Value Realization from Efficient Software Deployment Alex Louwe Kooijmans, Anshu Kak, Shaun A. Crain, Andrej Crepinsek, Venkata Gadepalli, Ian Hall, IBM Redbooks, 2011-10-25 Many companies have a complex process for purchasing software that is required by IT projects or better by the business Usually software is purchased by a centralized procurement function and is either purchased on a project by project basis or as a large periodic software contract Unfortunately purchasing software products does not automatically mean that these products are exploited throughout the organization providing the maximum possible value to the business units Several issues call for a structured approach that gets the most business value out of software already purchased The objectives of this approach are to Create maximum awareness throughout the organization of the software purchased Track software use in IT projects and act if products are not used at all used improperly or insufficiently used Facilitate use of software products in projects especially when software products are complex and require a lot of integration We can summarize the overall objective of this approach as ensuring that the business units in an organization obtain the maximum possible value of software products purchased which is also the scope of this IBM Redbooks publication **IBM Software for E-Business on Demand** Douglas Spencer, 2004 Covering the functional characteristics of an on demand computing infrastructure this book describes the IBM software products that can be used to create a computing infrastructure that has these characteristics Also discussed is how IBM s on demand strategy can help a business to make more informed purchasing decisions for IBM application software **SMS 2 Administration** Mike Lubanski, Darshan Doshi, 2000 Michael Lubanski and Darshan Doshi who have implemented one of the largest rollouts of SMS in a production environment call upon their years of experience with SMS to demystify its complexities in SMS 2

Administration Combining Mr Lubanski's and Mr Doshi's real world knowledge with that of other systems management experts this book provides practical advice on and recommendations for dealing with SMS administration From concept and design through installation configuration security usage and troubleshooting SMS 2 Administration is a reference guide that uses realistic scenarios to help you make sense of SMS's sometimes confusing issues With this book not only will you understand SMS you'll be able to deploy and maintain an SMS system in your own environment
