Selected References in Elective Orthopaedics Anthony H.C. Ratliff,Roger M. Atkins,Deborah M. Eastwood,2012-12-06 References to the reader are like insulin to the diabetic when needed they are indispensable but in excess they induce coma Moreover when references are simply shovelled into a text in great gobbets it is hard to resist the suspicion that the author has not read them all but has copied some from a previous author s list The story is told of one author who mischievously included in his list a bogus reference to an obscure foreign journal and gleefully noted its frequent appearance in future articles One of the joys of this present book is that the number of references to each topic is very small

But these few have been selected with discretion and studied with care Each group of references is followed by a critical assessment written with balanced judgment and commendable brevity and how refreshing it is to find authors who read much but write little In fact these authors have followed the pattern of the sister work *Selected References in Orthopaedic Trauma* published in 1989 *Nurse's 5-minute Clinical Consult*, 2007 *Nurse's 5 Minute Clinical Consult Treatments* provides instant access to information on more than 200 medications surgeries and other therapies including key procedural steps and nursing interventions The quick glance design enables nurses to review and master any topic in 5 minutes or less Each treatment is presented on a page or two page spread Recurring headings include indications procedure complications nursing diagnoses and patient outcomes pre treatment care post treatment care and patient teaching Icons highlight information that is critical for patient safety and age related concerns Illustrated reproducible patient teaching guides are included for many treatments Scores of illustrations photos and quick scan tables and charts complement the text
