frequently interdependent In a series of chronologically arranged chapters beginning with the post Roman Britons and ending with the 2016 Brexit referendum it draws attention to the constructed and historically contingent nature of the Classical and the Celtic and explores how notions related to both categories have been continuously combined and contrasted with one another in relation to British identities Britishness is revealed as a site of significant Celtic Classical cross pollination and a context in which received ideas about Celts Romans and Britons can be fruitfully reconsidered subverted and reformulated Responding to important scholarly questions that are best addressed by this interdisciplinary approach and extending the existing literature on Classical reception and national identity by treating the Celtic as an equally relevant tradition the volume creates a new and exciting dialogue between subjects that all too often are treated in isolation and sets the foundations for future cross disciplinary conversations

*History as a Science* Jan van der Dussen, 2020-05-11 Since its appearance in 1981 *History as a Science* by Jan van der Dussen has been welcomed as a coherent and comprehensive study of the many aspects of Collingwood's philosophy of history including its development and reception The book was the first to pay attention to Collingwood's unpublished manuscripts and to his work as an archaeologist and historian herewith opening up a new angle in Collingwood studies The republication of this volume meets an increasing demand to make the book available for future Collingwood scholars and people interested in Collingwood's philosophy The present edition of *History as a Science* includes updated references to the published manuscripts and an added preface

*King Arthur* Tony Sullivan, 2020-04-30 An investigation of the evidence for King Arthur based on the earliest written sources rather than later myths and legends This book differs from the usual Arthur theories in that it favors no particular conjecture simply analyses and clarifies the evidence presenting it all in chronological order Starting from Roman Britain the evidence shows how the legend evolved and at what point concepts such as Camelot Excalibur and Merlin were added It covers the historical records from the end of Roman Britain using contemporary sources such as they are from 400-800 including Gallic Chronicles Gildas and Bede It details the first written reference to Arthur in the *Historia Brittonum* c 800 and the later *Annales Cambriae* in the tenth century showing the evolution of the legend in later Welsh and French stories While not starting from or aiming at a specific person the book compares the possibility of Arthur

being purely fictional with a historical figure alongside a list of possible suspects The evidence is presented and the reader is invited to make up their own mind before a discussion of the author s own assessment What impressed me about this book is Sullivan s passion for this subject and his willingness to go the extra mile to show both sides of the argument It was extremely fascinating to see how he treated this book like a criminal investigation using different fields of study to figure out the origins of the legend how it evolved and whether or not there was a king named Arthur Adventures of a Tudor Nerd
