Oshana, 2010-09-28 The past fifteen years have seen a wellspring of interest in the concept and practical nature of the self Questions about the metaphysics of personal identity have preoccupied philosophical scholarship Less attention has been paid to the topic of the self from the first person standpoint the point of view of a person who regards certain phenomena as distinctive of and essential to her identity Nor has much attention been paid to how this concept of the self is related to responsible agency This book argues that a person's self conception affects her status as a responsible agent 1 The book develops a hybrid view of the self as the object of self consciousness that is the subject and owner of the events that occur by means of its agency Agents have unique identities as particular beings and identify themselves distinctively 2 The book argues that a healthy veridical sense of self grounds responsible agency by enabling persons to be aware of what they do and to understand their motives Certain pathologies upset the unity of a person's identity while others impair the lucidity of a person's sense of self and still others disturb general features of responsible agency such as the capacity to act purposively and realize one's will through intentional behavior The book explains what it means to be oneself and what departures from this state signify for a person's ability to navigate life and make sense of himself in the process The notion of acting out of character or failing to be oneself in some noteworthy way is relevant to a person's culpability because an individual's self conception affects his status as an accountable agent 3 To explain this the book defends an account of responsible agency Responsible persons are accountable alert to normative reasons in support of or in opposition to their behavior and able to respond to reasons for action bearing normative force because these reasons have normative force Accountable persons are unified agents a status that calls for an admission The Complete Fenelon Francois Fenelon, 2008-11-01 The most engaging collection of the French mystics writings now available Twenty first century Christians are now discovering the wisdom of this controversial theologian and spiritual thinker Fenelon showed how it was possible to have devotion and faith in the original Age of Reason In many respects rationality still rules today in religion and culture and as a result Fenelon speaks to modern Christians wanting deeper faith and a meaningful inner life His writings have never been as accessible as they are now in these lively new translations The Complete Fenelon includes more than one hundred of Fenelon's letters of spiritual

counsel as well as meditations on eighty five other topics Also translated here into English for the first time are F nelson s personal reflections on twenty one seasons and holidays of the Christian year An introduction from bestselling translator Robert J Edmonson and in depth recommended reading and bibliography make this the first place to start in any study of Francois F nelson *As Pilgrims Progress - Learning how Christians can walk hand in hand when they don't see eye to eye* Stephen John March,David E. Bjork,2015-05-29 This book is for Roman Catholic and Evangelical Protestant lay people who wonder what relationship if any they might have with their friends who come from a different Christian faith tradition than their own The authors aim to address that question in a practical way They believe that while disagreements remain it is possible to preserve the integrity of the faith while relating positively to Christians who cherish other beliefs The opinions expressed in this book grew out of nearly thirty years of experience as evangelical protestant missionaries ministering in catholic parish communities in France The goal of the book is to move the readers beyond simply understanding each other to a place where they might begin using their diversity to stimulate and encourage each other in our common pursuit of obedient discipleship We know of no other book which targets ecumenical lay relations in this way **Kant on Persons and Agency** Eric Watkins,2018 This volume investigates Kant s conception of what a human being is and how a human being can act autonomously Scholars explore fundamental topics such as freedom autonomy and personhood from both practical and theoretical perspectives and consider their importance within Kant s wider system of philosophy *Science and the Dao* Livia Kohn,2016 Designing Your Own Tarot Spreads Teresa Michelsen,2003 After learning a few basic card spreads and becoming familiar with individual card meanings one of the first things tarot readers discover is the critical importance of asking the right question But without using the right spread you might not be getting the most out of your tarot readings This groundbreaking book is a part of Llewellyn s Special Topics in Tarot series This series was created in response to an increasing demand for more tarot books on advanced and specialized topics Designing Your Own Tarot Spreads is an invaluable resource for tarot readers of all levels of expertise Learn how to Pose the perfect question Decide how many cards to use Clarify the meaning of each card position Work with reversals and dignities Use special cards such as signifiers karmic lesson cards and clarification cards Modify existing spreads to reflect your own reading style Inspirations for spreads covering a diverse variety of topics including relationships financial and career development predictive readings personal development and special occasions Whether you re a professional tarot reader looking for ways to better serve your clientele or a beginner looking for a way to make your readings more accurate this book will add new dimensions to your tarot practice **Cosmos & Culture** Steven J. Dick,Mark Lupisella,2009 From GPO Bookstore s Website Authors with diverse backgrounds in science history anthropology and more consider culture in the context of the cosmos How does our knowledge of cosmic evolution affect terrestrial culture Conversely how does our knowledge of cultural evolution affect our thinking about possible cultures in the cosmos Are life mind and culture of fundamental significance to the grand story of the

cosmos that has generated its own self understanding through science rational reasoning and mathematics Book includes bibliographical references and an index *What Does 'Art' Mean Now?* Bruce Fleming, 2023-06-22 What Does Art Mean Now asks and answers fundamental questions about the nature of aesthetic experience and role of the arts in contemporary society The Modern Age Romanticism and beyond viewed art as something transcending and separated from life and usually something encountered in museums or classrooms Nowadays however art tends to be defined not by a commonly agreed upon standard of quality or by its forms such as painting and sculpture but instead by political and ideological criteria So how do we connect with the works in museums whose point was precisely that they stood apart from such considerations Can we and should we be educated to appreciate art and what does it do for us anyway What are we to make of the so different newer works installations performances excerpts from the world held to be art that increasingly make it into museums Adopting a subjectivist approach this book argues that in the absence of a universal judgment or standard of taste the experience of art is one of freedom The arts give us the means to conceptualize our lives showing us ourselves as we are and as we might wish or not wish to be as well as where we have been and where we are going It will appeal to scholars of sociology philosophy museum studies and art history and to anyone interested in or puzzled by museums or college courses and their presentation of art today **Consciousness and Subjectivity** Sofia Miguens, Gerhard Preyer, 2013-05-02 Issues of subjectivity and consciousness are dealt with in very different ways in the analytic tradition and in the idealistic phenomenological tradition central to continental philosophy This book brings together analytically inspired philosophers working on the continent with English speaking philosophers to address specific issues regarding subjectivity and consciousness The issues range from acquaintance and immediacy in perception and apperception to the role of agency in bodily mine ness to self determination Selbstbestimmung through free action Thus involving philosophers of different traditions should yield a deeper vision of consciousness and subjectivity one relating the mind not only to nature or to first person authority in linguistic creatures questions which in the analytic tradition are sometimes treated as exhausting the topic but also to many other aspects of mind s understanding of itself in ways which disrupt classic inner outer boundaries
