Dictionary of Americanisms John Russell

Bartlett,1859 **The Elephant's Journey** José Saramago,2010-09-08 The Portuguese Nobel Prize winner's delightful posthumous novel recounts the 16th century travels of an Indian elephant from Lisbon to Vienna The New Yorker In 1551 King João III of Portugal gave Archduke Maximilian an unusual wedding present an elephant named Solomon In *The Elephant's Journey* Jos Saramago imagines Solomon's epic journey by foot across Europe with his Hindu keeper Subhro along for the adventure Accompanied by the Archduke his new wife and the royal guard these unlikely heroes traverse a continent riven by the Reformation and civil wars They are witnessed by scholars historians and wide eyed ordinary people as they make their way through the storied cities of northern Italy brave the Alps cross the Mediterranean Sea and at last make their way toward their grand entry into the imperial city A tale rich in irony and empathy regularly interrupted by witty reflections on human nature and arch commentary on the powerful who insult human dignity Los Angeles Times **Seeing the Animal Whole** Craig Holdrege,2021-02-16 We conceive of the individual animal as a small world existing for its own sake by its own means Every creature is its own reason to be All its parts have a direct effect on one another a relationship to one another thereby constantly renewing the circle of life Thus we are justified in considering every animal physiologically perfect Goethe Every animal on earth has its own unique character the slow sloth the burrowing mole the towering giraffe the huge but flexible elephant In vivid portrayals of nine different animals Craig Holdrege shows how all of an animal's features are interconnected and reveal the animal as a whole Moreover every animal intersects with and influences the larger environment in dynamic ways *Seeing the Animal Whole* provides a nuanced sense for what it means to be a living being With the open ended question Who are you and with the will to let the animals themselves be his guide Holdrege avoids the pitfalls of mechanistic and anthropomorphic perspectives that skew our concepts of animals and even lead to their mistreatment This book presents an integrative view of animals and nature that you won't find elsewhere The author presents a different way of seeing and relating to nature leading to a groundbreaking understanding of animal development and evolution as creative processes with the animals as active participants Further evolution of life on earth depends largely on human activity and this book shows a way to learn from nature's living qualities so we can further rather than disrupt the health of the planet which belongs to all of its inhabitants And that matters **Seeing the Forest for the Trees** Dennis Sherwood,2011-03-30 How to use Systems Thinking to improve your business **The Elephant Tourism Business** Eric Laws,Noel Scott,Xavier Font,John Koldowski,2020-11-23 Elephant tourism is a growing activity in many countries across Asia and Africa and is popular with tourists from all parts of the world Elephant tourism has grown rapidly providing the only viable way for elephants and their owners to survive since the banning of logging Old logging camps have been developed into sanctuaries for some elephants but many other camps were established as entertainment centres resulting in serious welfare issues for the elephants and their mahouts The profits from elephant tourism in Asia have encouraged African operators to follow a similar business model This book draws attention to the need for a comprehensive and rigorous focus on local solutions to

improve the welfare of captive elephants their mahouts and local residents and to enhance tourists experiences of elephant tourism *Bartlett's Dictionary of Americanisms* John Russell Bartlett,1859 This is a reproduction of the original artefact Generally these books are created from careful scans of the original This allows us to preserve the book accurately and present it in the way the author intended Since the original versions are generally quite old there may occasionally be certain imperfections within these reproductions We re happy to make these classics available again for future generations to enjoy

both documentary and feature film editing **Diversity in African languages** Doris L. Payne, Sara Pacchiarotti, Mokaya Bosire, 2016-12-31 Diversity in African Languages contains a selection of revised papers from the 46th Annual Conference on African Linguistics held at the University of Oregon. Most chapters focus on single languages addressing diverse aspects of their phonology, morphology, semantics, syntax, information structure, or historical development. These chapters represent nine different genera: Mande, Gur, Kwa, Edoid, Bantu, Nilotic, Gumuzic, Cushitic, and Omotic. Other chapters investigate a mix of languages and families moving from typological issues to sociolinguistic and inter-ethnic factors that affect language and accent switching. Some chapters are primarily descriptive while others push forward the theoretical understanding of tone, semantic problems, discourse-related structures, and other linguistic systems. The papers on Bantu languages reflect something of the internal richness and continued fascination of the family for linguists as well as maturation of research on the family. The distribution of other papers highlights the need for intensified research into all the language families of Africa, including basic documentation in order to comprehend linguistic diversities and convergences across the continent. In this regard, the chapter on Daatsi in Gumuzic stands out as the first ever published article on this hitherto unknown and endangered language found in the Ethiopian-Sudanese border lands.

Seeing Whole Asbjørn Grønstad, Mark Ledbetter, 2016-02-08 Seeing Whole: Toward an Ethics and Ecology of Sight explores the ways in which seeing as an embodied process is always a multivalent, ambiguous, and holistic undertaking. Looking at an image entails the mobilization of a range of affordances that together produce sight and insight as a phenomenological experience, namely cultural predispositions, geographical situatedness, medium specificity, personal biography, socio-political relationality, and corporeal affectability. In their own diverse ways, the essays in this book suggest that acts of seeing make up a visual ecology that in turn introduces a new ethical horizon, distinct from but in continuous interaction with conventional ethics. Spanning a great variety of media forms, from painting and photography to film, video, literature, fashion, graffiti, and installation art, this interdisciplinary collection offers a thorough reconceptualization of the relation between the aesthetics and the ethics of images and represents an innovative addition to the field of visual culture studies.
