Many Faces Of Gender Roles And Relationships Through Time In Indigenous Northern Communities:

Many Faces of Gender Alaska Anthropological Association. Meeting, 2002 This is an interdisciplinary volume that addresses the dearth in descriptions and analyses of gender roles and relationships in Native societies in North America's boreal reaches This collection complements existing conceptual frameworks and develops new methodological and theoretical approaches that more fully articulate the complex nature of social economic political and material relationships between indigenous men and women in this region The contributors challenge the widespread notion that Native women's and men's roles are frozen in time a concept precluding the possibility of differently constructed gender categories and changing power relations and roles through time By examining the prehistorical historical and modern records they demonstrate that these roles are not fixed and have indeed gradually transformed Ideal for anthropologists and archaeologists interested in cross disciplinary studies of gender households women and lithics

The Oxford Handbook of the Archaeology and Anthropology of Hunter-Gatherers Vicki Cummings, Peter Jordan, Marek Zvelebil, 2014-04-24 For more than a century the study of hunting and gathering societies has been central to the development of both archaeology and anthropology as academic disciplines and has also generated widespread public interest and debate The Oxford Handbook of the Archaeology and Anthropology of Hunter Gatherers provides a comprehensive review of hunter gatherer studies to date including critical engagements with older debates new theoretical perspectives and renewed obligations for greater engagement between researchers and indigenous communities Chapters provide in depth archaeological historical and anthropological case studies and examine far reaching questions about human social relations attitudes to technology ecology and management of resources and the environment as well as issues of diet health and gender relations all central topics in hunter gatherer research but also themes that have great relevance for modern global society and its future challenges The Handbook also provides a strategic vision for how the integration of new methods approaches and study regions can ensure that future research into the archaeology and anthropology of hunter

gatherers will continue to deliver penetrating insights into the factors that underlie all human diversity

The Oxford Handbook of the Prehistoric Arctic T. Max Friesen, Owen K. Mason, 2016-08-05 The North American Arctic was one of the last regions on Earth to be settled by humans due to its extreme climate limited range of resources and remoteness from populated areas Despite these factors it holds a complex and lengthy history relating to Inuit Iupiat Inuvialuit Yupik and Aleut peoples and their ancestors The artifacts dwellings and food remains of these ancient peoples are remarkably well preserved due to cold temperatures and permafrost allowing archaeologists to reconstruct their lifeways with great accuracy Furthermore the combination of modern Elders traditional knowledge with the region's high resolution ethnographic record allows past peoples lives to be reconstructed to a level simply not possible elsewhere Combined these factors yield an archaeological record of global significance the Arctic provides ideal case studies relating to issues as diverse as the impacts of climate change on human societies the complex process of interaction between indigenous peoples and Europeans and the dynamic relationships between environment economy social organization and ideology in hunter gatherer societies In the The Oxford Handbook of the Prehistoric Arctic each arctic cultural tradition is described in detail with up to date coverage of recent interpretations of all aspects of their lifeways Additional chapters cover broad themes applicable to the full range of arctic cultures such as trade stone tool technology ancient DNA research and the relationship between archaeology and modern arctic communities The resulting volume written by the region's leading researchers contains by far the most comprehensive coverage of arctic archaeology ever assembled

How the West Was Drawn David Bernstein, 2018-08 How the West Was Drawn explores the geographic and historical experiences of the Pawnees the Iowas and the Lakotas during the European and American contest for imperial control of the Great Plains during the eighteenth and nineteenth centuries David Bernstein argues that the American West was a collaborative construction between Native peoples and Euro American empires that developed cartographic processes and culturally specific maps which in turn reflected encounter and conflict between settler states and indigenous peoples Bernstein explores the cartographic creation of the Trans Mississippi West through an interdisciplinary methodology in geography and history He shows how the Pawnees and the Iowas wedged between powerful Osages Sioux the horse and captive rich Comanche Empire French fur traders Spanish merchants and American Indian agents and explorers devised strategies of survivance and diplomacy to retain autonomy during this era The Pawnees and the Iowas developed a strategy of cartographic resistance to predations by both

Euro American imperial powers and strong indigenous empires navigating the volatile and rapidly changing world of the Great Plains by brokering their spatial and territorial knowledge either to stronger indigenous nations or to much weaker and conquerable American and European powers *How the West Was Drawn* is a revisionist and interdisciplinary understanding of the global imperial contest for North America's Great Plains that illuminates in fine detail the strategies of survival of the Pawnees the Iowas and the Lakotas amid accommodation to predatory Euro American and Native empires

The Archaeology of Large-Scale Manipulation of Prey Kristen A. Carlson, Leland C. Bement, 2018-05-30 *The Archaeology of Large Scale Manipulation of Prey* explores the social and functional aspects of large scale hunting adaptations in the archaeological record Mass kill hunting strategies are ubiquitous in human prehistory and exhibit culturally specific economic social environmental and demographic markers Here seven case studies primarily from the Americas and spanning from the Folsom period on the Great Plains to the ethnographic present in Australia expand the understanding of large scale hunting methods beyond the customary role of subsistence and survival to include the social and political realms within which large scale hunting adaptations evolved Addressing a diverse assortment of archaeological issues relating to the archaeological signatures and interpretation of mass kill sites *The Archaeology of Large Scale Manipulation of Prey* reevaluates and rephrases the deep time development of hunting and the themes of subsistence to provide a foundation for the future study of hunting adaptations around the globe Authors illustrate various perspectives and avenues of investigation making this an important contribution to the field of zooarchaeology and the study of hunter gatherer societies throughout history The book will appeal to archaeologists ethnologists and ecologists alike Contributors Jane Balme Jonathan Driver Adam C Graves David Maxwell Ulla Odgaard John D Speth Mar a Nieves Zede o **Across a Great Divide** Laura L. Scheiber, Mark D. Mitchell, 2010-02-15 Archaeological research is uniquely positioned to show how native history and native culture affected the course of colonial interaction but to do so it must transcend colonialist ideas about Native American technological and social change This book applies that insight to five hundred years of native history Using data from a wide variety of geographical temporal and cultural settings the contributors examine economic social and political stability and transformation in indigenous societies before and after the advent of Europeans and document the diversity of native colonial experiences The book's case studies range widely from sixteenth century Florida to the Great Plains to nineteenth century coastal Alaska The contributors address a series of interlocking themes Several consider the role of indigenous agency in the processes of colonial interaction paying particular attention to gender and status Others examine the ways long standing native political economies affected and were in turn affected by colonial interaction A third group explores colonial period ethnogenesis emphasizing the emergence of new native social identities and relations after 1500 The book also highlights tensions between the detailed study of local cases and the search for global processes a recurrent theme in postcolonial research If archaeologists are to bridge the artificial divide separating history from prehistory they must overturn a whole

range of colonial ideas about American Indians and their history This book shows that empirical archaeological research can help replace long standing models of indigenous culture change rooted in colonialist narratives with more nuanced multilinear models of change and play a major role in decolonizing knowledge about native peoples

Marking the Land William A Lovis, Robert Whallon, 2016-02-26 Marking the Land investigates how hunter gatherers use physical landscape markers and environmental management to impose meaning on the spaces they occupy The land is full of meaning for hunter gatherers Much of that meaning is inherent in natural phenomena but some of it comes from modifications to the landscape that hunter gatherers themselves make Such alterations may be intentional or unintentional temporary or permanent and they can carry multiple layers of meaning

ranging from practical signs that provide guidance and information through to less direct indications of identity or abstract highly symbolic signs of sacred or ceremonial significance This volume investigates the conditions which determine the investment of time and effort in physical landscape marking by hunter gatherers and the factors which determine the extent to which these modifications are symbolically charged Considering hunter gatherer groups of varying sociocultural complexity and scale Marking the Land provides a systematic consideration of this neglected aspect of hunter gatherer adaptation and the varied environments within which they live **Indigenous Nations Studies Journal** ,2003

Decolonizing Indigenous Histories Maxine Oland,Siobhan M. Hart,Liam Frink,2012-12-06 Decolonizing Indigenous Histories makes a vital contribution to the decolonization of archaeology by recasting colonialism within long term indigenous histories Showcasing case studies from Africa Australia Mesoamerica and North and South America this edited volume highlights the work of archaeologists who study indigenous peoples and histories at multiple scales The contributors explore how the inclusion of indigenous histories and collaboration with contemporary communities and scholars across the subfields of anthropology can reframe archaeologies of colonialism The cross cultural case studies employ a broad range of methodological strategies archaeology ethnohistory archival research oral histories and descendant perspectives to better appreciate processes of colonialism The authors argue that these more complicated histories of colonialism contribute not only to understandings of past contexts but also to contemporary social justice projects In each chapter authors move beyond an academic artifice of prehistoric and colonial and instead focus on longer sequences of indigenous histories to better understand colonial contexts Throughout each author explores and clarifies the complexities of indigenous daily practices that shape and are shaped by long term indigenous and local histories by employing an array of theoretical tools including theories of practice agency materiality and temporality Included are larger integrative chapters by Kent Lightfoot and Patricia Rubertone foremost North American colonialism scholars who argue that an expanded global perspective is essential to understanding processes of indigenous colonial interactions and transitions Encyclopedia of the Arctic Mark Nuttall,2005-09-23 With detailed essays on the Arctic s environment wildlife climate history exploration resources economics politics indigenous cultures and languages conservation initiatives and more this Encyclopedia is the only major work and comprehensive reference on this vast complex changing and increasingly important part of the globe Including 305 maps This Encyclopedia is not only an interdisciplinary work of reference for all those involved in teaching or researching Arctic issues but a fascinating and comprehensive resource for residents of the Arctic and all those concerned with global environmental issues sustainability science and human interactions with the environment *Circumpolar Lives and Livelihood* Robert Jarvenpa,Hetty Jo Brumbach,2006-01-01 Circumpolar Lives and Livelihood is a cross cultural ethnoarchaeological study of the gendered nature of subsistence in northern hunter gatherer fisher societies Based on field studies of four circumpolar societies it documents the complexities of women s and men s involvement in food procurement

processing and storage and the relationship of such behaviors to the built landscape Avoiding simplistic stereotypes of male and female roles the framework of gendered landscapes reveals the variability and flexibility of women s and men s actual lives in a manner useful for archaeological interpretations of hunter foragers Innovative in scope and design this is the first study to employ a controlled four way cross cultural comparison of gender and subsistence Members of an international team of anthropologists experienced in northern scholarship apply the same task differentiation methodology in studies of Chipewyan hunter fishers of Canada Khanty hunter fisher herders of Western Siberia S mi intensive reindeer herders of northwestern Finland and I_upiaq maritime hunters of the Bering Strait of Alaska This database on gender and subsistence is used to reassess one of the bedrock concepts in anthropology and social science the sexual division of labor

Breaking Ice Arctic Institute of North America,2005 From the pressures of development technological advances globalization and climate change to social and cultural life this book attempts to define the nature of competing demands and assess their impact on the environment These essays provide a detailed examination of ocean and coastal management in the Canadian north exploring a wide range of issues critical to environmental stewardship and breaking the ice to connect academics government managers policy makers aboriginal groups and industry Book Jacket

Alliance and Conflict Ernest S. Burch,2005-01-01 Alliance and Conflict combines a richly descriptive study of intersocietal relations in early nineteenth century Northwest Alaska with a bold theoretical treatise on the structure of the world system as it might have been in ancient times Ernest S Burch Jr illuminates one aspect of the traditional lives of the I_upiaq Eskimos in unparalleled detail and depth Basing his account on observations made by early Western explorers interviews with Native historians and archeological research Burch describes the social boundaries and geographic borders formerly existing in Northwest Alaska and the various kinds of transactions that took place across them These ranged from violence of the most brutal sort at one extreme to relations of peace and friendship at the other Burch argues that the international system he describes approximated in many respects the type of system existing all over the world before the development of agriculture Based on that assumption he presents a series of hypotheses about what the world system may have been like when it consisted entirely of hunter gatherer societies and about how it became more centralized with the evolution of chiefdoms Accounts of specific people places and events add an immediate experiential dimension to the work complementing its theoretical apparatus and sweeping narrative scope Provocative and comprehensive Alliance and Conflict is a definitive look at the greater world of Native peoples of Northwest Alaska

Writing Geographical Exploration Wayne Kenneth David Davies,Arctic Institute of North America,2004 His tale of adventure should occupy a more prominent place in the study of exploration literature and history not only in Canada but also in his homeland of Wales Jacket
