related to food security including problems of soil erosion water supply energy availability nutrition farm worker health and safety and product distribution This book containing contributions from authorities in both the natural and social sciences expands the range of issues pertinent to the security of the U S food system taking into account the adequacy and sustainability of the food supply equity in access to food by the entire population the nutritional quality of food and the costs and benefits social economic and health of the food system as it is presently organized Each of the authors considers an aspect of U S food security from the point of view of a specific discipline as well as in terms of broader policy implications

International Exchange of Genetic Resources, the Role of Information and Implications for Ownership: The Case of the U.S. National Plant Germplasm System Kelly Day Rubenstein and Melinda Smale, *Governing Agrobiodiversity* Regine Andersen, 2016-04-22 Plant genetic diversity is crucial to the breeding of food crops and is therefore a central precondition for food security Diverse genetic resources provide the genetic traits required to deal with crop pests and diseases as well as changing climate conditions Plant genetic diversity is also essential for traditional small scale farming and is therefore an indispensable factor in the fight against poverty However the diversity of domesticated plant varieties is disappearing at an alarming rate while interest in the commercial use of genetic resources has increased in line with bio technologies followed by demands for intellectual property rights This important book contributes to our understanding of how international regimes affect the management of plant genetic resources for food and agriculture in developing countries It identifies entry points to shape a better governance of agrobiodiversity and provides the first comprehensive analysis of how the international agreements pertaining to crop genetic resources affect the management of these vital resources for food security and poverty eradication in developing countries **Hearings, Reports and Prints of the Senate Committee on**

agrarian studies where food sovereignty has emerged as a pivotal concept over the past few decades with a wide variety of social movements on the ground experiments and policy innovations flying under its broad banner Despite its large and growing popularity the history theoretical foundations and political program of food sovereignty have only occasionally received in depth analysis and critical scrutiny This collection brings together both longstanding scholars in critical agrarian studies such as Philip McMichael Bina Agarwal Henry Bernstein Jan Douwe van der Ploeg and Marc Edelman as well as a dynamic roster of early and mid career researchers The ultimate aim is to advance this important frontier of research and organizing and put food sovereignty on stronger footing as a mobilizing frame a policy objective and a plan of action for the human future This volume was published as part one of the special double issue celebrating the 40th anniversary of the Journal of Peasant Studies

Cosmos, Earth and Nutrition Richard Thornton Smith, 2013-04-03 In recent years there has been an explosion of interest in organic and biodynamic produce Although once marginal and alternative escalating concerns about the environment health food quality and animal welfare have brought organics into mainstream consciousness Biodynamics a unique development of the organic approach does not narrowly focus on agricultural techniques It was conceived as a new way of thinking about farming nutrition and the world of nature allowing for a revitalized relationship with the living soil the elemental world and the cosmos Originating from a series of eight lectures given by Dr Rudolf Steiner in 1924 biodynamics broadens the outlook of agriculture and the science behind it leading to a holistic perspective that incorporates astronomical rhythms and unique preparations for plants and earth The author describes the foundations on which not only biodynamics but also the wider organic movement is based He builds bridges between mainstream science and Steiner's insights making it easier for the wider organic and ecological movement to approach biodynamic concepts and practise This book has much to offer to the beginner as well as to those already involved with biodynamics Its broad range of topics including the ecology of the farm organism food quality and nutrition community supported agriculture planetary influences seed quality and the vitality of water contribute to a deeper understanding of the subject The author is also concerned to promote innovation so that biodynamics moves with the times An appendix includes details for contacting various elements of the biodynamic world

DR RICHARD THORNTON SMITH was formerly a geography professor at the University of Leeds specializing in soil science environment and conservation Widely travelled he has a long standing interest in indigenous and sustainable farming He was introduced to the work of Rudolf Steiner at an early age although his full involvement with biodynamics dates from 1990 when he began to participate in training programmes and workshops at Emerson College Sussex In 1996 he began a biodynamic extension programme in Sri Lanka for which he published a book most recently updated in 2007 Since 2001 he has been an inspector for the Biodynamic Association's Demeter and Organic Certification in the UK In 2003 he produced an edited selection of Steiner's work relating to agriculture He is currently a council member of the Biodynamic Agricultural Association and lives in Ross on Wye Herefordshire
