**Seeking the Centre** Roslynn D. Haynes, 1998 The desert has a hypnotic presence in Australian culture simultaneously alluring and repellent The Centre is distant and unknown to most Australians yet has become a symbol of the country This exciting book highly illustrated in full colour reveals the singular impact that the desert both geographical and metaphorical has had on Australian culture At the heart of the book is the profound relationship that Aboriginal Australians have with the desert and the complex ways in which they have been seen by white people in this context The 'Imagined Sound' of Australian Literature and Music Joseph Cummins, 2019-09-20 Imagined Sound is a unique cartography of the artistic historical and political forces that have informed the post World War II representation of Australian landscapes It is the first book to formulate the unique methodology of imagined sound a new way to read and listen to literature and music that moves beyond the dominance of the visual the colonial mode of knowing controlling and imagining Australian space Emphasising sound and listening this approach draws out and re examines the key narratives that shape and are shaped by Australian landscapes and histories stories of first contact frontier violence the explorer journey the convict experience non Indigenous belonging Pacific identity and contemporary Indigenous Dreaming Imagined Sound offers a compelling analysis of how these narratives are reharmonised in key works of literature and music **Roads, Tourism and Cultural History** Rosemary Kerr, 2018-12-20 Roads and road tourism loom large in the Australian imagination as distance and mobility have shaped the nation s history and culture but roads are more than simply transport routes they embody multiple layers of history mythology and symbolism Drawing on Australian travel writing diaries and manuscripts tourism literature fiction poetry and feature films this book explores how Australians have experienced and imagined roads and road touring beyond urban settings from Aboriginal songlines to modern day road trips It also tells the stories of iconic roads including the Birdsville Track Stuart Highway and Great Ocean Road and suggests alternative approaches to heritage and tourism interpretation of these important routes The ongoing impact of the colonial past on Indigenous peoples and contemporary Australian society and culture including representations of the road and road travel is explored throughout the book The volume offers a new way of thinking about roads and road tourism as important strands in a nation s cultural fabric *Animated Landscapes* Chris Pallant, 2017-02-23 The first comprehensive study of animated landscapes across media *The Planetary Clock* Paul Giles, 2021 Ranging over various aesthetic forms literature film music in the period since 1960 this volume brings an antipodean perspective into conversation with the art and culture of the Northern Hemisphere to reformulate postmodernism as a properly global phenomenon **Rewriting God** Elaine Lindsay, 2021-11-22 Women are rarely if ever mentioned in commentaries upon Australian Christianity and spirituality Only exceptional women are recognized as authorities on religious matters Why is this so Does it matter Don t people from the same religious tradition share similar experiences of the divine regardless of their gender Rewriting God asks whether women have been writing about the divine and whether their insights

are different from those contained in mainstream accounts of Australian Christianity and spirituality An analysis of the writings of popular theologians and religious commentators over the last twenty years suggests that the most popular form of spirituality among Australian theologians is Desert Spirituality An analysis of women s autobiographical writings however suggests that the desert is irrelevant to many women s spiritual experiences This book through a close investigation of the fictions of Thea Astley Elizabeth Jolley and Barbara Hanrahan attempts to posit alternative forms of women s spirituality and to signal ways in which this spirituality is already being expressed From the evidence gathered here it becomes obvious that traditional expressions of Australian Christianity and spirituality are gender specific and that they have functioned to deny women s religious experiences and to silence their claims to equality in the sight and service of the divine It becomes obvious too that women have been developing their own forms of religious expression and that these may be expected to supplant gradually withering images of Desert Spirituality Whether this new imagery will strengthen Australian Christianity or whether it merely marks a decline in the authority of Christianity remains a moot point

Before Environmental Law Benjamin J Richardson, 2023-10-05 This landmark open access book unveils the history of defending Australia s natural environment and examines the subject s legal and political contexts from the birth of the nation in 1901 until the advent of the so called modern era of environmental regulation in the late 1960s It rejects the mythology that Australia lacked environmental law before the late 1960s in revealing how many of today s environmental laws from pollution control to nature conservation emerged from precedents or events much earlier in the 20th century This history however reveals a discrepancy between lawmakers greater efficacy to exploit rather than protect the environment a discrepancy that grew as nature s backlash intensified in a rapidly degrading continent colonised to build the Australian nation In exploring these dynamics the book offers a rich tapestry of case studies illustrated with historic photographs that show the origins of Australia s environmental laws and how they borrowed from international precedents or furnished lessons for other nations Through its multi disciplinary enquiry the book offers scholars and students of environmental law legal history and the environmental humanities a unique story about the failures and successes in the making of environmental law The ebook editions of this book are available open access under a CC BY NC ND 4 0 licence on [bloomsburycollections.com](https://bloomsburycollections.com)

Elizabeth McMahon,2016-07-09 Australia is the planet s sole island continent This book argues that the uniqueness of this geography has shaped Australian history and culture including its literature Further it shows how the fluctuating definition of the island continent throws new light on the relationship between islands and continents in the mapping of modernity The book links the historical and geographical conditions of islands with their potent role in the imaginaries of European colonisation It prises apart the tangled web of geography fantasy desire and writing that has framed

the Western understanding of islands both their real and material conditions and their symbolic power from antiquity into globalised modernity The book also traces how this spatial imaginary has shaped the modern man who is imagined as being the island's mirror The inter relationship of the island fantasy colonial expansion and the literary construction of place and history created a new man the dislocated and alienated subject of post colonial modernity This book looks at the contradictory images of islands from the allure of the desert island as a paradise where the world can be made anew to their roles as prisons as these ideas are made concrete at moments of British colonialism It also considers alternatives to viewing islands as objects of possession in the archipelagic visions of island theorists and writers It compares the European understandings of the first and last of the new worlds the Caribbean archipelago and the Australian island continent to calibrate the different ways these disparate geographies unified and fractured the concept of the planetary globe In particular it examines the role of the island in this process specifically its capacity to figure a graspable globe in the mind The book draws on the colonial archive and ranges across Australian literature from the first novel written and published in Australia by a convict on the island of Tasmania to both the ancient dreaming and the burgeoning literature of Aboriginal and Torres Strait Islanders in the twenty first century It discusses Australian literature in an international context drawing on the long traditions of literary islands across a range of cultures The book's approach is theoretical and engages with contemporary philosophy which uses the island and the archipelago as a key metaphor It is also historicist and includes considerable original historical research
