List of Journals Indexed in Index Medicus National Library of Medicine (U.S.), 1978 Issues for 1977 1979 include also Special List journals being indexed in cooperation with other institutions Citations from these journals appear in other MEDLARS bibliographies and in MEDLING but not in Index medicus **World Translations Index**, 1997 **Nuclear Science Abstracts**, 1975 *Quantification* Lisa Matthewson, 2008 This volume presents articles by formal linguists on quantification in relatively understudied languages The ten contributions provide analysis of quantificational phenomena in languages from nine different families Eskimo Aleut Algonquian Na Dene Austronesian Basque Quechua Otomanguean Bantu and Chadic Approximately half of the papers present systematic overviews of quantificational phenomena in the respective languages the remainder of the papers present theoretical analyses of specific quantificational constructions The cross linguistic focus of this volume enables standard theories of quantification to be challenged by languages other than those for which they were originally designed The volume as a whole also uncovers a number of cross linguistically common properties in the realm of quantification The research presented here forms part of a growing trend towards formal study of understudied languages This is a process which will ultimately lead us to a greatly enriched understanding of the universal human language faculty The authors are all experts on their respective languages most with many years field experience All the authors have theoretical expertise in the area of quantification This book will be of interest to semanticists and syntacticians working on quantification to specialists in the languages discussed and to semantic and syntactic fieldworkers This volume presents articles on quantification in relatively understudied languages The authors are all experts on their respective languages *The Biology of Human Conduct* G. L. Mangan, 2016-01-21 The Biology of Human Conduct East West Models of Temperament and Personality is a three part book that explores models of temperament typology and personality and personality and conditioning The first part has four chapters detailing the behavior genetic model typological models human typology and higher mental processes and interactional approach to development The second part covers theories of personality strength of the nervous system the orientation reaction mobility concentration and lability and the structure of nervous system properties The last part shows sources of variance in conditioning and socialization Pedophilia Jay R. Feierman, 2012-12-06 The Reason for this Volume If we were to judge the seriousness of a psychosocial problem by the attention that the popular media give to it we would have to conclude that the modern world is in the midst of an epidemic of pedophilic child sexual abuse One can scarcely go more than a few weeks in any large metropolitan area without reading about one of the community's upstanding citizens discovered to have been sexually involved with children or adolescents The attention that the popular media give this topic is paralleled by the attention that it receives in the social sciences where literally dozens of books and more than a thousand articles have been published on it in the past few years In fact child sexual abuse along with co dependency and dysfunctional family have become the avant garde psychological clichés of the

decade However most of the lay and professional literature although voluminous reflect a narrow anthropo ethno and chronocentrism that precludes any real understanding of the topic with anything more than the preconceptions of our times
